- Yes

DESIGN AND RESEARCH:

Regarding to the criterion:

"What is presented is coherent. It has meaning, it is correct and elaborated, on main line and on parts"

That what is presented is on track.

DESIGN

AT THIS MOMENT, IN THE CONTEXT OF THE TRACK, PROGRAMME AND STUDIO IS MISSING:

- Presence and deepening of significance
- Coherence between the different domains
- Implementation of know-how and design tools
- Exploring and reflection
- Presentation

Correctness and elaboration within the domains (if applicable):

- spatial design: aspects like experiencing space, routing, composition, light, texture, colour, shape and mass
- functional design: aspects like program, order and routing, dimensions and physical conditions
- site design: response to the surroundings in shape, composition, mass, function and routing
- relation to broader context = such as socio-cultural, historical, philosophical, economical aspects – in particular sustainability.
- material and technical design: material, physics, statics, structure and construction, climate design.

RESEARCH

AT THIS MOMENT, IN THE CONTEXT OF THE TRACK, PROGRAMME AND STUDIO IS MISSING:

- Presence and deepening of significance
- Coherence between the different domains
- Implementation of know-how and design tools
- Exploring and reflection
- Presentation

Correctness and elaboration within the domains (if applicable):

- Relevance: aspects such as background research, value in relation to personal and socio-cultural context
- Research question: aspects such as clarity and definition
- Research method: aspects such as approach of research and limits
- Results : aspects such as order and relevance data
- Conclusion and discussion: aspects such as clarity answer question, recommendation further research and relation design

NOTES:
