

BIOPHILIA

Visual connection with nature

A view to elements of nature, living systems and natural processes.

Non-visual connection with nature

Auditory, haptic, olfactory, or gustatory stimuli that engender a deliberate and positive reference to nature, living systems or natural processes.

Non-Rhythmic Sensory Stimuli

Stochastic and ephemeral connections with nature that may be analyzed statistically but may not be predicted precisely.

Thermal & Airflow Variability

Subtle changes in air temperature, relative humidity, airflow across the skin, and surface temperatures that mimic natural environments.

Presence of Water

A condition that enhances the experience of a place through the seeing, hearing or touching of water.

Dynamic & Diffuse Light

Leveraging varying intensities of light and shadow that change over time to create conditions that occur in nature.

Connection with Natural Systems

Awareness of natural processes, especially seasonal and temporal changes characteristic of a healthy ecosystem.

BIOPHILIA

Biomorphic Forms & Patterns

Symbolic references to contoured, patterned, textured or numerical arrangements that persist in nature.

Material Connection with Nature

Material and elements from nature that, through minimal processing, reflect the local ecology or geology to create a distinct sense of place.

Complexity & Order

Rich sensory information that adheres to a spatial hierarchy similar to those encountered in nature.

Prospect

An unimpeded view over a distance for surveillance and planning.

Refuge

A place for withdrawal, from environmental conditions or the main flow of activity, in which the individual is protected from behind and overhead.

Mystery

The promise of more information achieved through partially obscured views or other sensory devices that entice the individual to travel deeper into the environment. An unimpeded view over a distance for surveillance and planning.

Risk/Peril

An identifiable threat coupled with a reliable safeguard.
