

**EMBRACE URBAN GROWTH
AVOID URBAN SPRAWL**

YING LI
4699874

P5 Presentation
June 2019

Content

Problem Context : Urban sprawl

Part two: Almere future

Part three: Autonomous vehicle

Part four: Compact analysis

Part five: Design AV parking system

1

Problem Context : urban sprawl

Urban footprint comparison

Paris, France

urban area 3,000 km²
population 10 million

Randstad, the Netherlands

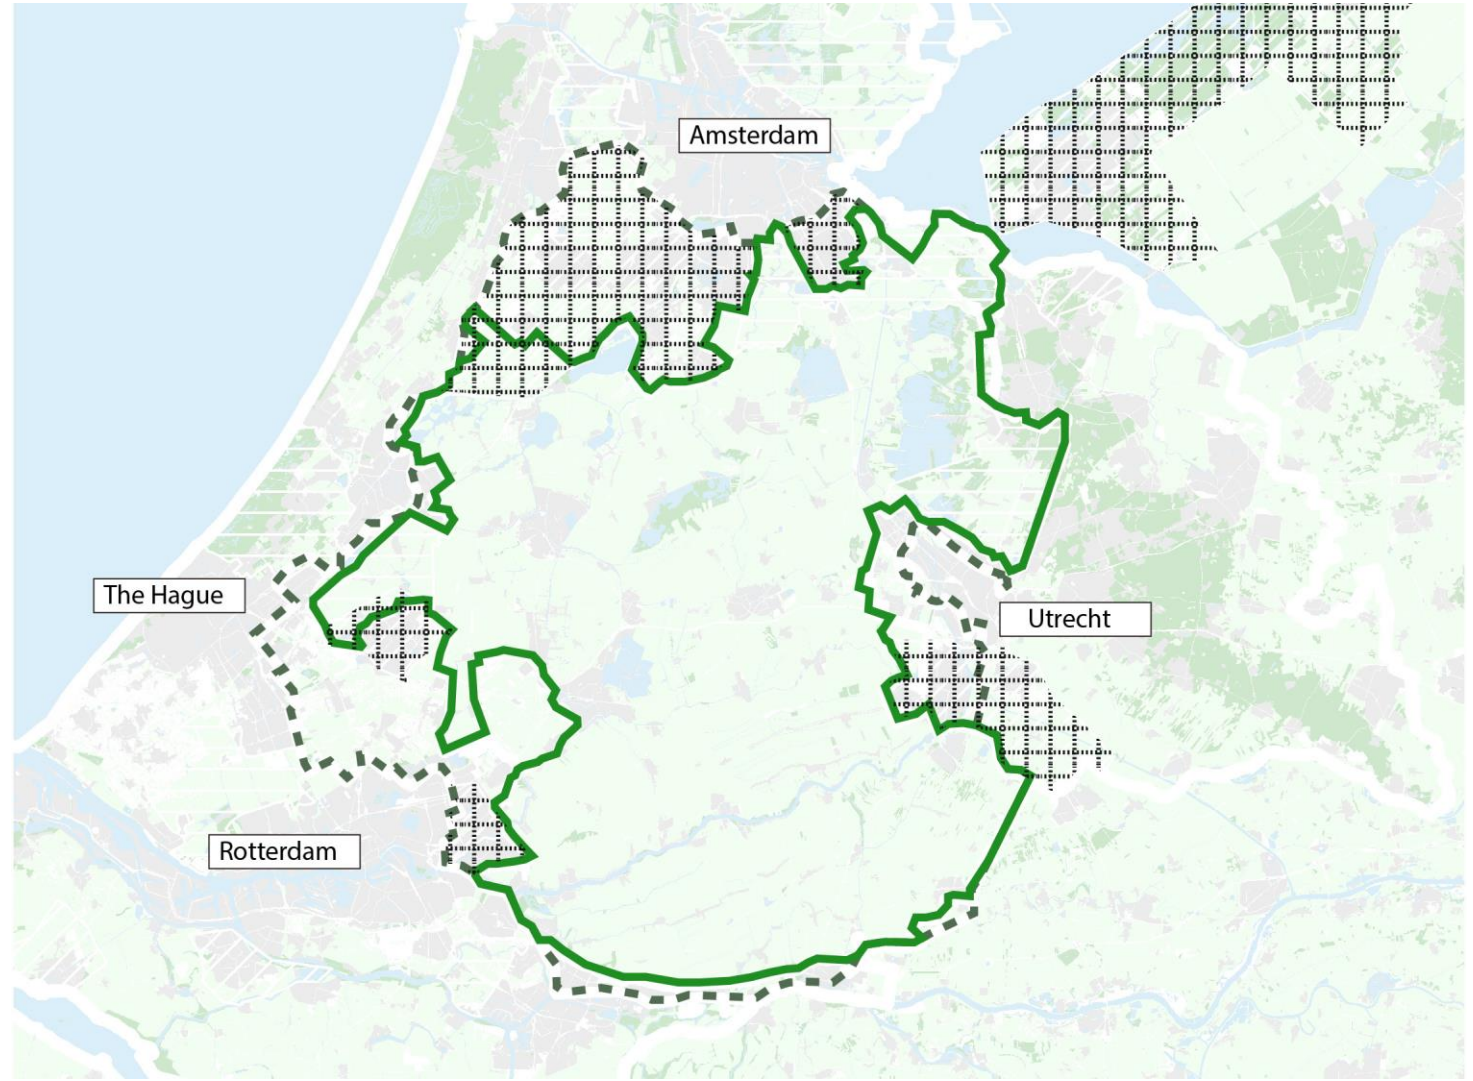

urban area 8,000 km²
population 8 million

Green Heart border changes

Legend

-  Green Heart border (VROM, 1958)
-  Green Heart border (VROM, 2015)
-  new town project
-  agriculture land
-  nature land
-  built-up area
-  water

Mobility infrastructure networks in Randstad

Car-dependent city

Impact of urban sprawl

decrease in

biodiversity

increase in

infrastructure investments

increase in

automobile dependency

Comparison between urban density and urban form

Which city is more dense?

Paris, France

New York, America

Paris, France

20,200 per sq km downtown

New York, America

25,800 per sq km Manhattan

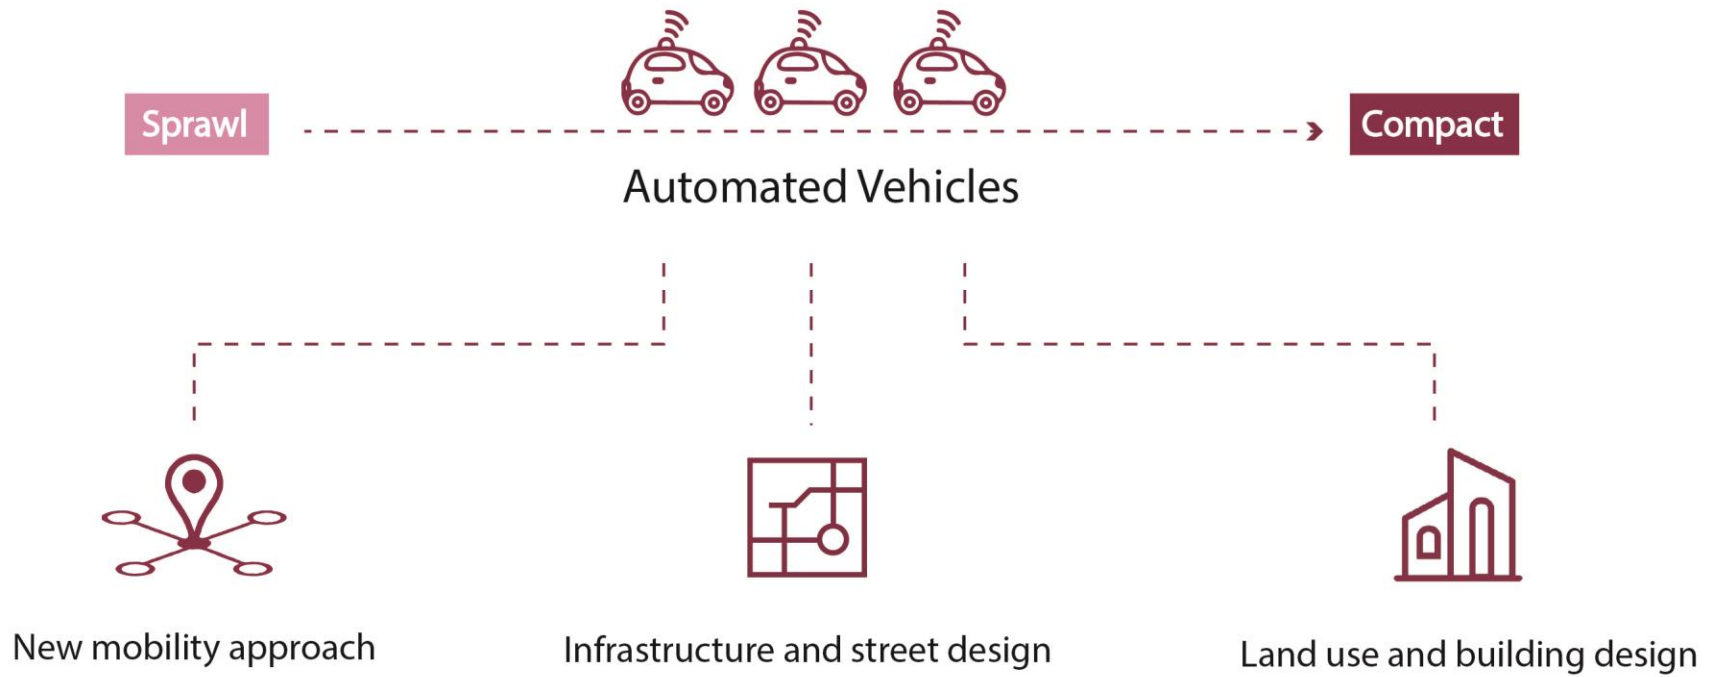

Automated vehicles (AVs)

People in AVs

AVs on street

contribute to

environmental sustainability

contribute to

non-motorized mobility

contribute to

public space quality

2

Almere future

"**Almere** has historically been a **dormitory town** from which residents have been content to travel for both work and leisure"

--- (Woodman, 2004)

HOUSING SPRAWL

TRAFFIC CONGESTION

Population Growth Task of Almere

Population development in Almere 2000-2040 (forecast from 2018)

Source: ONTWIKKELING BEVOLKING ALMERE 2017 (<https://www.osalmere.nl/docs/Ontwikkeling%20bevolking%20Almere%202017.pdf>)

Type one: Government proposal - develop new urban land

Almere-Pampus

Almere Hout

Type one: Government proposal - develop new urban land

Task : **70,000** new resident
+ **35%** population growth

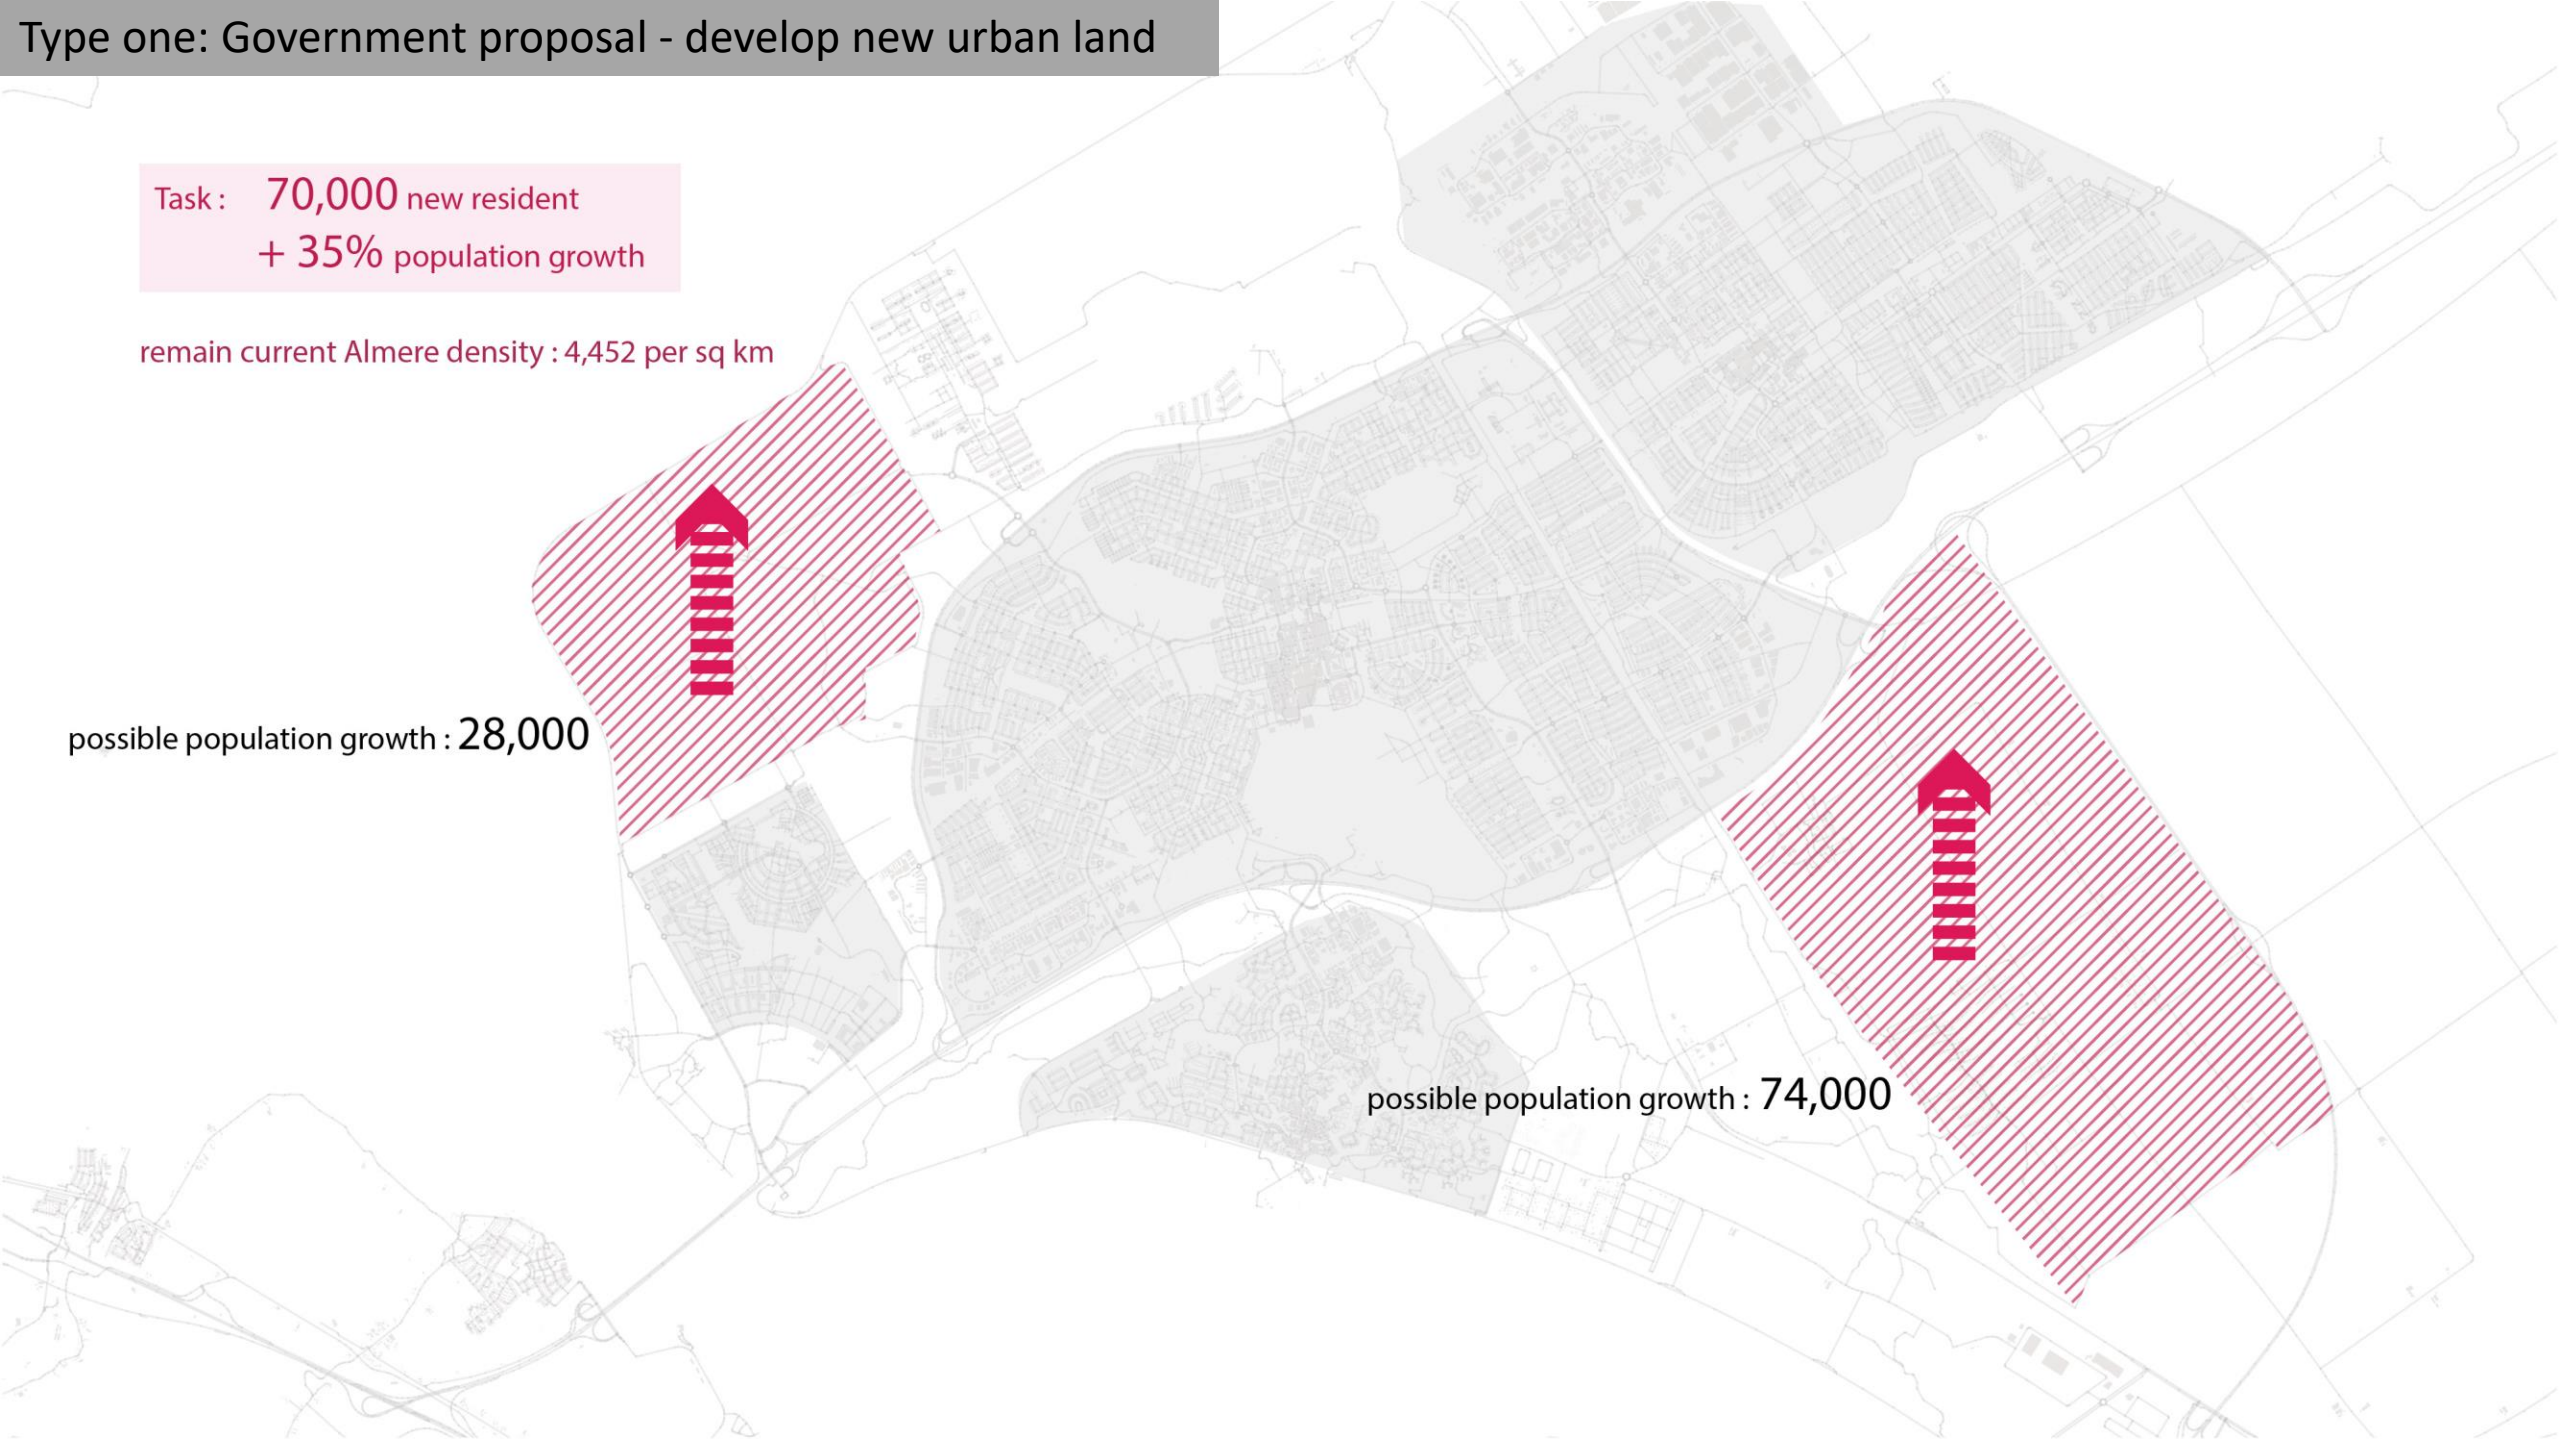

remain current Almere density : 4,452 per sq km

possible population growth : **28,000**

possible population growth : **74,000**

Type two: Compact proposal - redevelop urbanized land

Task : 70,000 new resident
+ 35% population growth

↑ future density : 1.35 times denser
6,000 per sq km

How to design **a compact Almere** in a future of **automated vehicles**

... .. and contribute to **urban sustainability**?

3

Autonomous Vehicle

The possible impact of AV : sprawl future

Efficient traffic

Valuable travel time

The possible impact of AV : compact future

mass transit street space

massive parking space

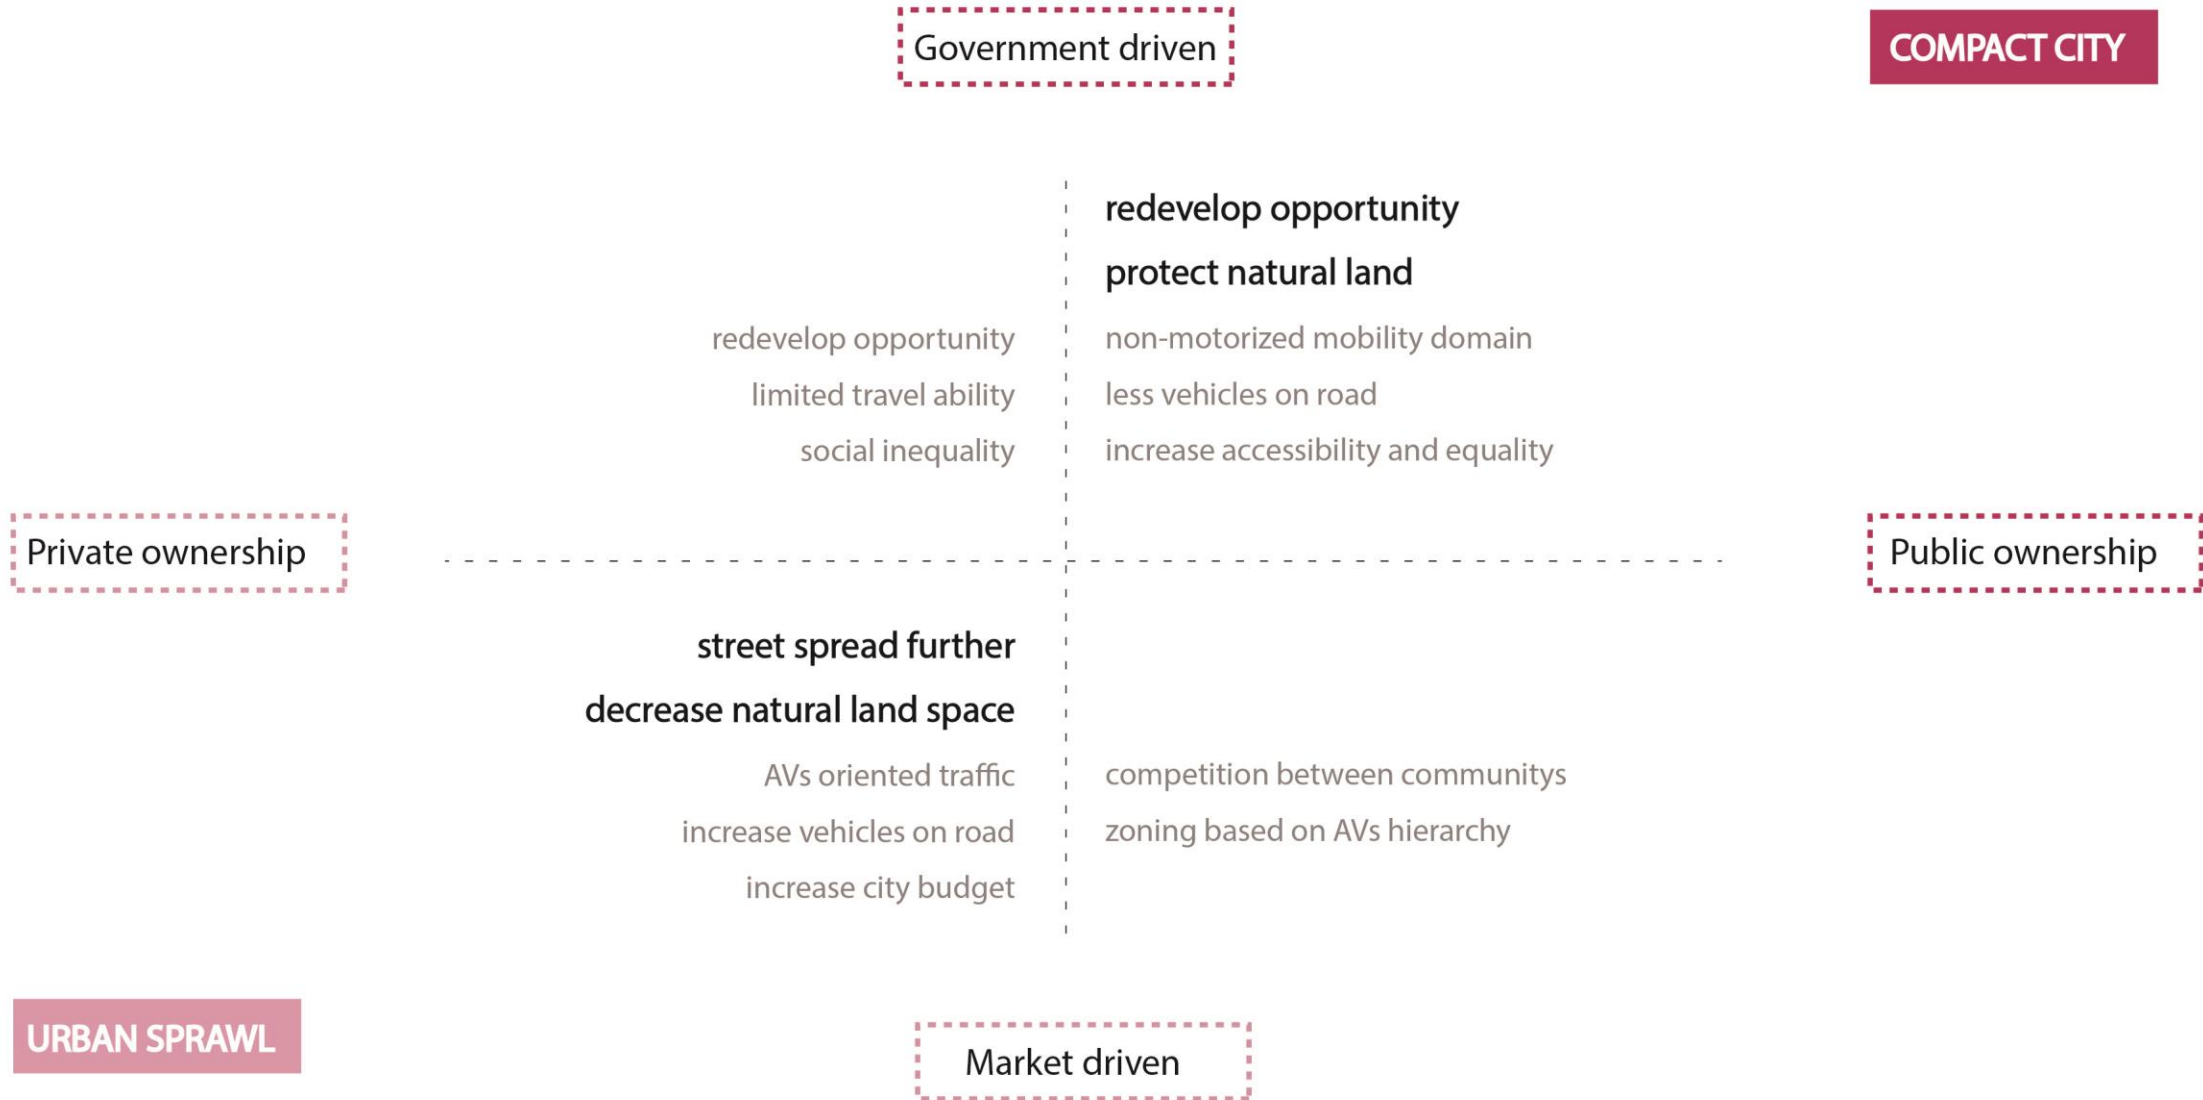

land use for conventional vehicles

Smaller street

Redevelop opportunity

COMPACT CITY

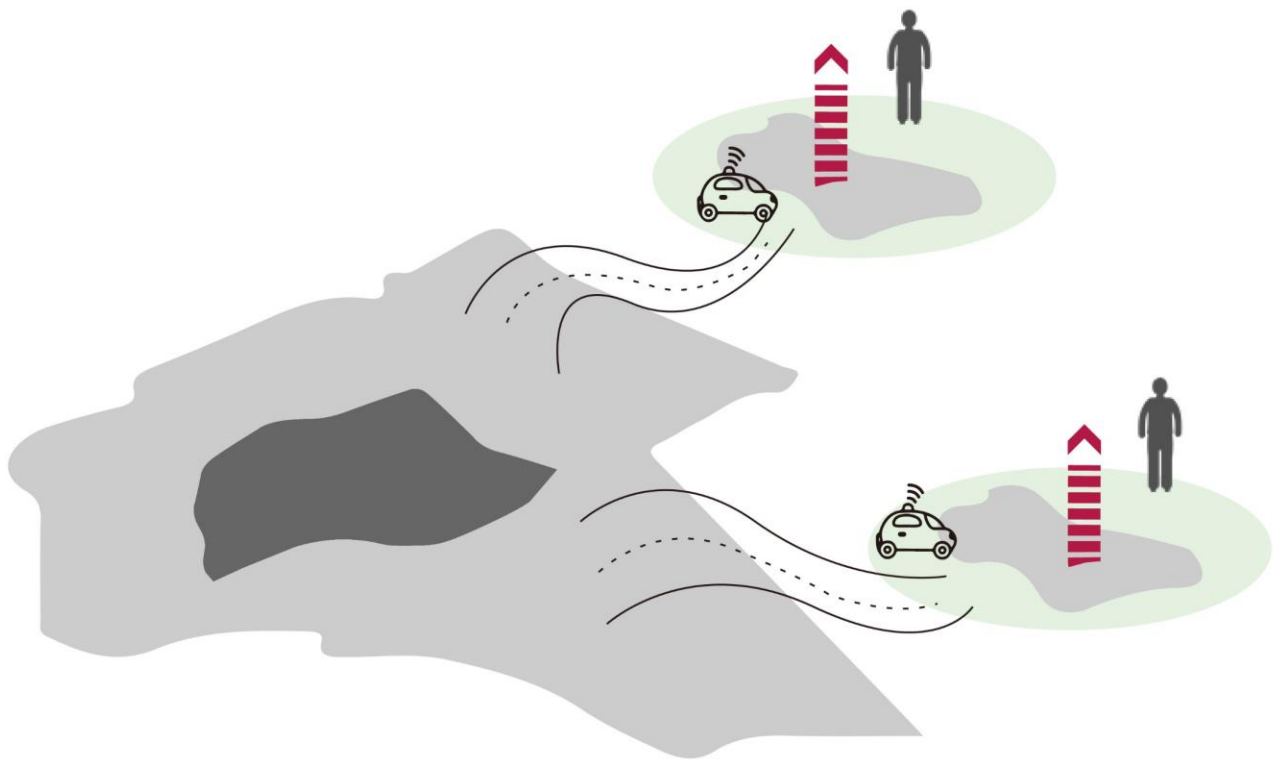

Private ownership

Public ownership

URBAN SPRAWL

Market driven

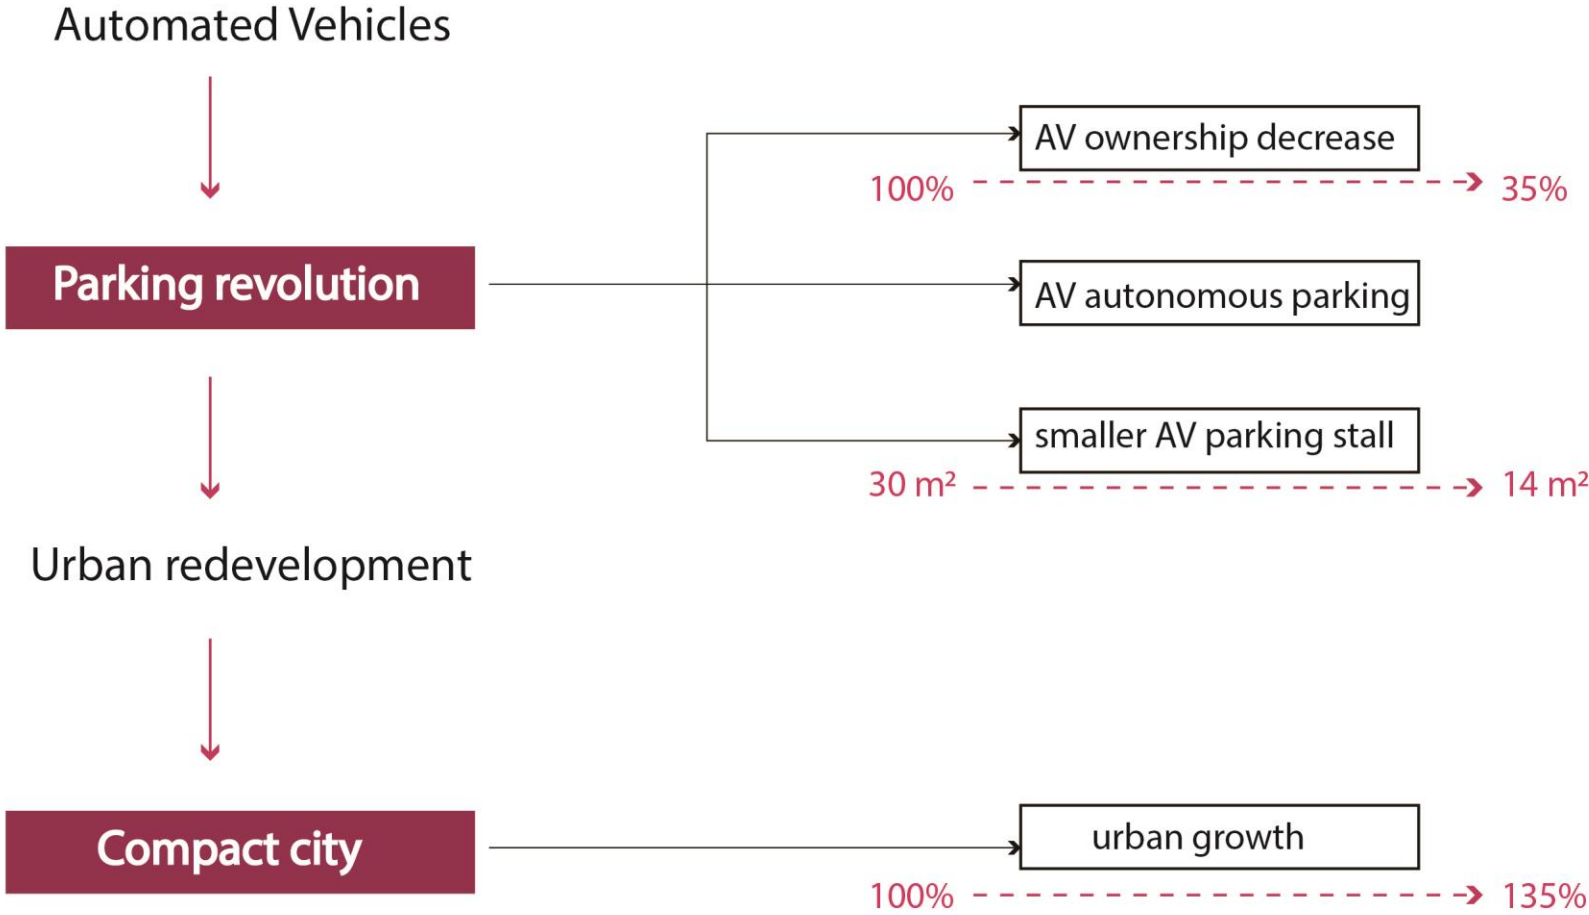

Urban Sprawl

VS

Compact City

Decrease of vehicles ownership

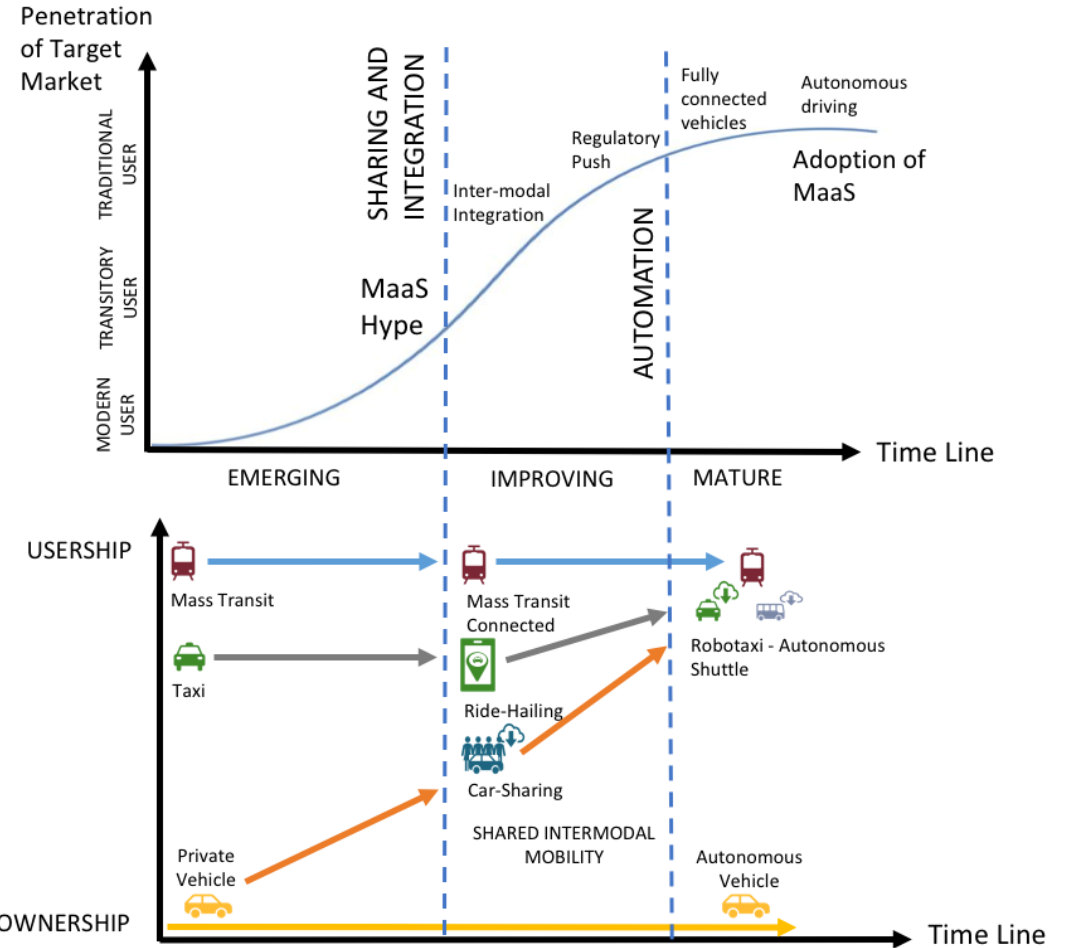

The only available option today

Mobility as a service

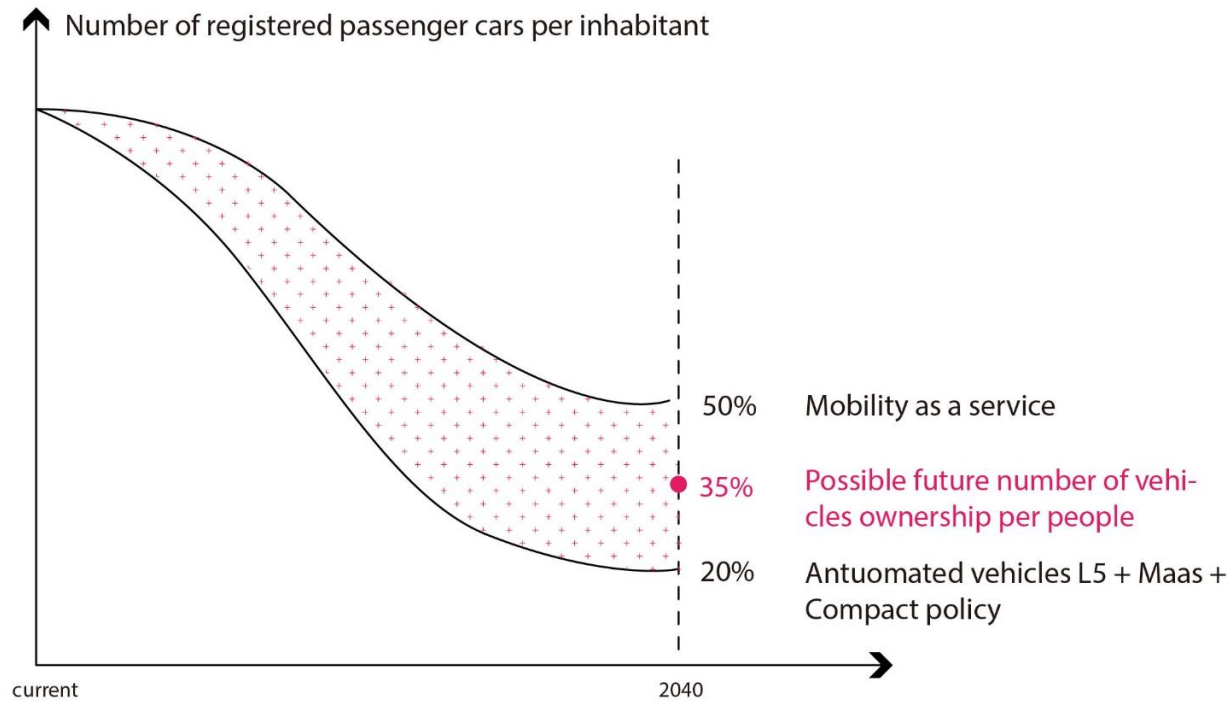

Tomorrow's freedom of mobility

Decrease of vehicles ownership

Decrease of vehicles ownership

$$\text{Future AV ownership} = \text{current car ownership} * 35\%$$

Decrease of parking space

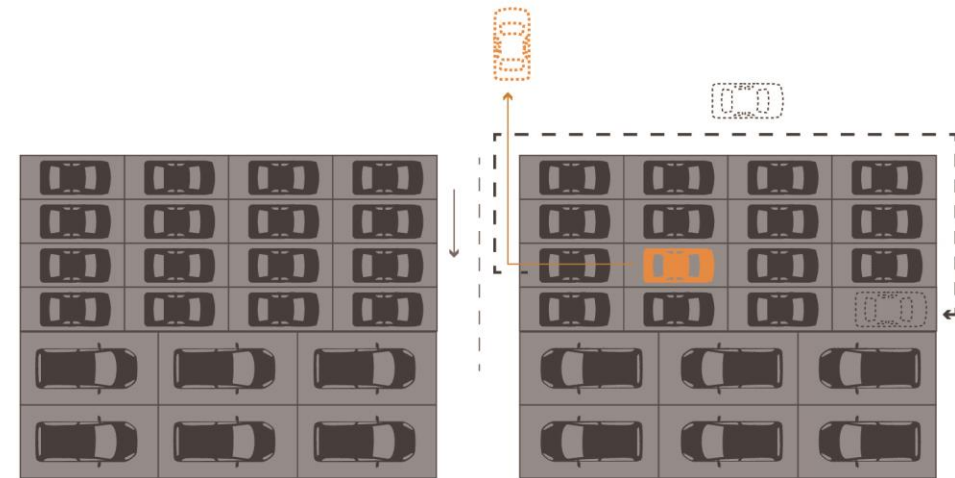

Autonomous parking

with temporary standing lane

parking stall space 16 m^2

without temporary standing lane
- cruise the island

parking stall space 12.5 m^2

Source: <http://www.arrowstreet.com/portfolio/autonomous-vehicles/>

Assembly Row, Somerville, MA

Driverless vehicles storage is packed in hyper-efficient rows on the top level. Garage designed for autonomous for self-parking vehicles can substantially increase their efficiency and use **60% less space**.

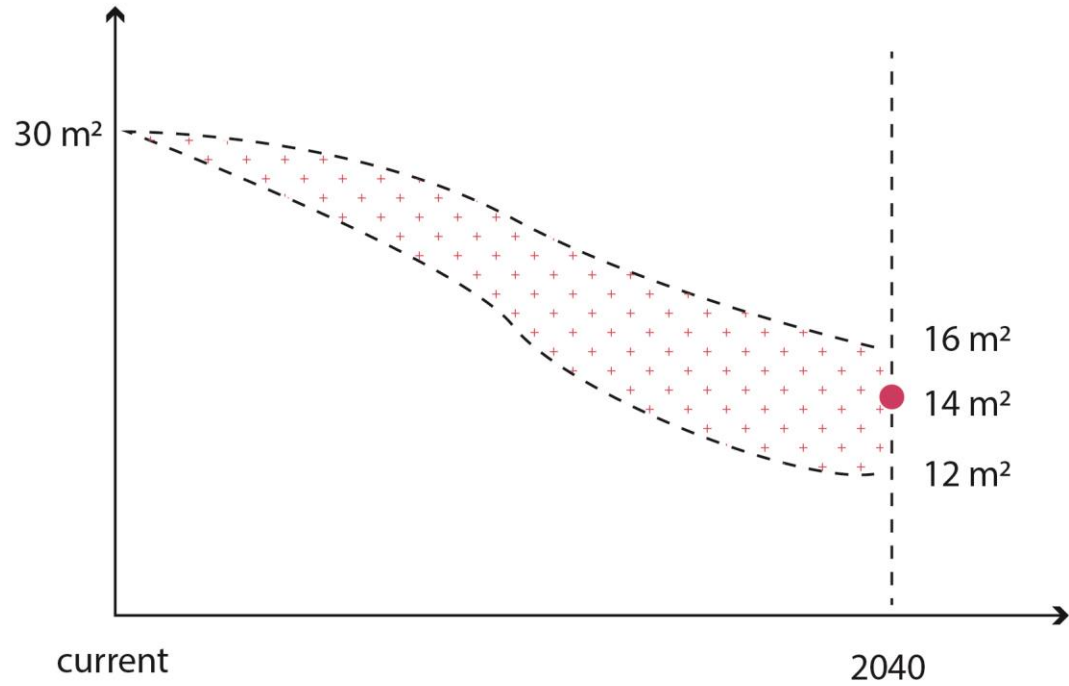

Source: Driverless future. A POLICY ROADMAP FOR CITY LEADERS

Assembly Row, Somerville, MA

The garage is expected to reduce parking square footage by 26%, with a mix of conventional and driverless cars. When the garage is used exclusively for driverless cars, parking square footage can be reduced by **up to 60%**.

Decrease of parking space

parking stall space
(with sharing space)

parking stall with temporary staging lane

Possible AV parking stall space

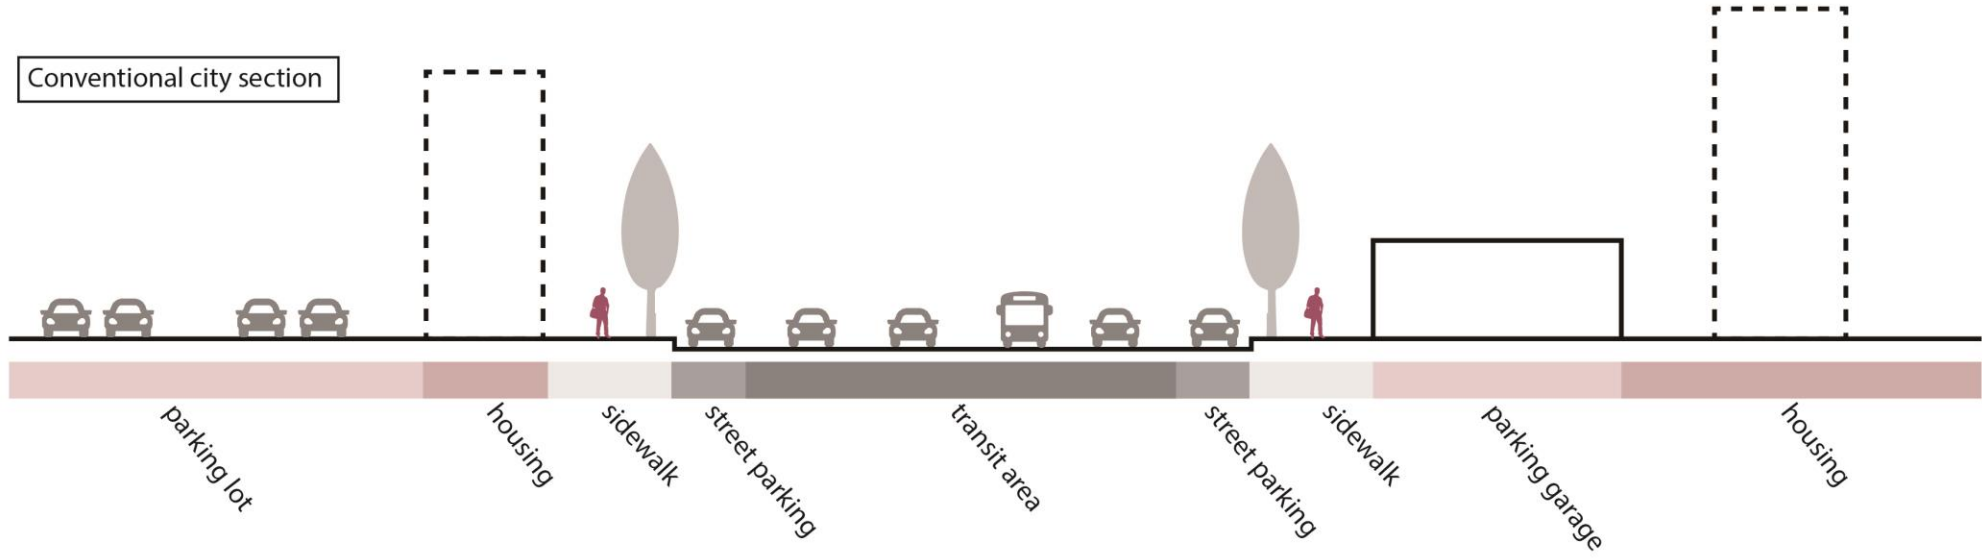

empirical AV parking garage design

14 m² per parking stall

Transform parking space

Conventional city section

Future city section with AV on road

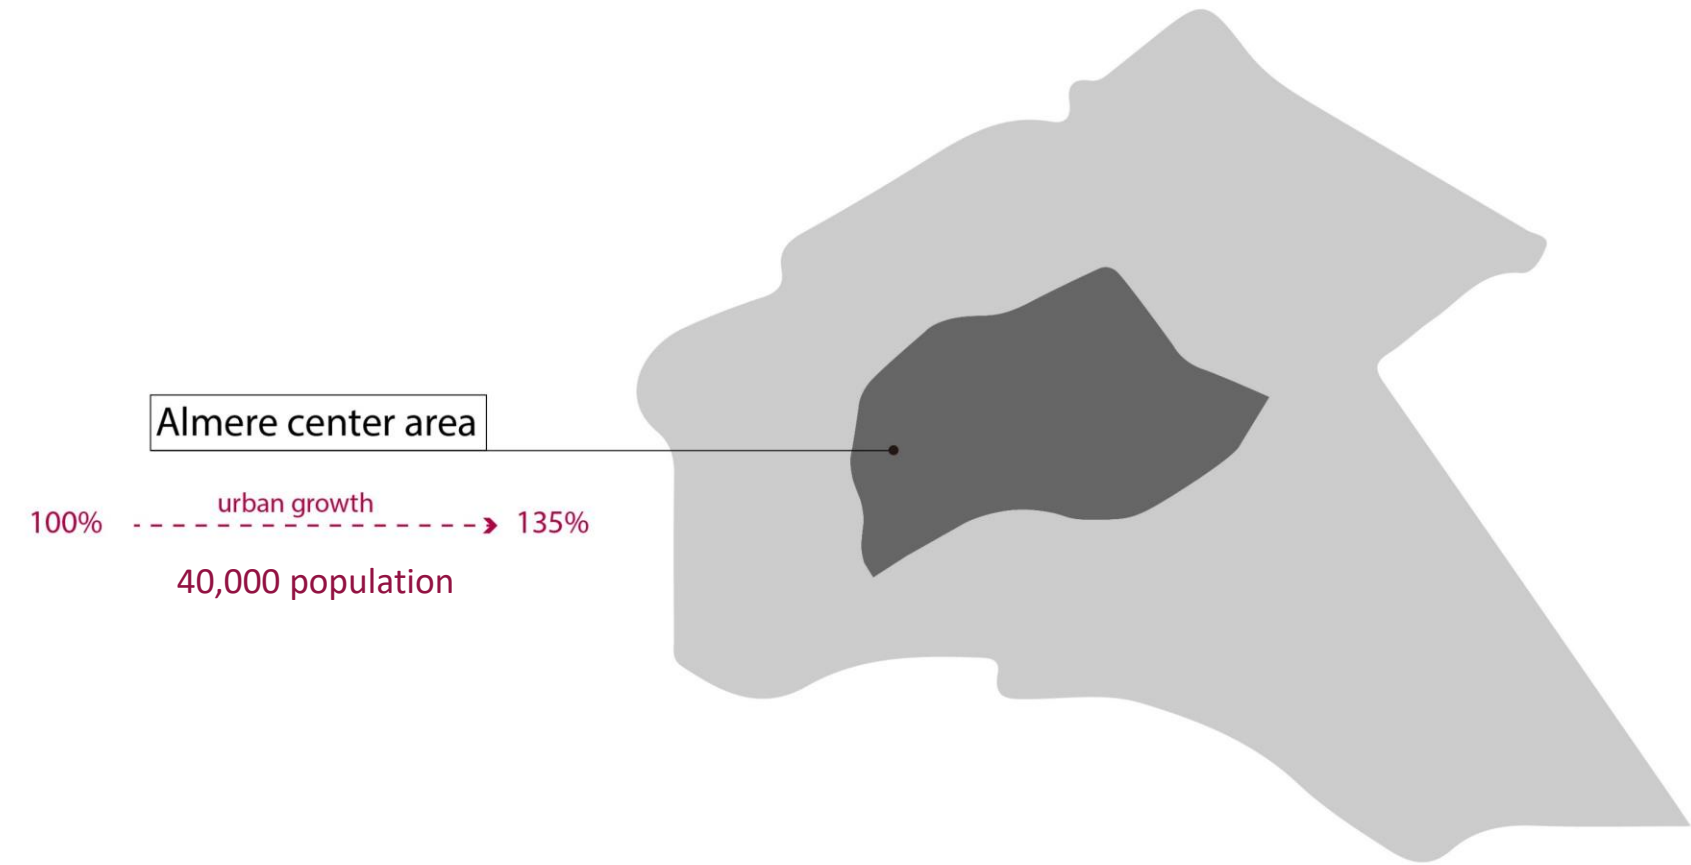

AVs would make parking no longer a nightmare

4

Compact Analysis

Automated Vehicles

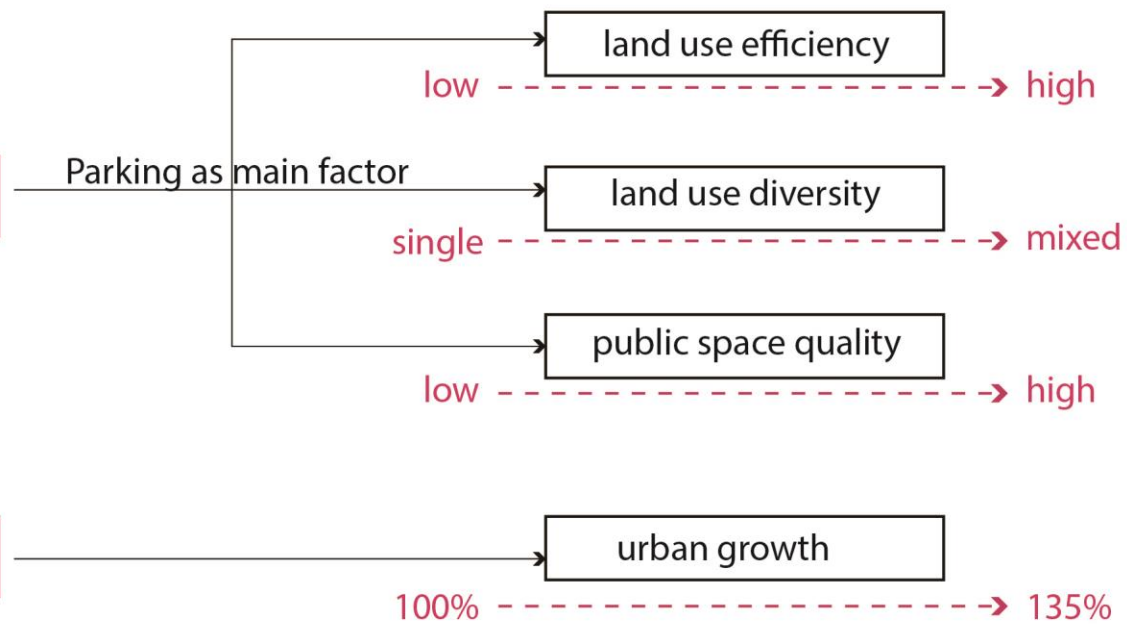

Parking revolution

Urban redevelopment

Compact city

Redevelop opportunity

community parking

parking lot in city center

green space in low quality

campus neighborhood

community centre

community border

business district

industry area

highway area

street parking

Redevelop opportunity

Legend

City center

- parking in city center
- business area
- green space in low quality
- mixed-use city center

Community

- community parking
- community center
- mix border
- campus neighborhood
- community living
- industrial area
- highway

Calculation for population growth

Design base	Redevelop type	Current space			
almere central	d-01 parking lot	16805	d-46 community center	8147	
	d-02 parking lot	13841	d-47 green space-low quality	3437

Calculation for population growth

Main Category	Current space (sq m)	Redevelop percentage	Numbers of floor	Redevelop space in surface	Redevelop density (per sq m)	Possible population growth
Parking lot in center	62588	50%	3	31294	0.033	1043
Parking garage in center	8664	100%	5	8664	0.111	963
Community parking	96712	50%	3	48356	0.033	1612
Green space in low quality	437094	30%	5	131128	0.033	4371
Community center	397377	20%	3	79475	0.013	1060
Mix border	1004107	35%	5	351437	0.039	13667
Campus neighborhood	724460	20%	3	144892	0.013	1932
Industrial area	3390004	15%	7	508501	0.023	11865
Business area	214547	30%	5	64364	0.033	2145
Highway area	812025	20%	7	162405	0.031	5053
Total	7147578			1530517		43710

AVs would contribute to redevelop parking space and urban blocks

5

Design AV Parking System

Calculation for future AV parking space

	Population in Almere center area	Car owner ship	Space for parking unit	
Current (2018)	110,000	0.37 conventional car per people	30 m ² for conventional car	
	↓ increase to 135%	↓ decrease to 35%	↓	
Future (2040)	148,500	0.16 AV per people	14 m ² for AV	Future AV parking space 333,000 m ²

AV parking system

Total AV parking space
333,000 m²

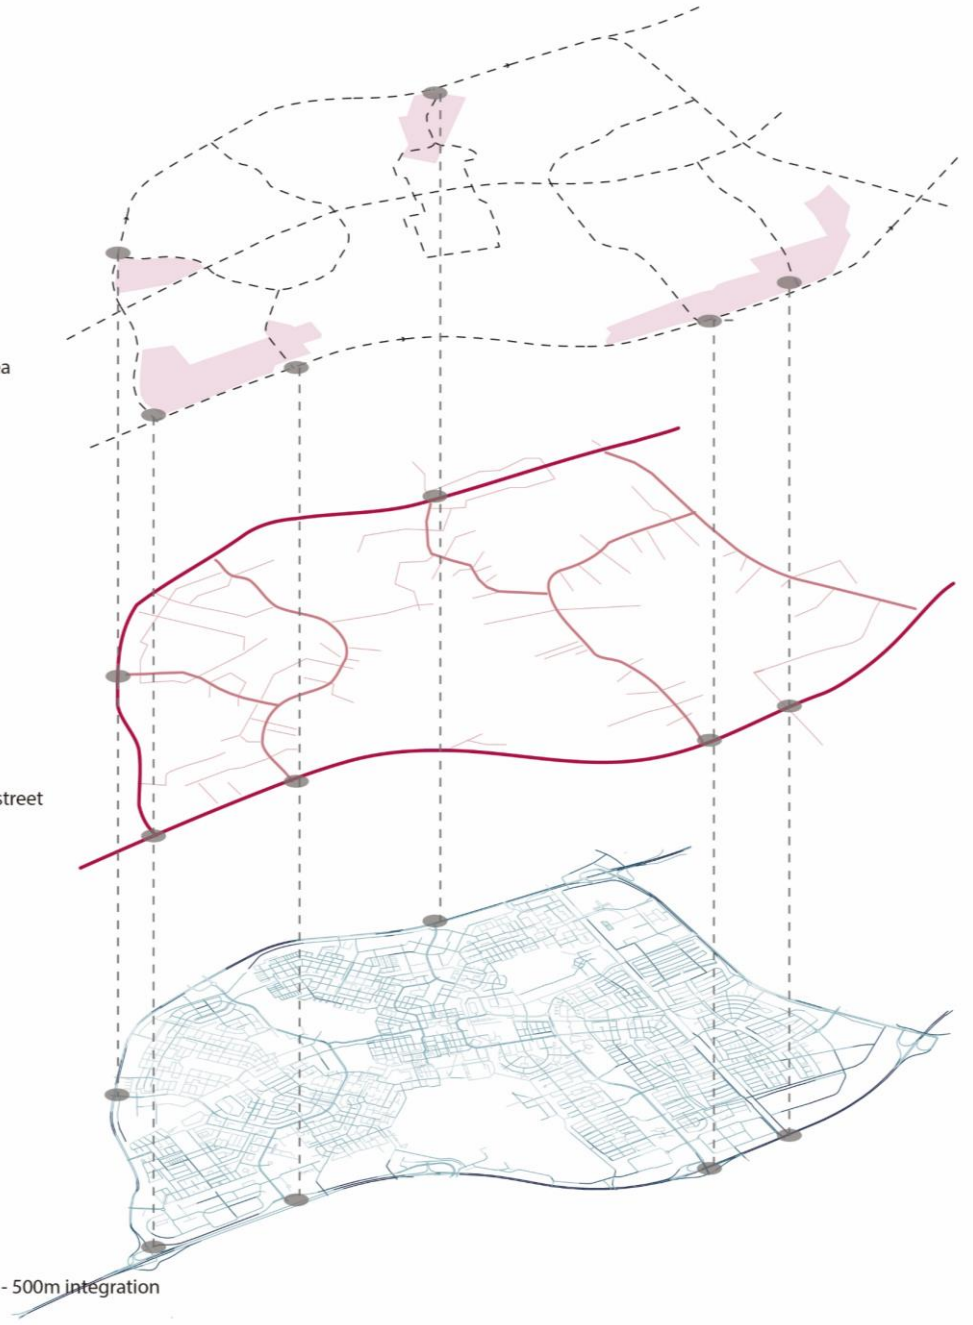

Potential spots for AV parking garage

Almere center - industry area

Almere center main transit street

Almere center space syntax - 500m integration

Scheme for AV garage in periphery

-  potential AV garage position
-  current industrial area
-  design area
-  main transit street
-  traffic dispersion flow

To place 166,500 m² AV parking garage

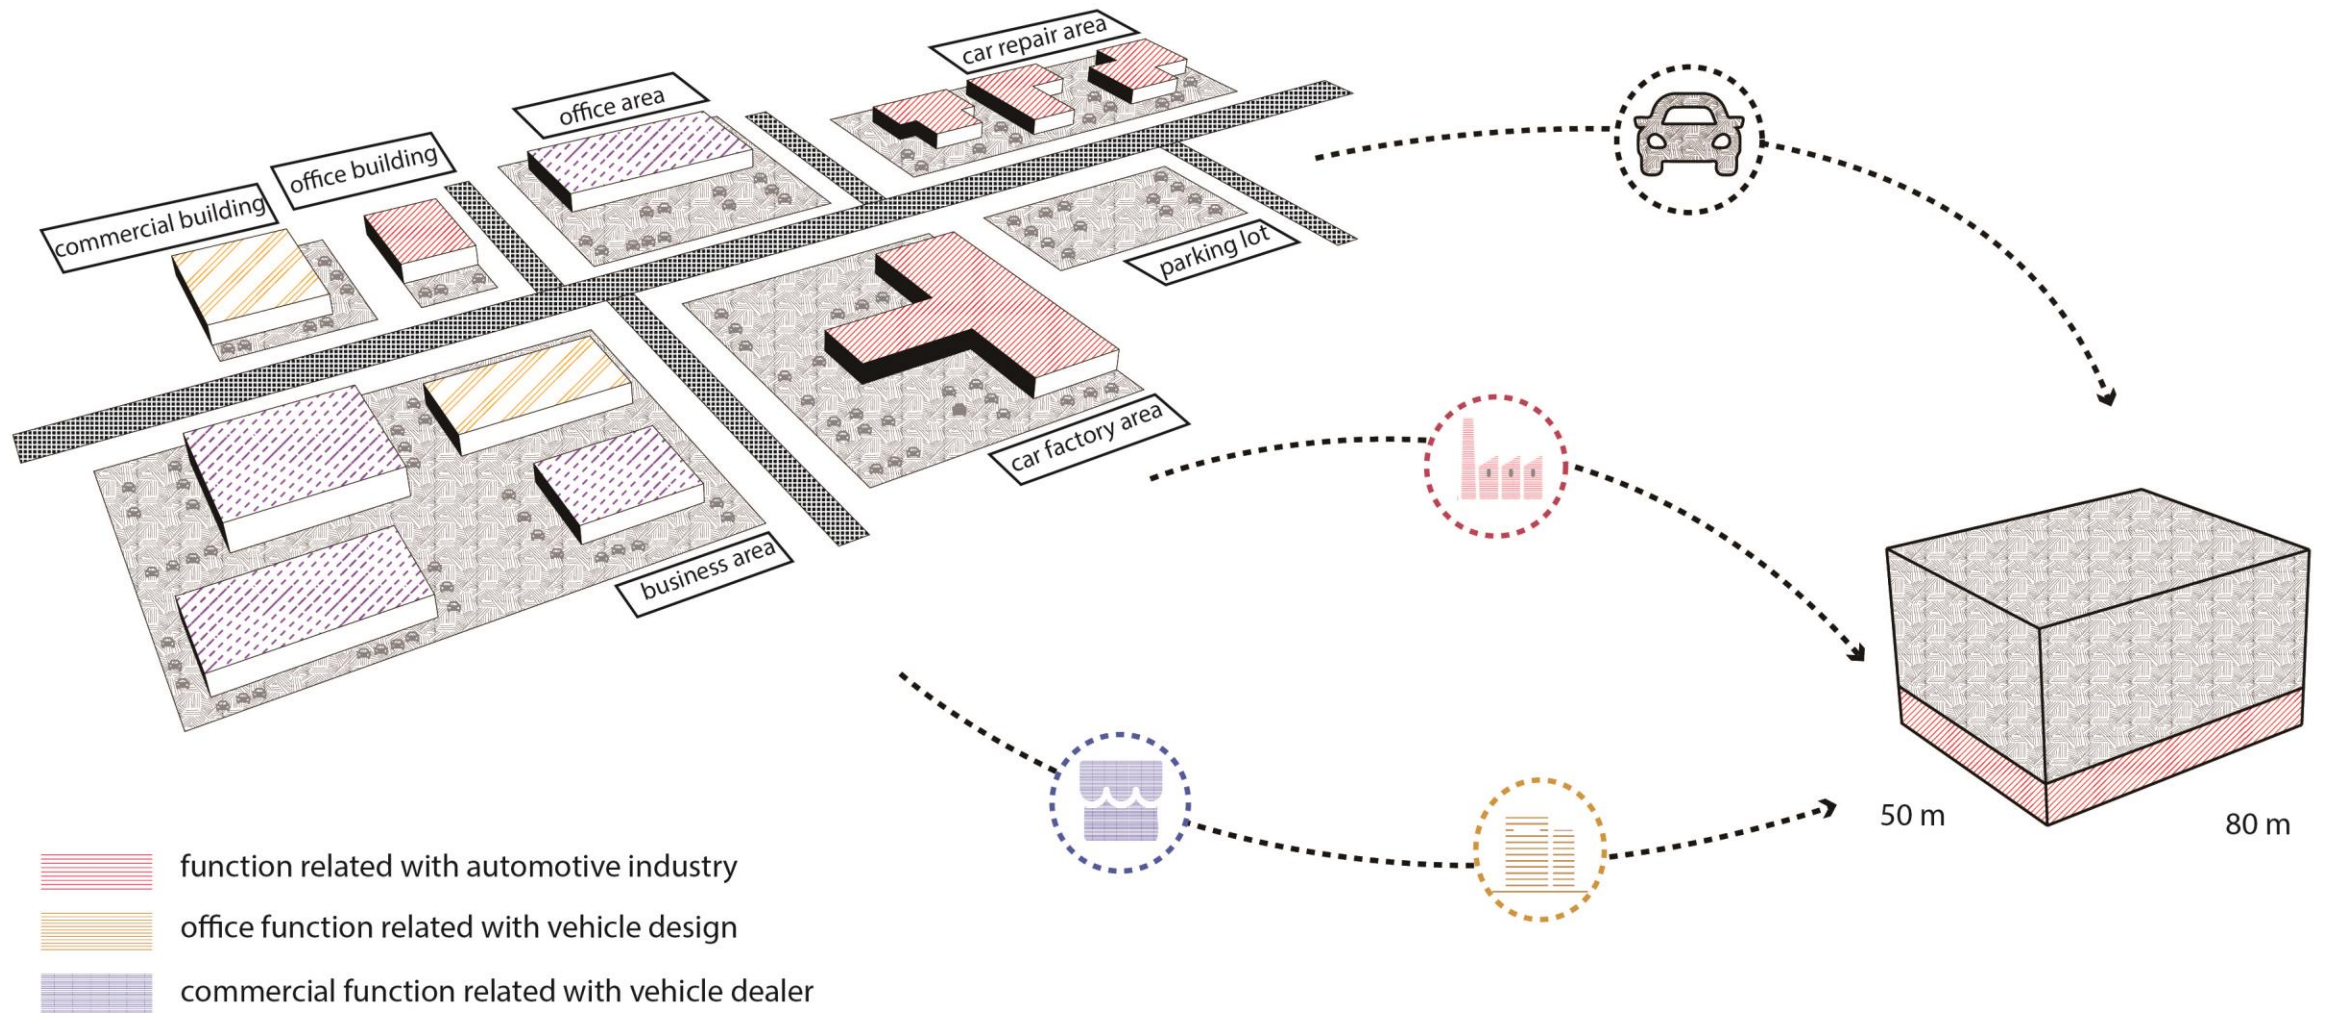

4000 m² floor area in average

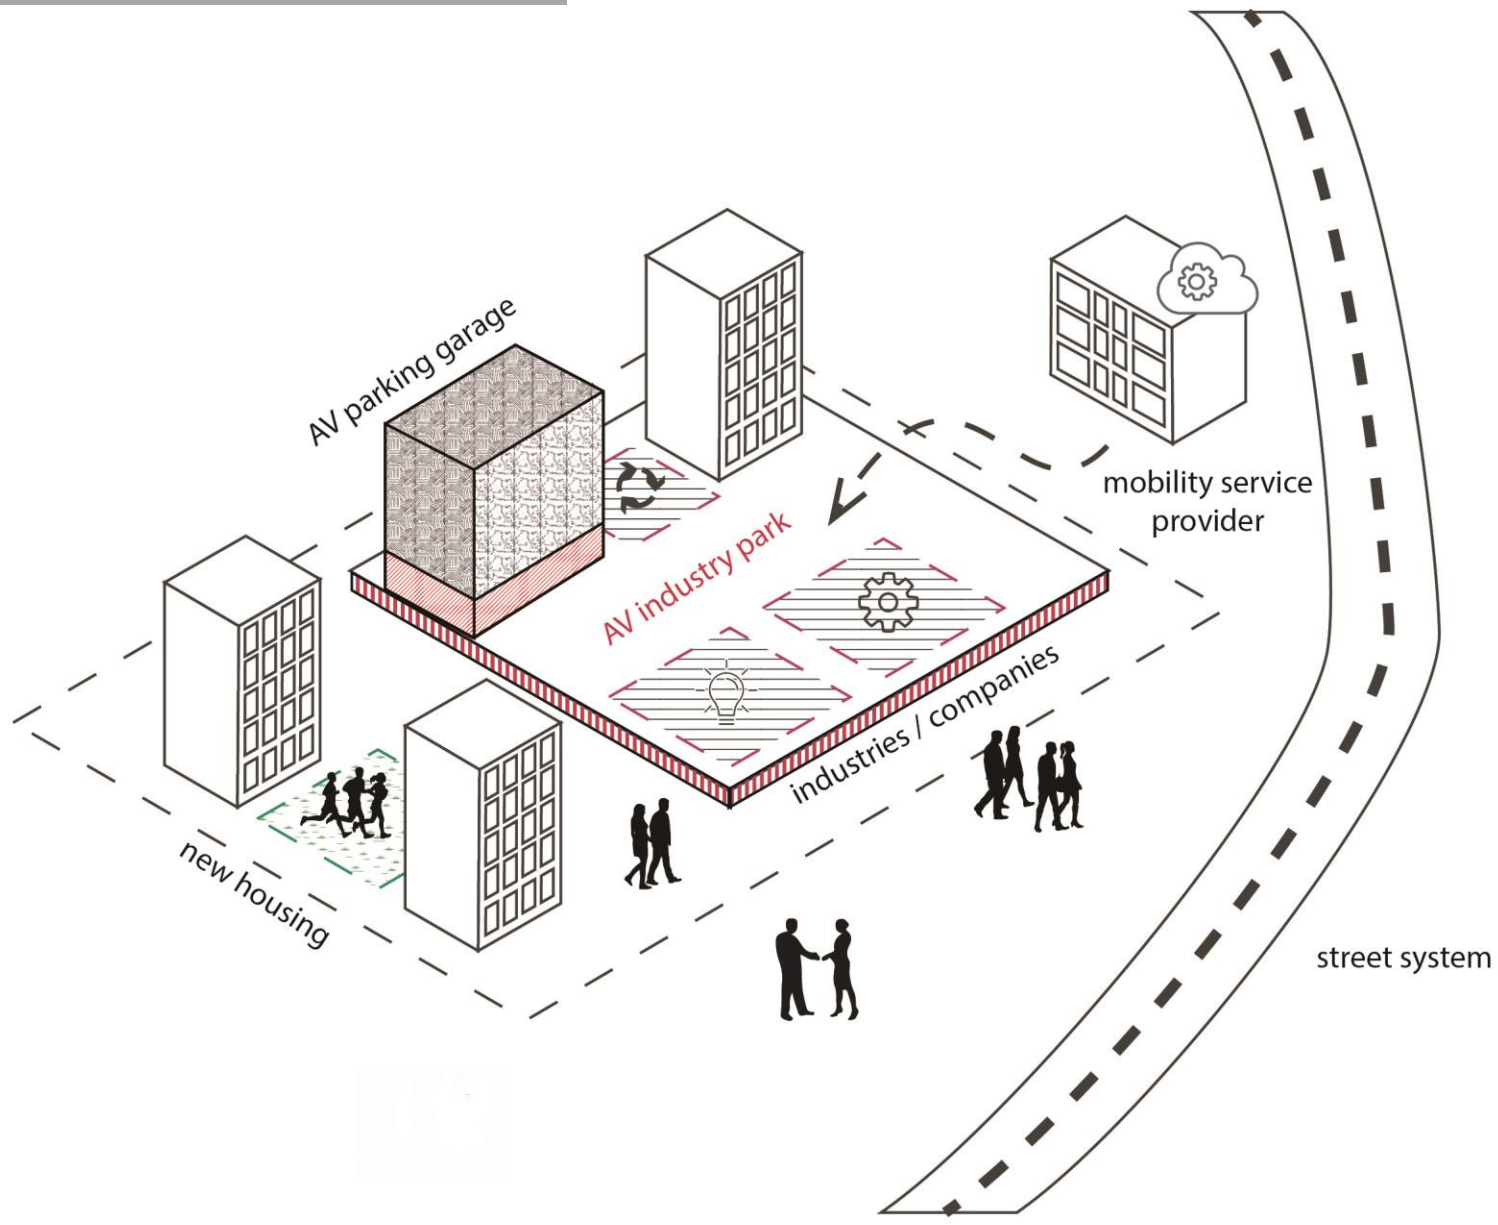

Automotive industry transformation

Automotive industry transformation

Scheme for AV industry park

- replacement of current parking function and automobile production

- appearance of the new industrial chain for automated vehicles

- involvement of mobility service provider

- compact development for housing project

AV floor parking in community

-  potential AV floor parking position
-  Stedenwijk neighborhood

Total AV floor parking in Almere center communities
133,000 m²

↓ Population percentage 9.5%

To place 12,600 m² AV floor parking in design area

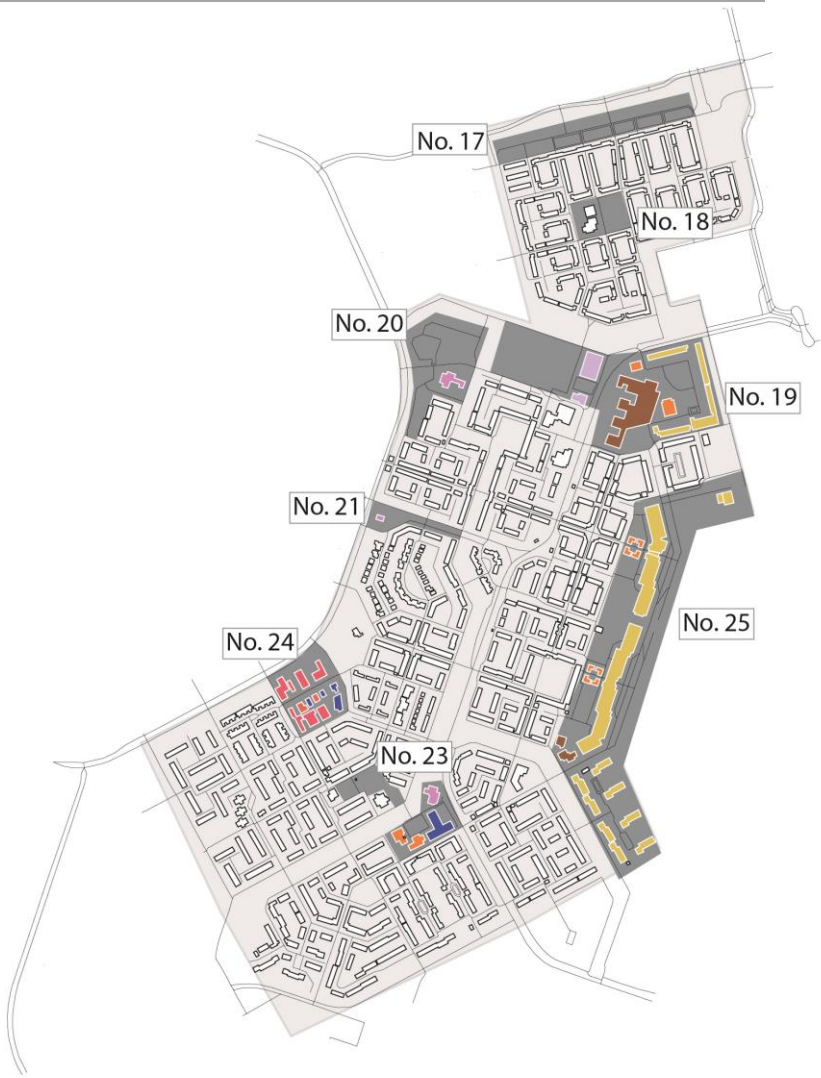

↓
126 m

↓
mixed-use building

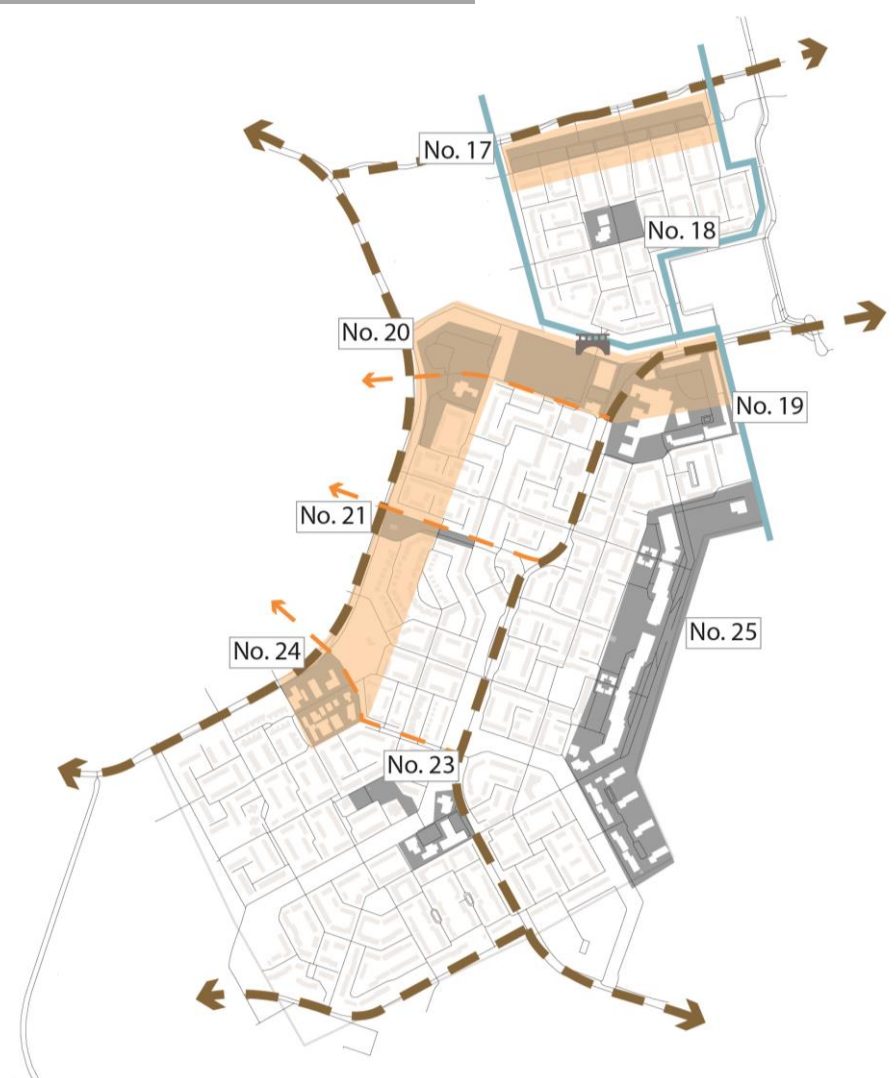

Function analysis of redevelop blocks

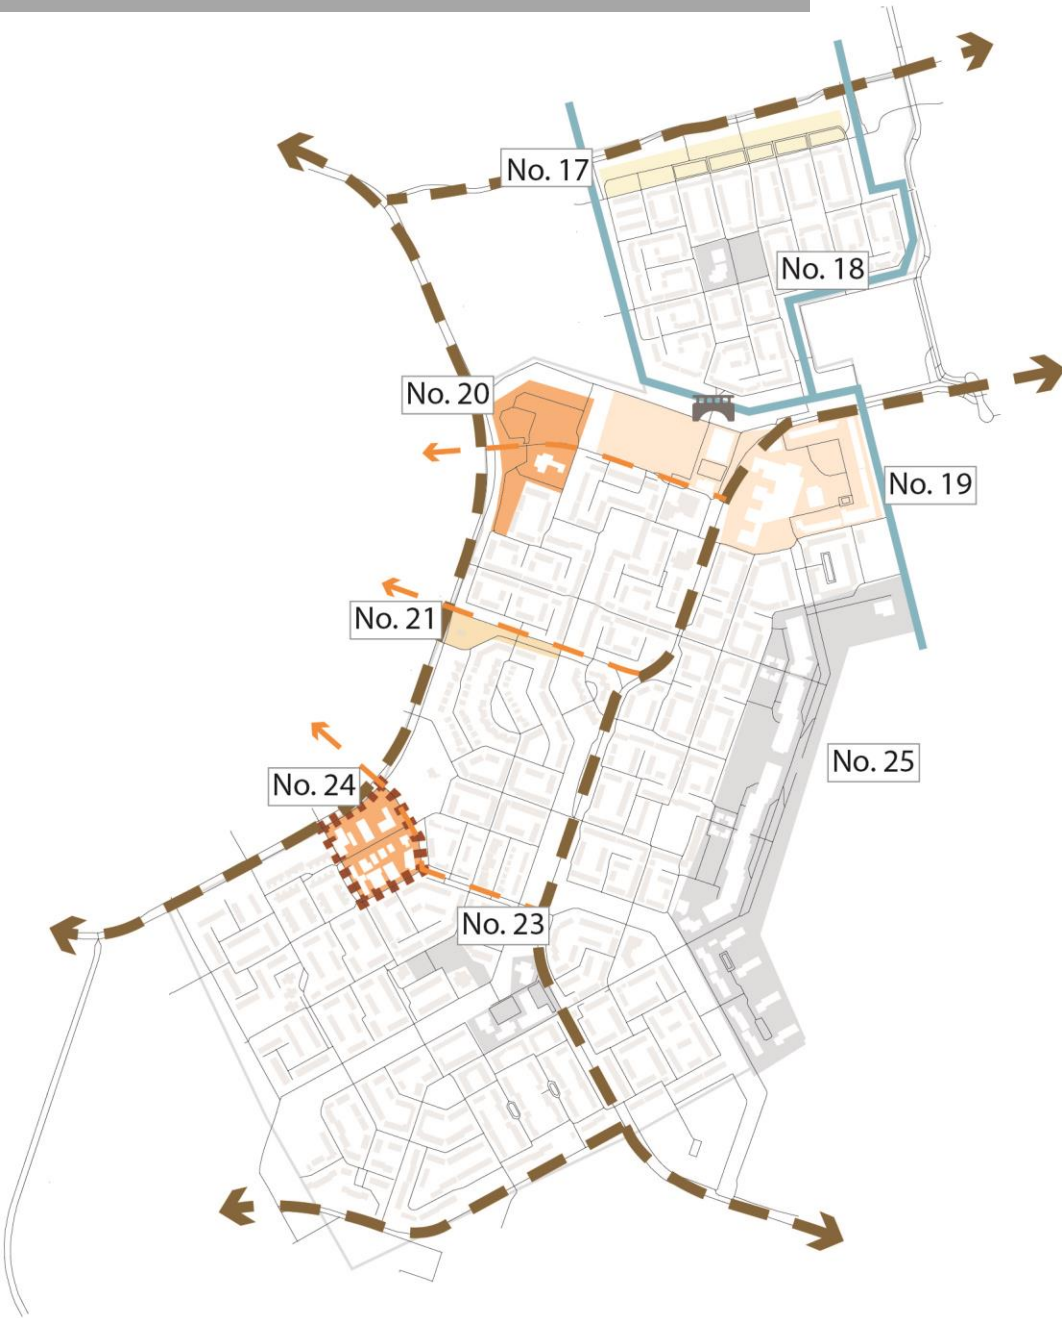

- residential function
- multiple public function
- educational function
- healthcare function
- industrial function
- shops function
- office function
- sports function

Traffic condition analysis

- ← main street - neighborhood access →
- internal street - local access
- basic street system
- canal system
- bridge
- redevelop block
- high value area for traffic efficiency

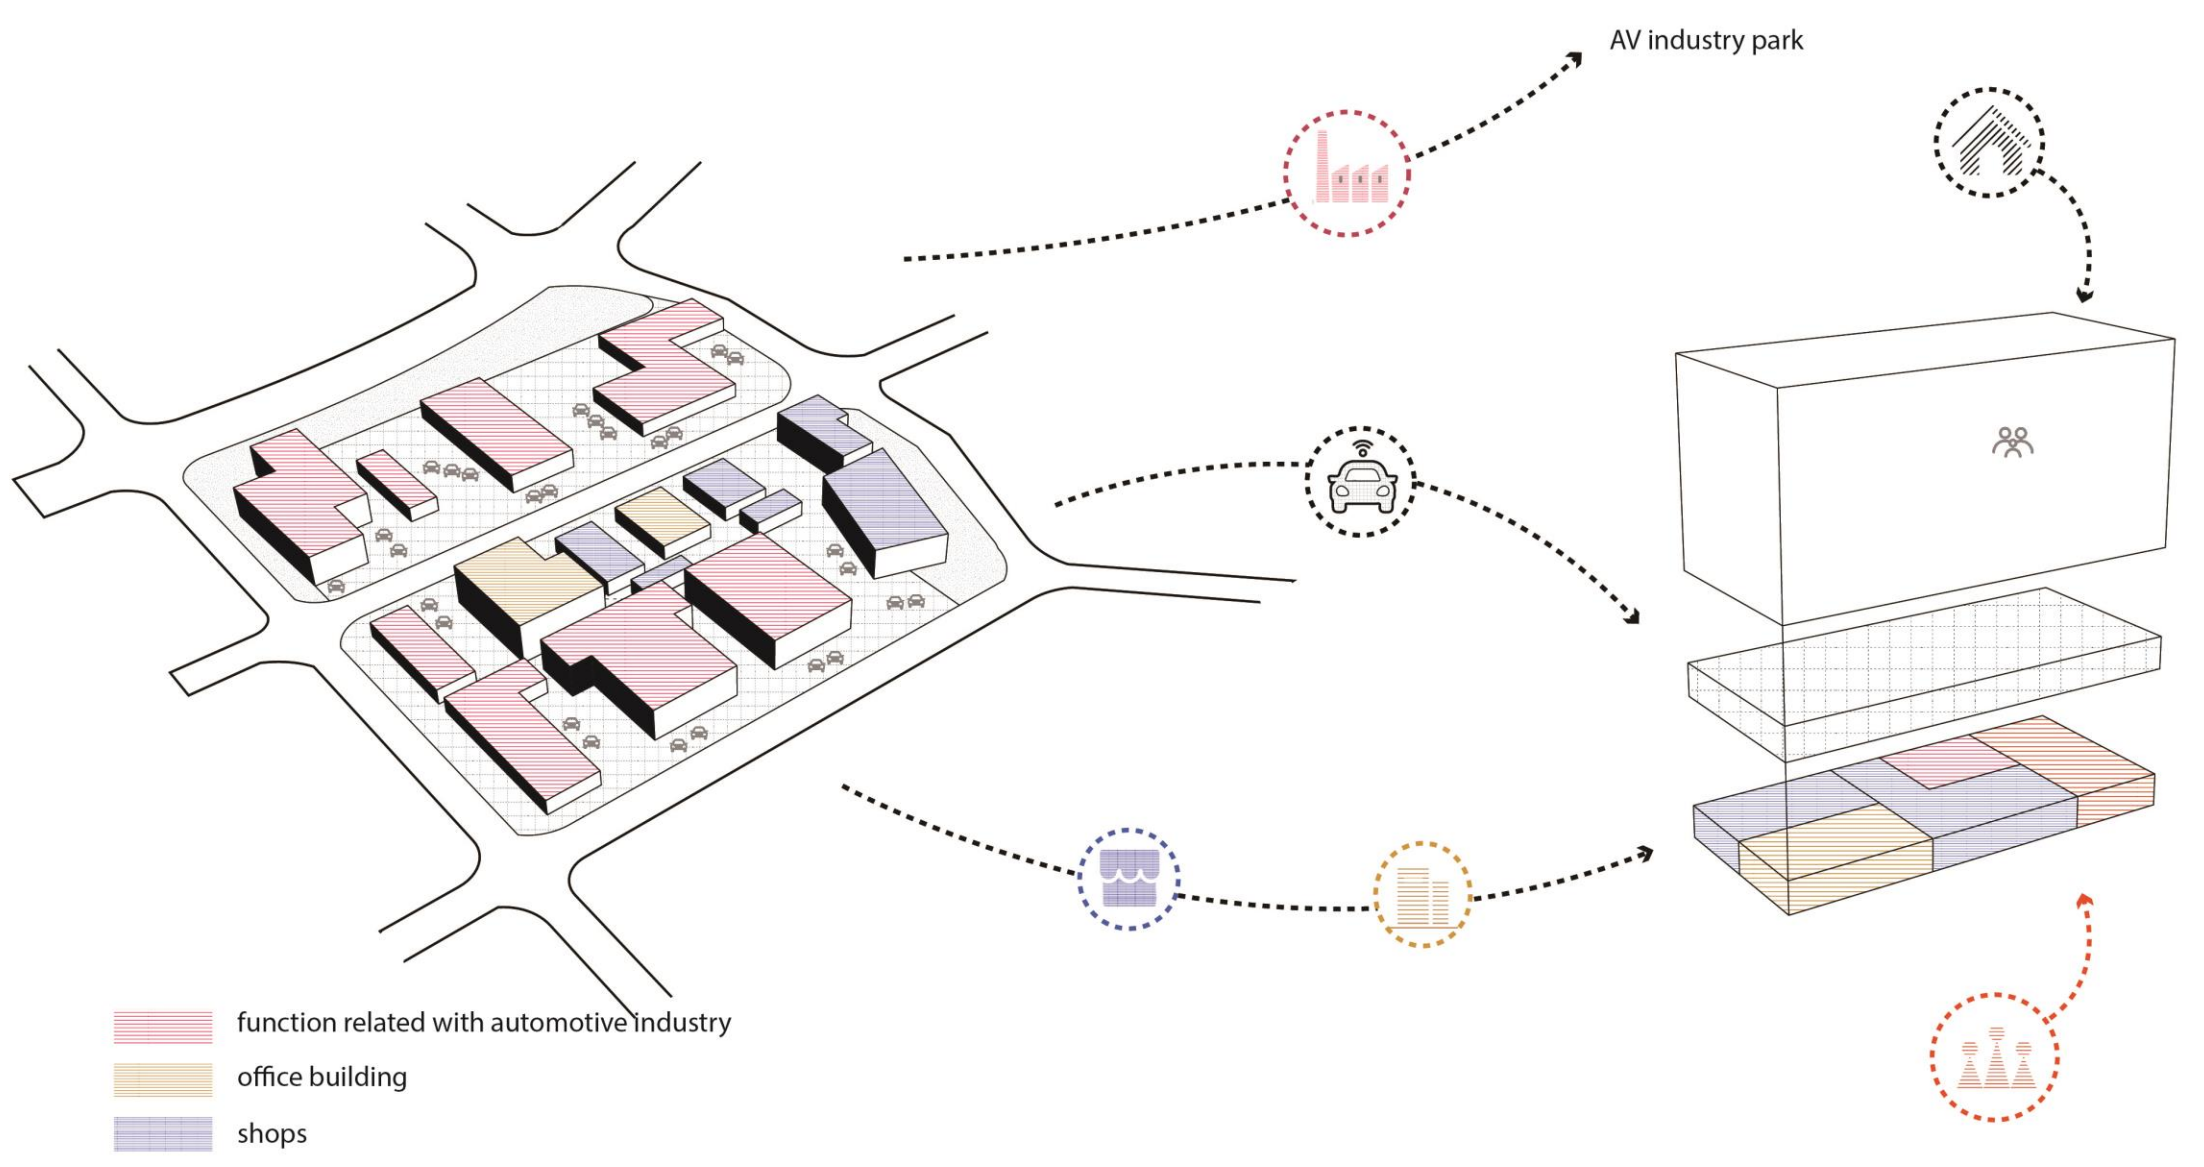

Possible position for AV floor parking

	Service range	Current function	Redevelop space for building surface (m ²)
No. 24 mix border			20000 * 35% = 7,000
No. 20 mix border			26000 * 35% = 9,100
No. 21 community parking			5000 * 50% = 2,500
No. 19 mix border			83000 * 35% = 29,050
No. 17 community parking			12000 * 35% = 4,200

	main street - neighborhood access		value to place mixed-use building with AV floor parking
	internal street - local access		transform parking function
	basic street system		design area
	bridge		
	canal system		

Function transformation

Building function design

- | | | |
|---|--|---|

normal family housing | 
healthcare |

open ground floor
high value for ground activity

Mixed land use

residential function

- elderly housing
- house for disabled people
- normal family housing

mixed-use residential building with commercial function

- shops
- restaurant
- office
- start-ups

mixed-use residential building with public function

- health care
- education
- cultural center
- entertainment

Mixed land use

- Legend
-  mixed-use residential building with commercial function
 -  mixed-use residential building with public function
 -  residential building
 -  community pavements
 -  community open space

Traffic flow analysis

- Legend
-   AV traffic flow
 -   people flow
 -   freight traffic flow

Diverse indoor and outdoor activities
