The authors regret that the Standard Deviation (*SD*) for those who failed their challenge ( $n = 19,693$ ) was erroneously reported in the Abstract (page 1) and Table 2 of the Results section (page 6) as 3013 steps. The correct Standard Deviation that should have been reported there is 2993 steps. Furthermore, in the Results section under header 3.3 *Exploratory Analyses* (page 6) we erroneously state that exploratory analyses were performed on a subsample of 29,001 participants. The correct number that should have been reported there is 29,002

participants. The authors would like to apologise for any inconvenience caused.

### Declaration of competing interest

Erika Litvin Bloom is employed as Lead Scientist by WayBetter Inc. and receives salary support and stock options from the company.
