model 1:200 design in urban context

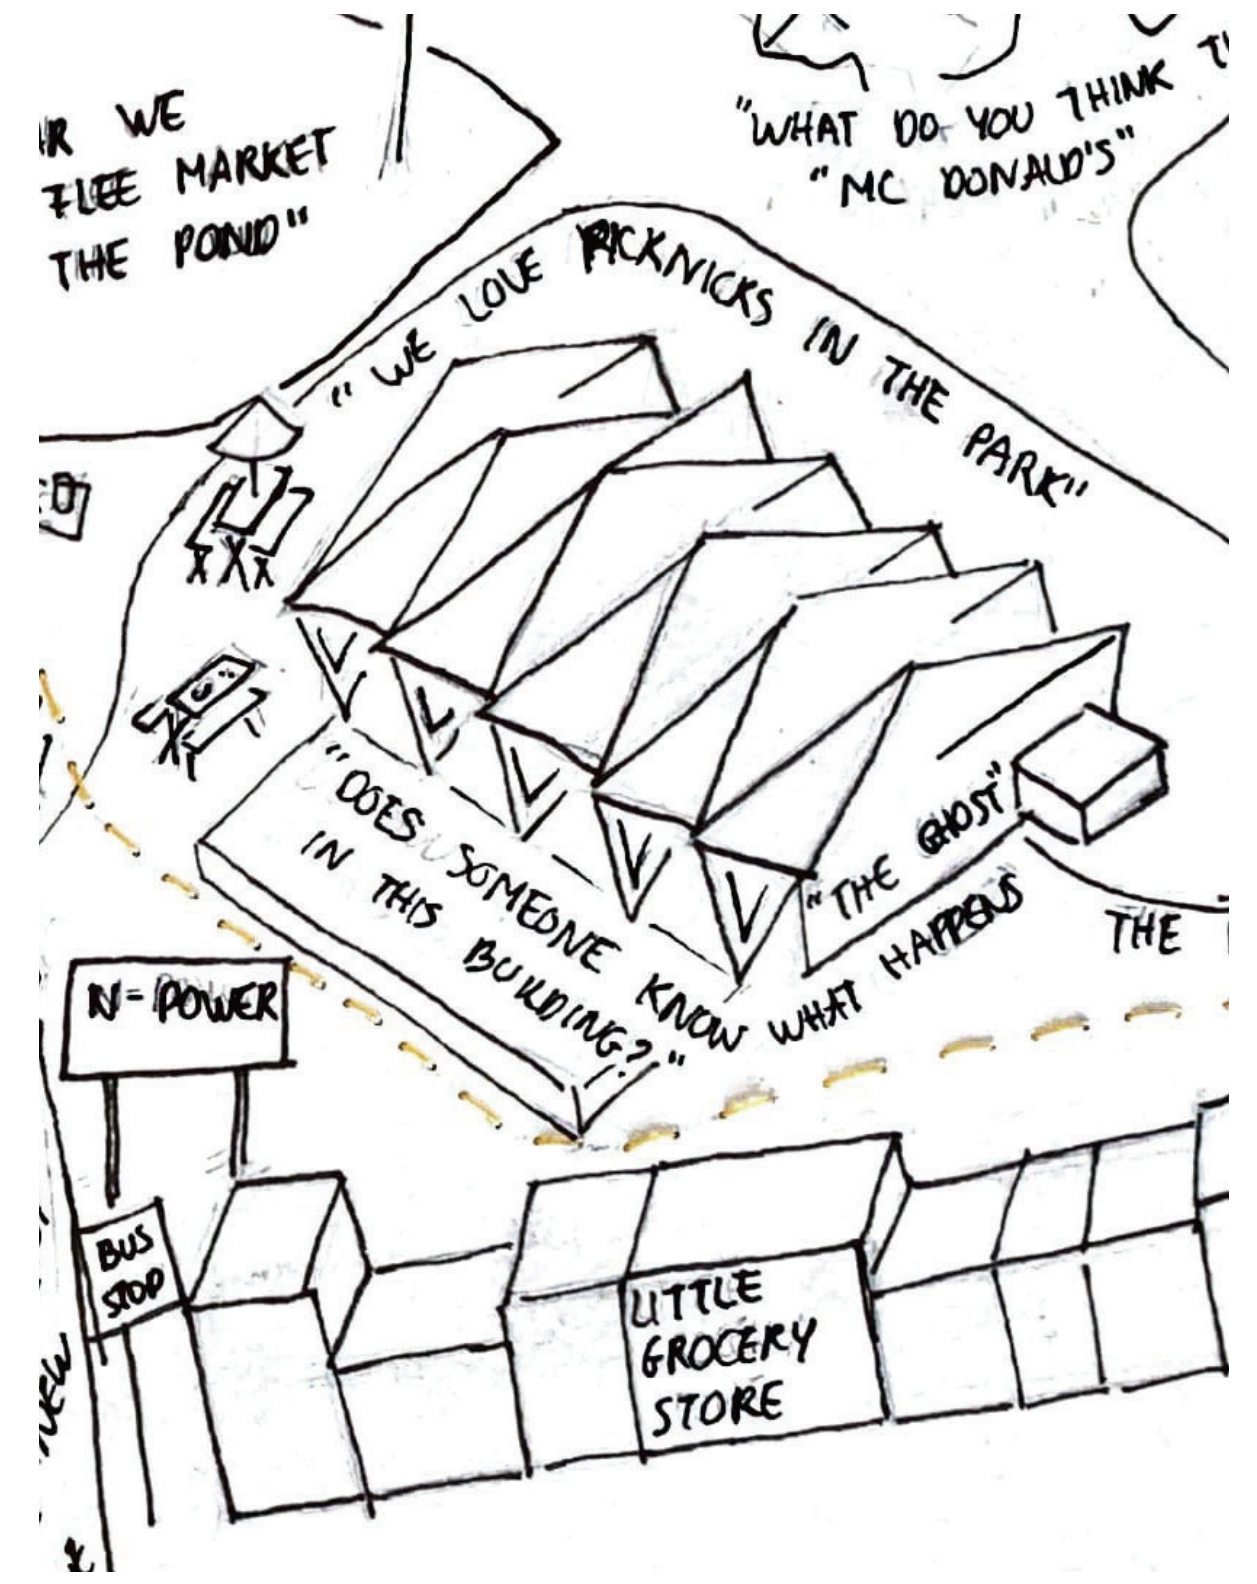

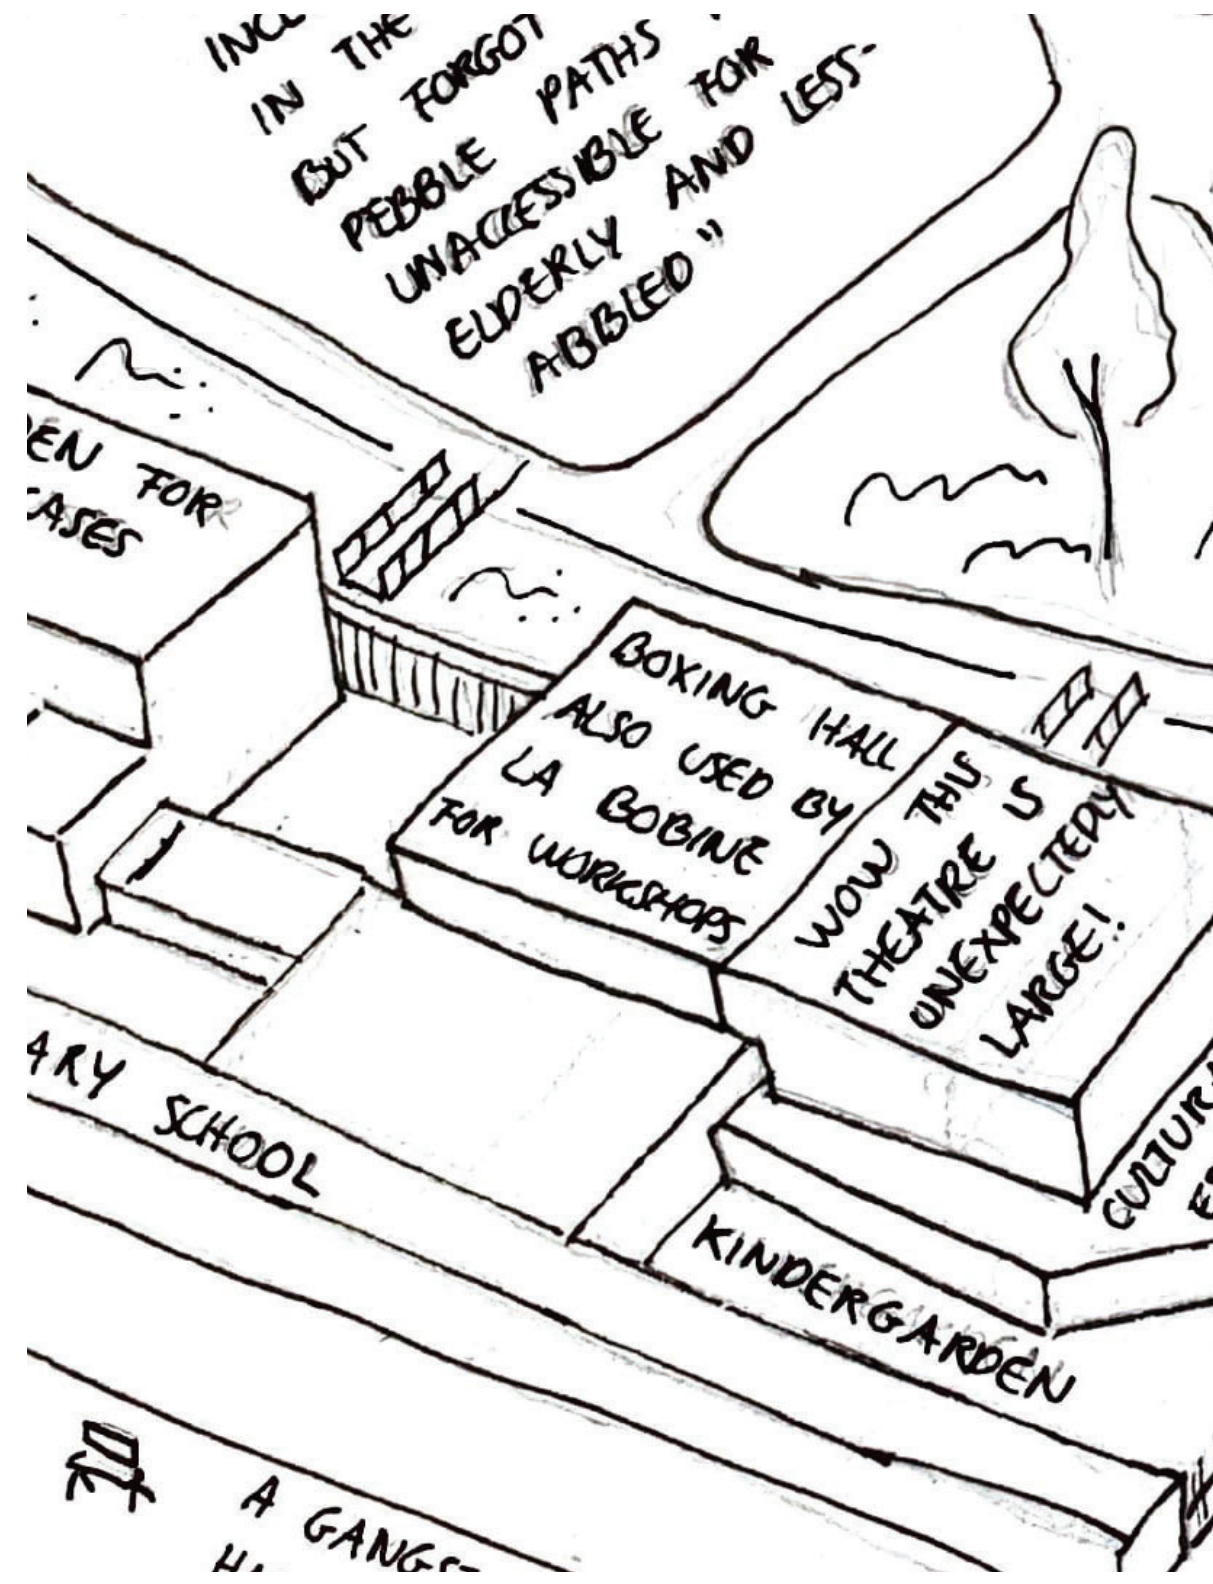

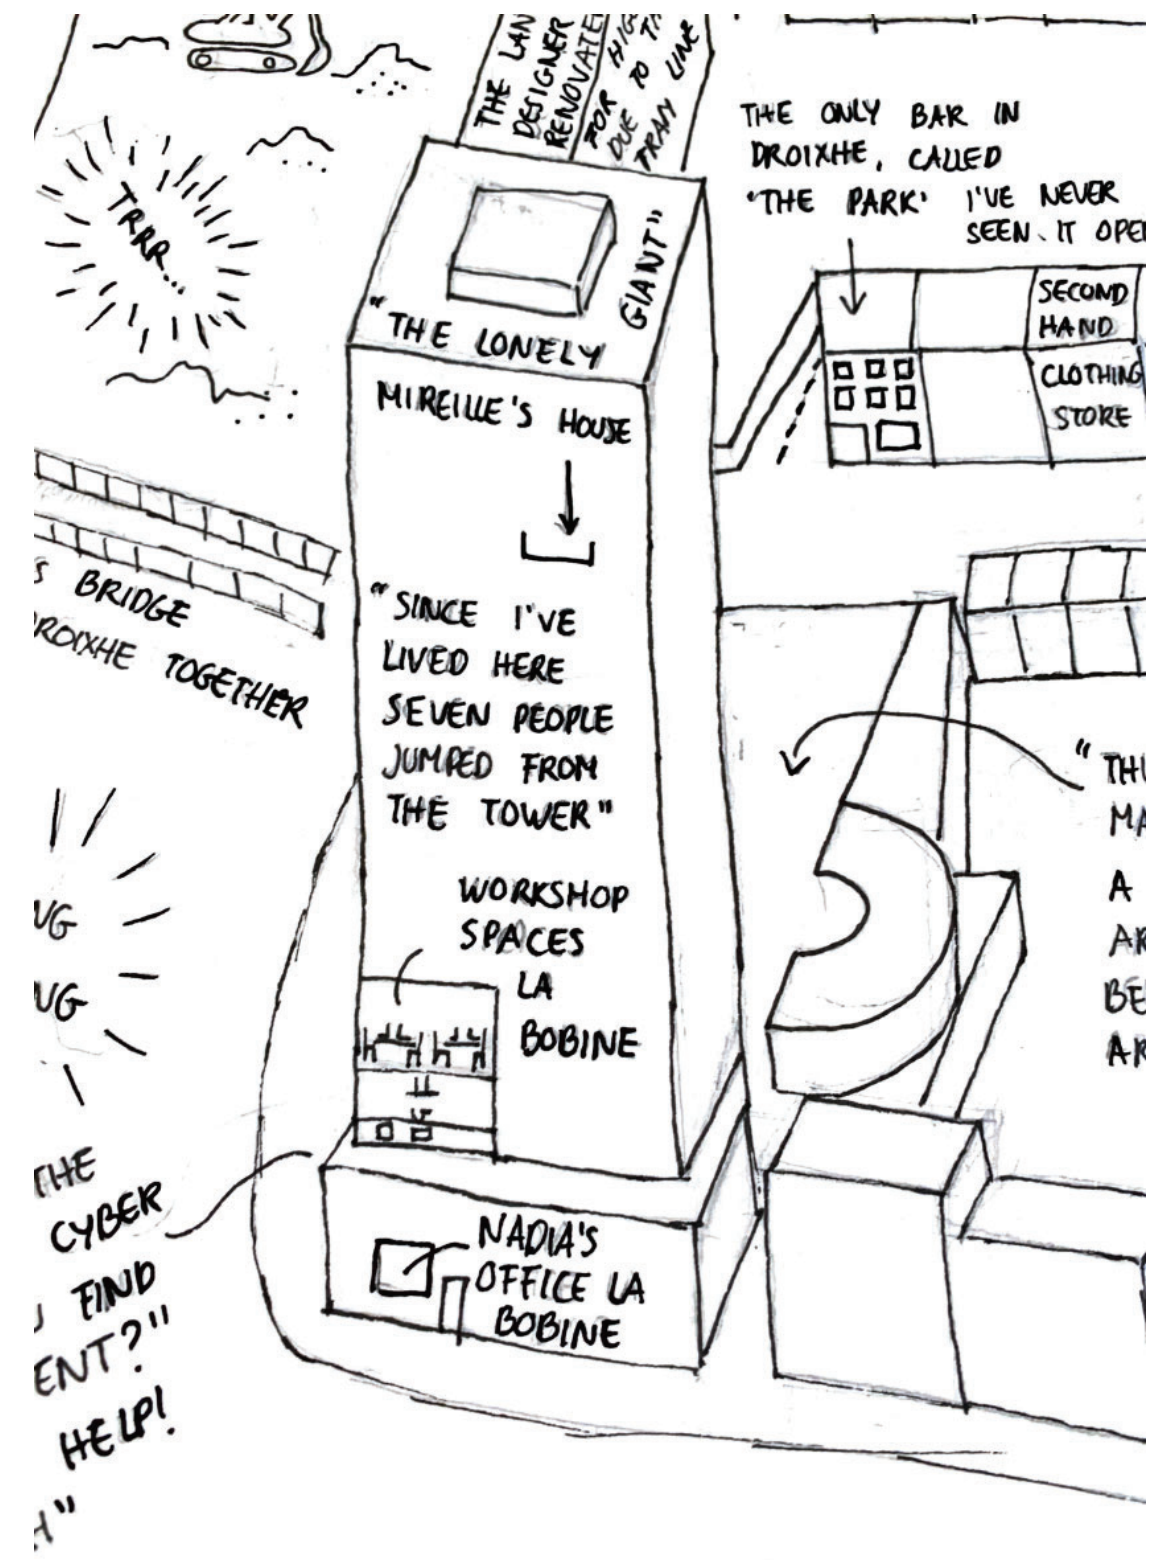

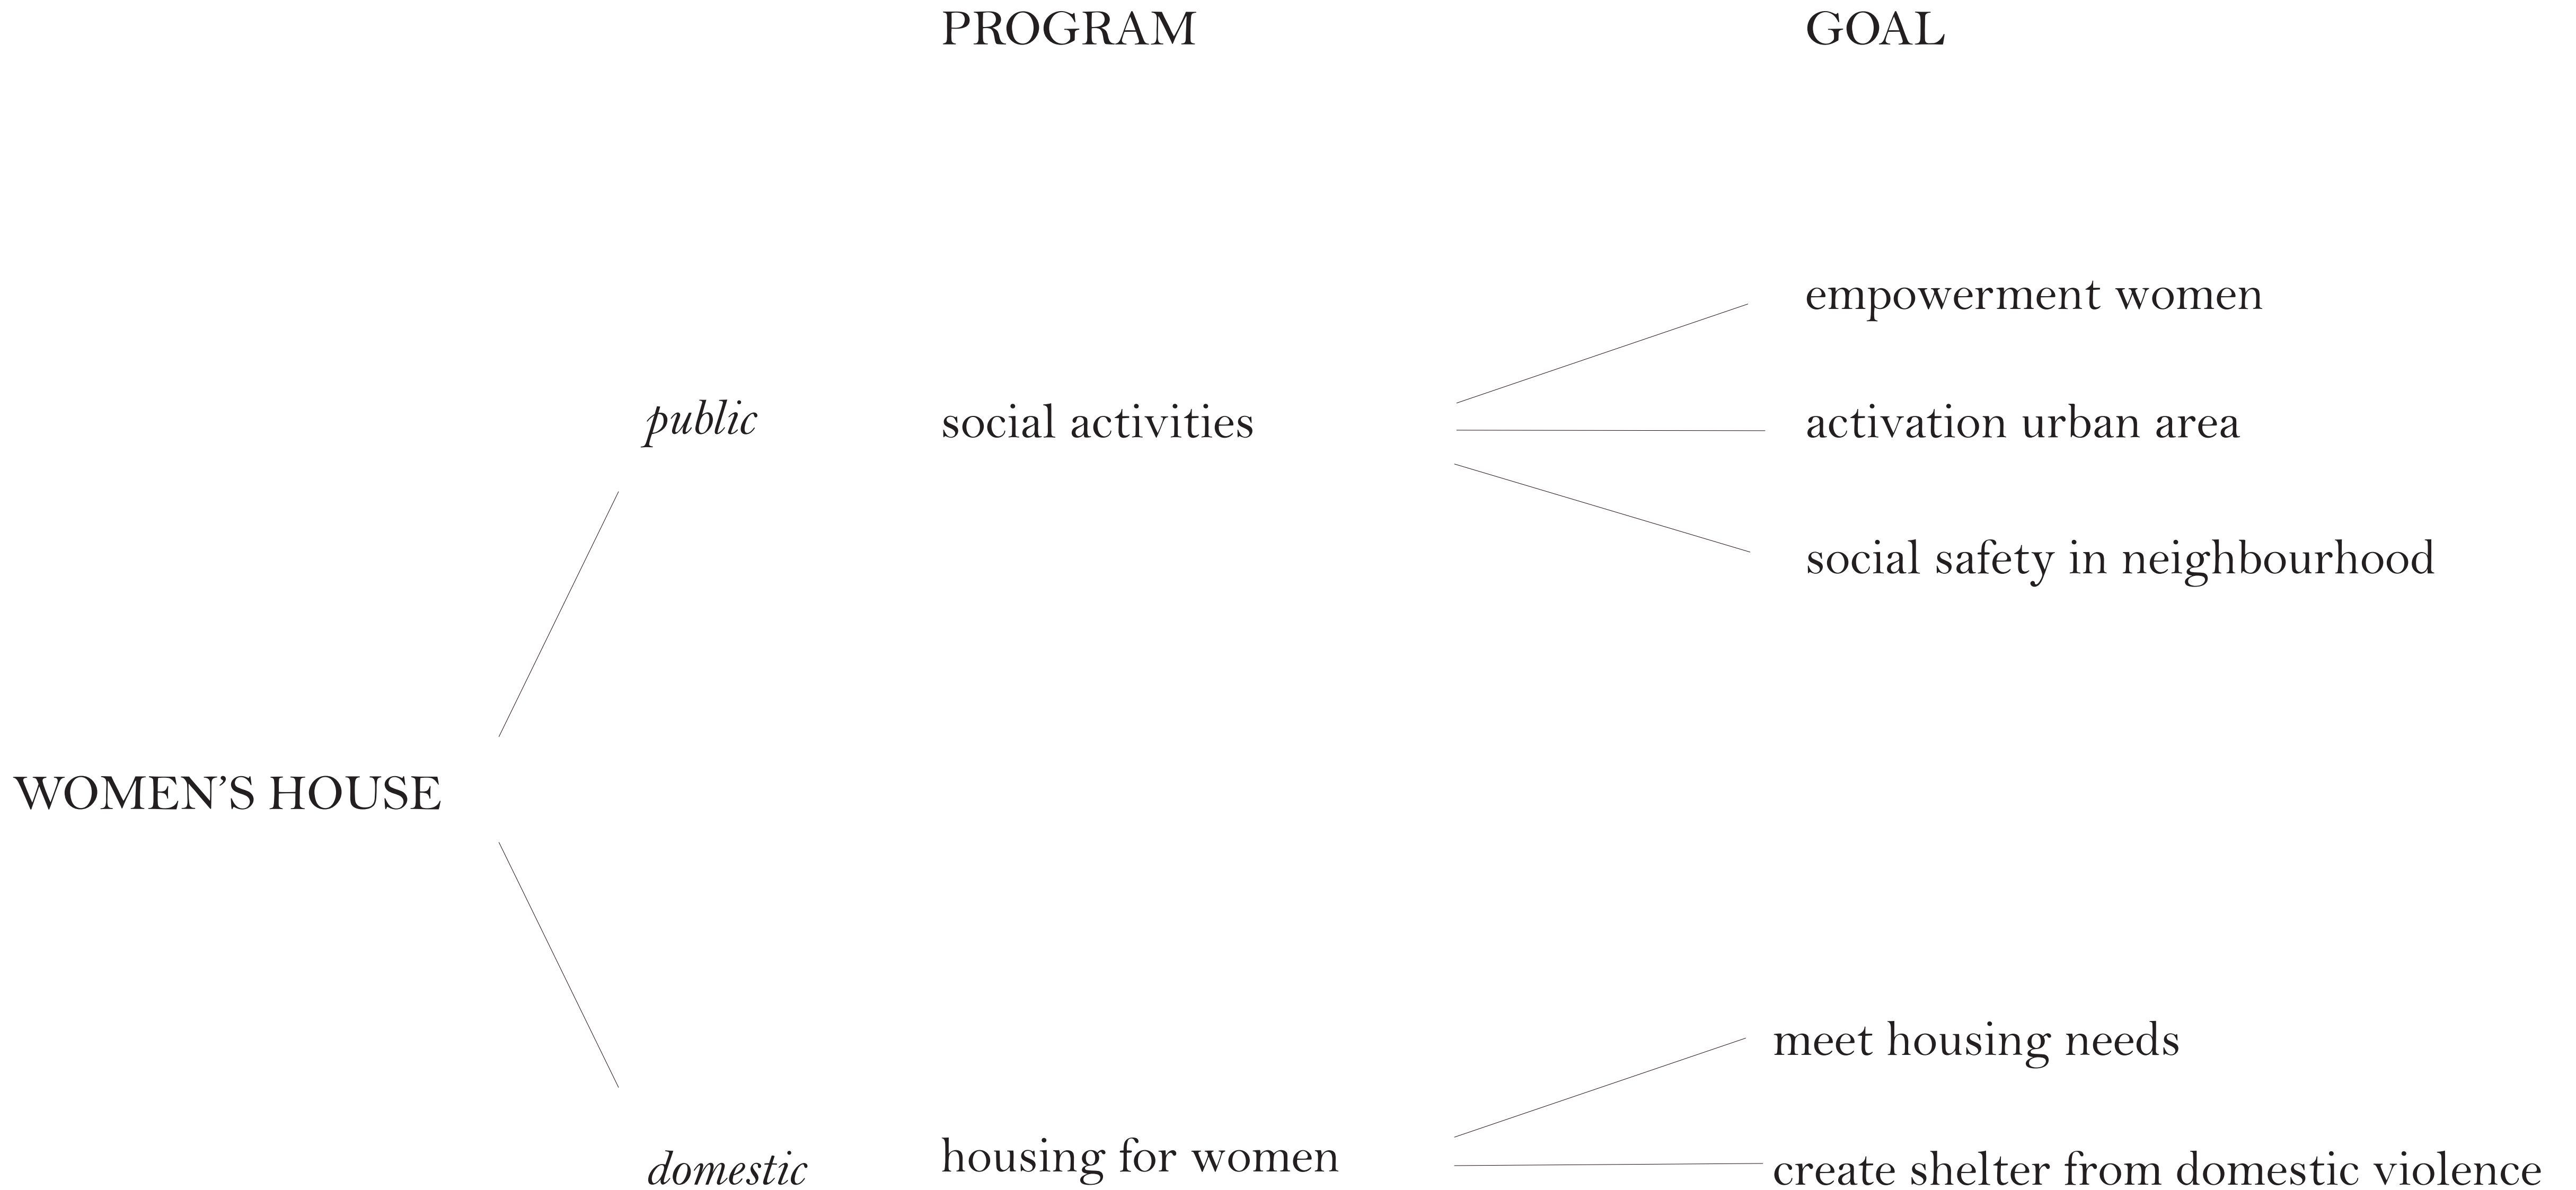

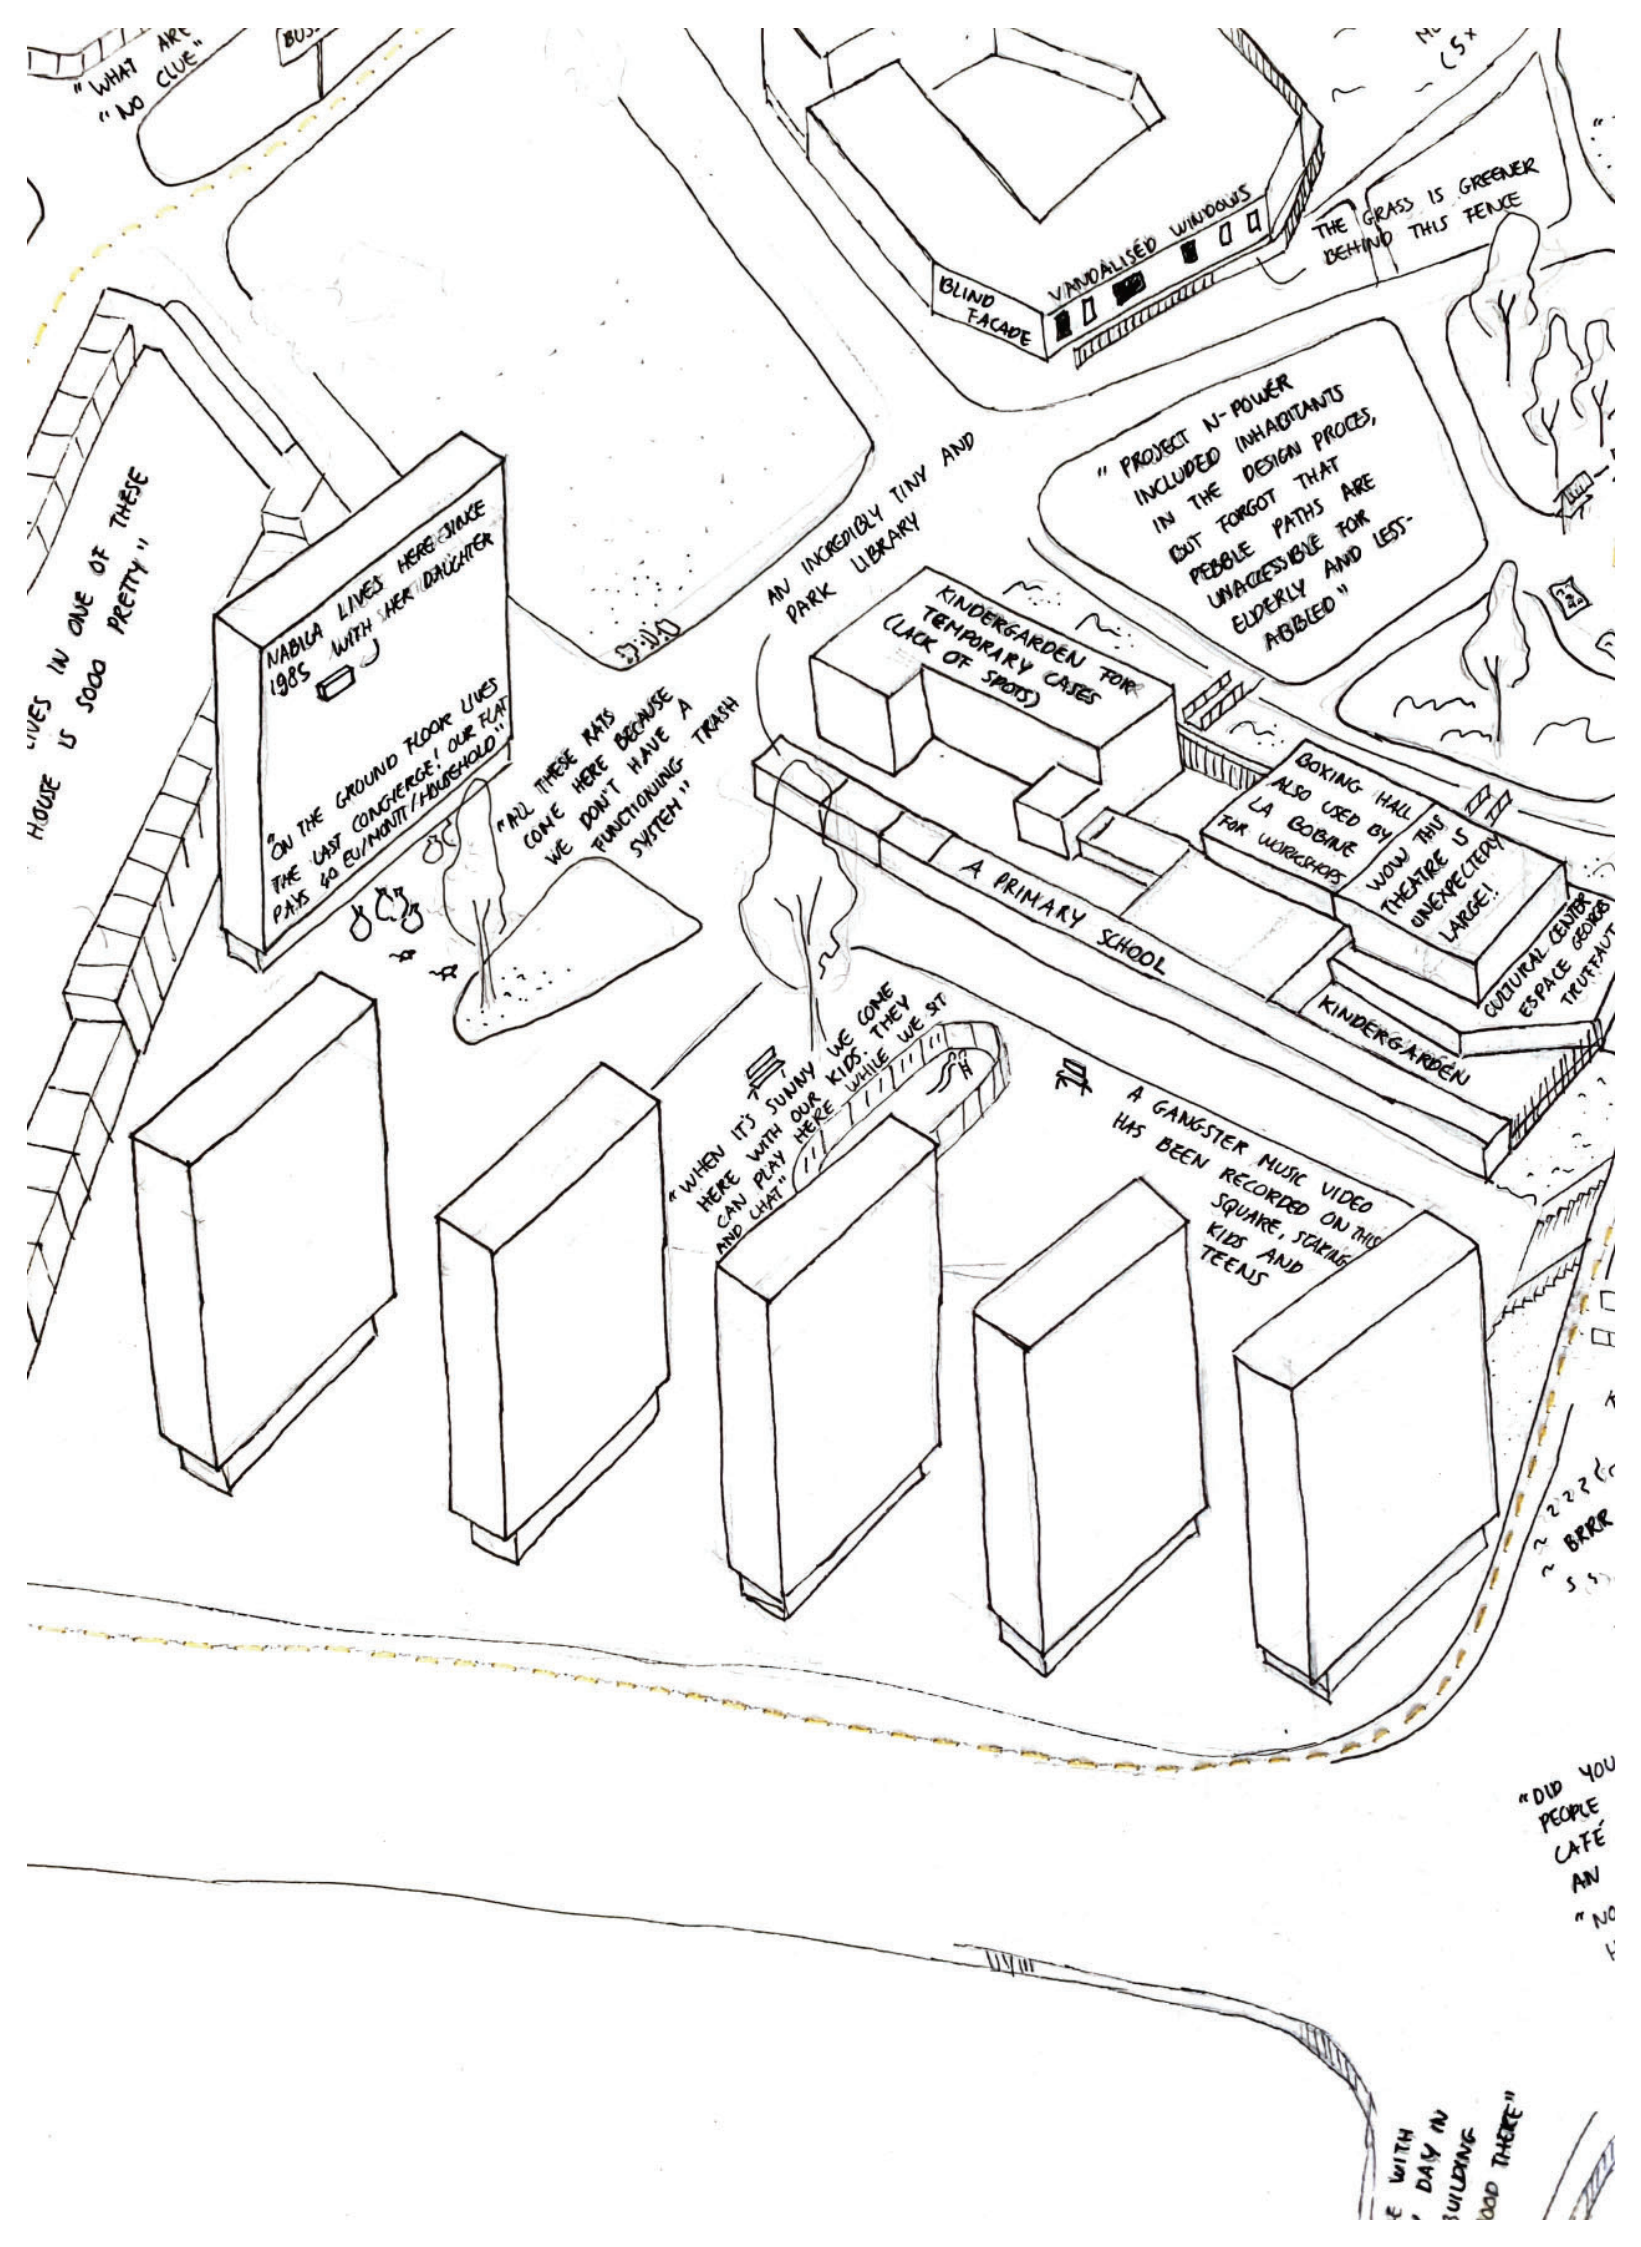

Aujourd'hui, les « femmes et le logement » est toujours un sujet délicat. Droixhe étant un projet de logements sociaux, il est important de noter que la population précaire belge est principalement composée de femmes puisque, en 2019, plus de la moitié des occupant·e-s de logements sociaux sont des femmes isolées (Les Echos du Logement, 2019, n°126).

« La femme sera heureuse si son mari est heureux. Le sourire des femmes est un don des dieux. Et une cuisine bien faite vaut la paix du foyer. Alors faites donc de la cuisine le lieu du sourire féminin, et que ce sourire rayonne sur l'homme et les enfants présents autour de ce sourire. »

*« The wife will be happy if her husband is happy. The smile of women is a gift from the gods. And a well-made kitchen is worth the peace of the home. **So make the kitchen the place of the feminine smile, and let this smile shine on the man and the children present around this smile.** »*

- Le Corbusier, 1953

PROGRAM

GOAL

public :
social activities
small businesses
community kitchen

collective :
shared spaces
shared domestic tasks
kindergarden

domestic :
housing for women

empowerment women

activation urban area

social safety in neighbourhood

sense of community

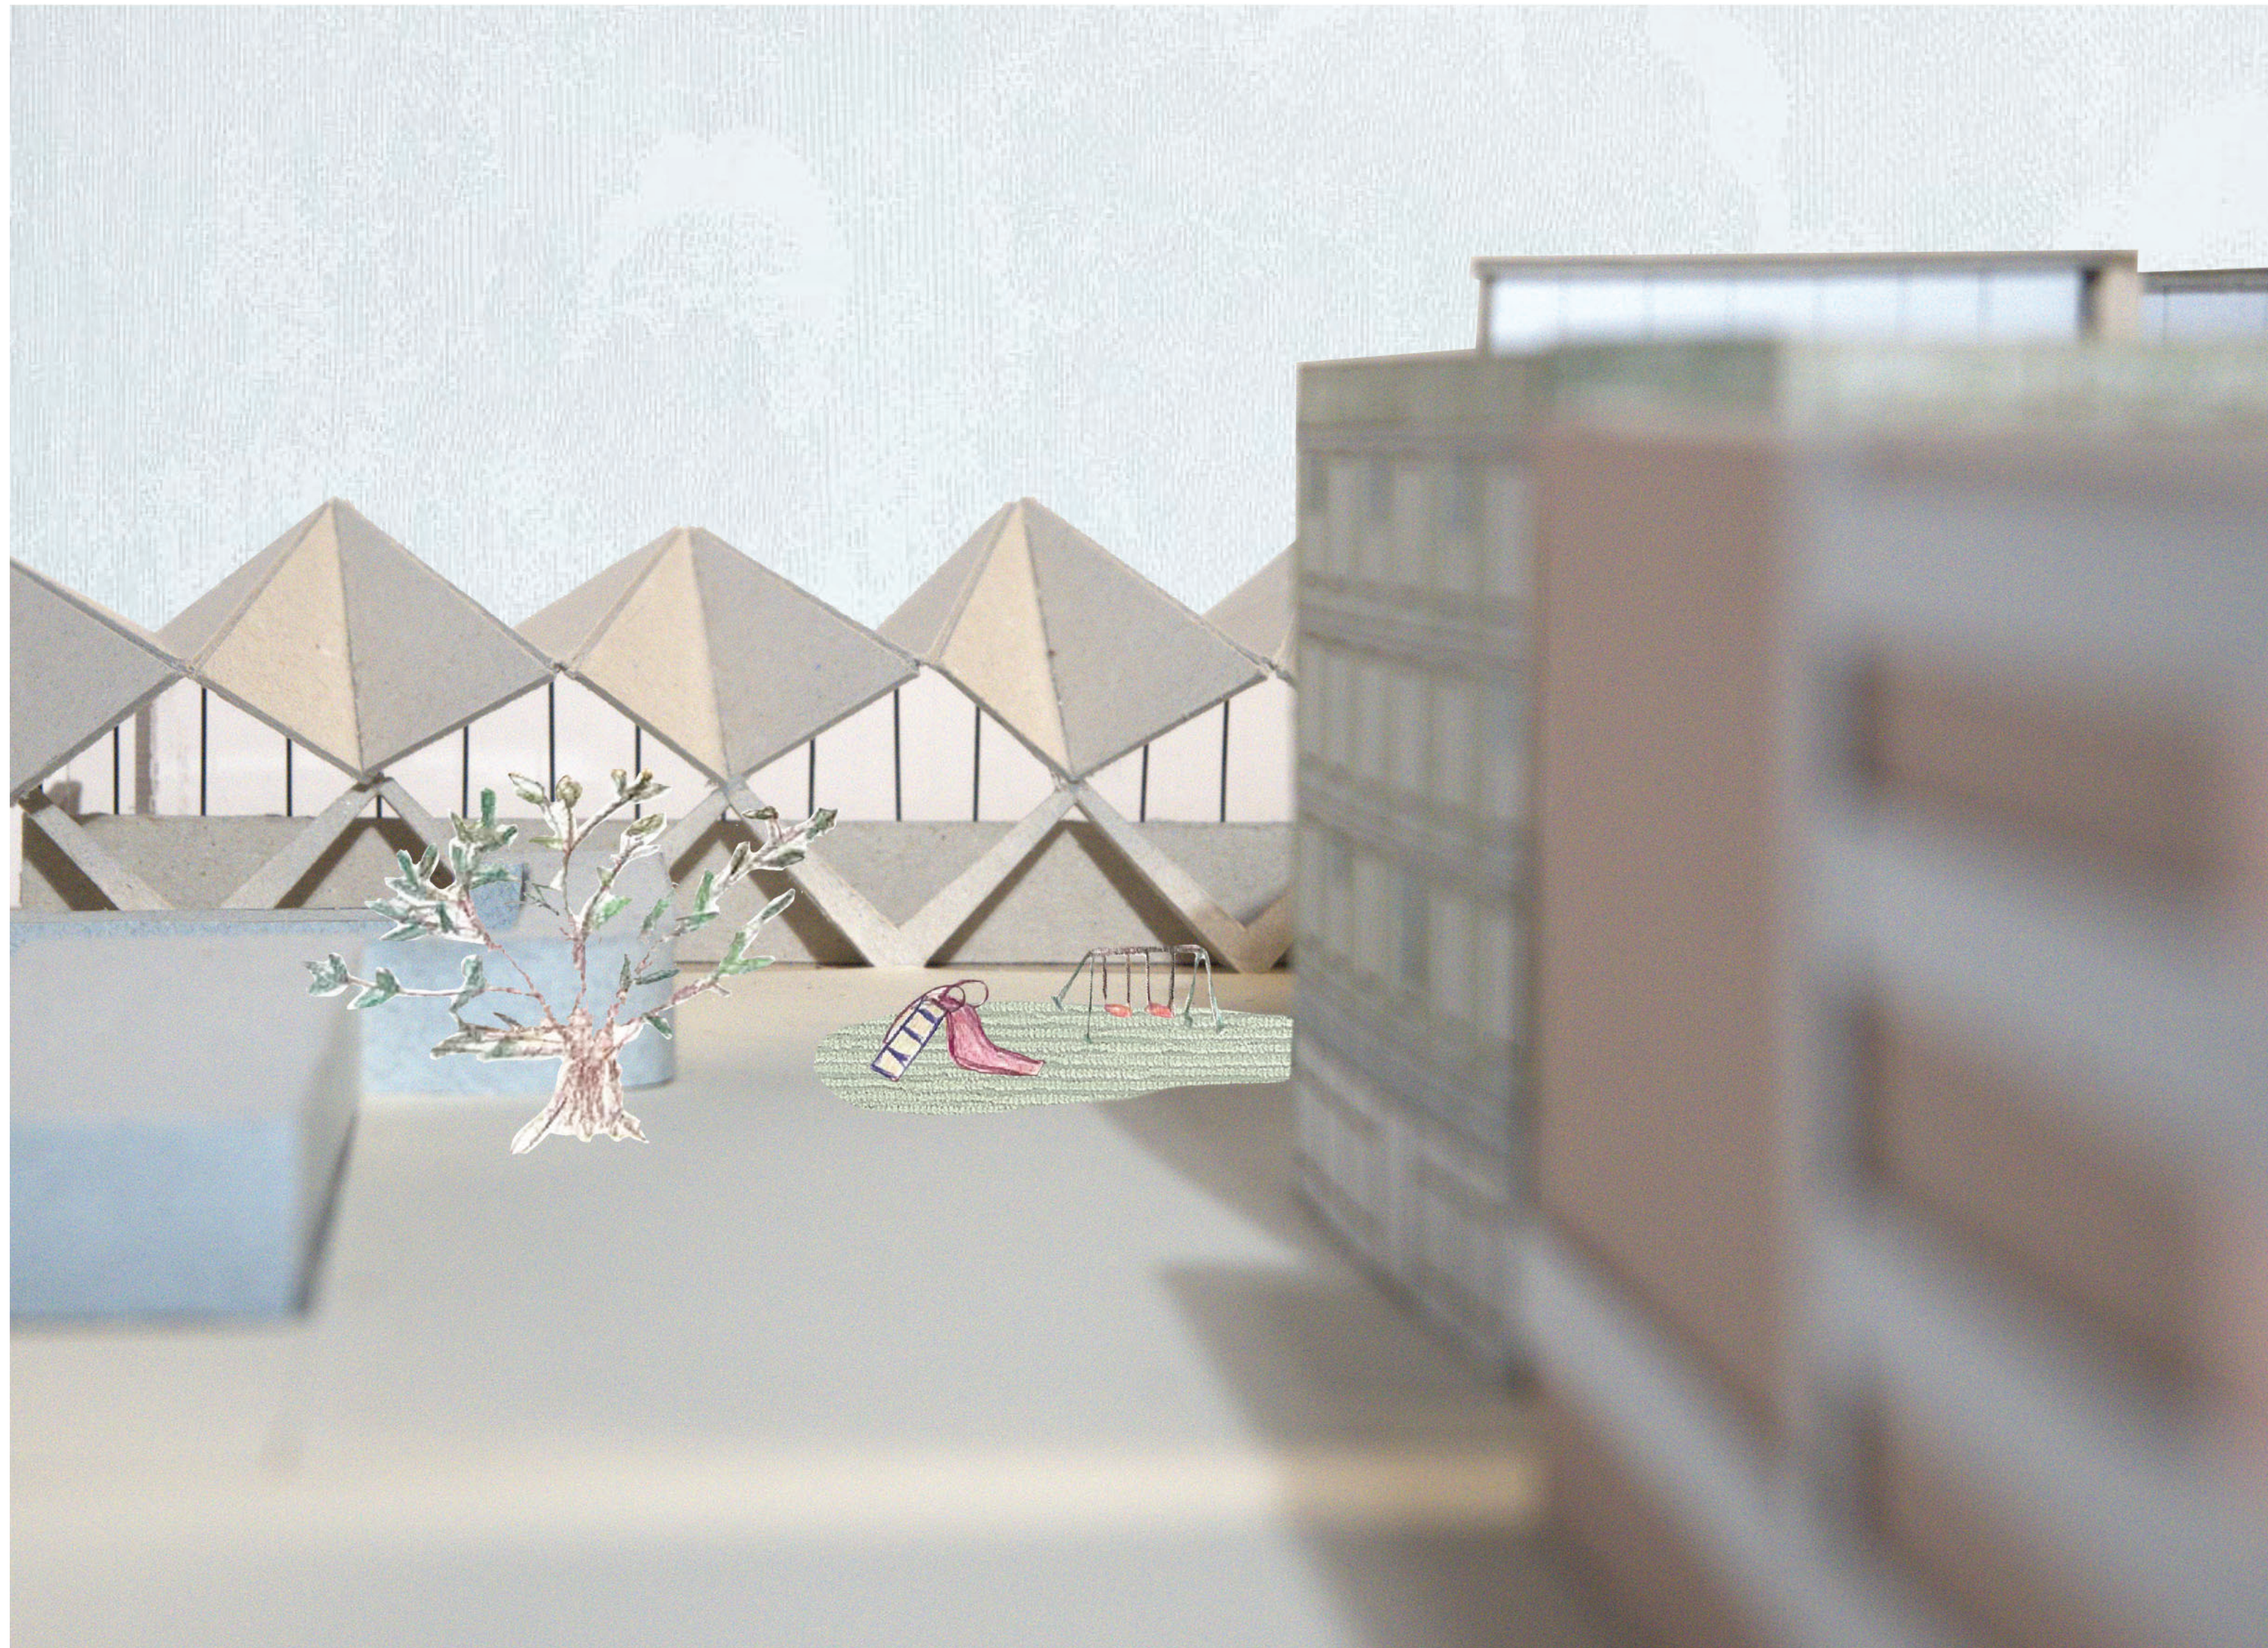

empowerment women

economic benefits

meet housing needs

create shelter from domestic violence

VOIX
de femmes

floor plan community kitchen ground floor

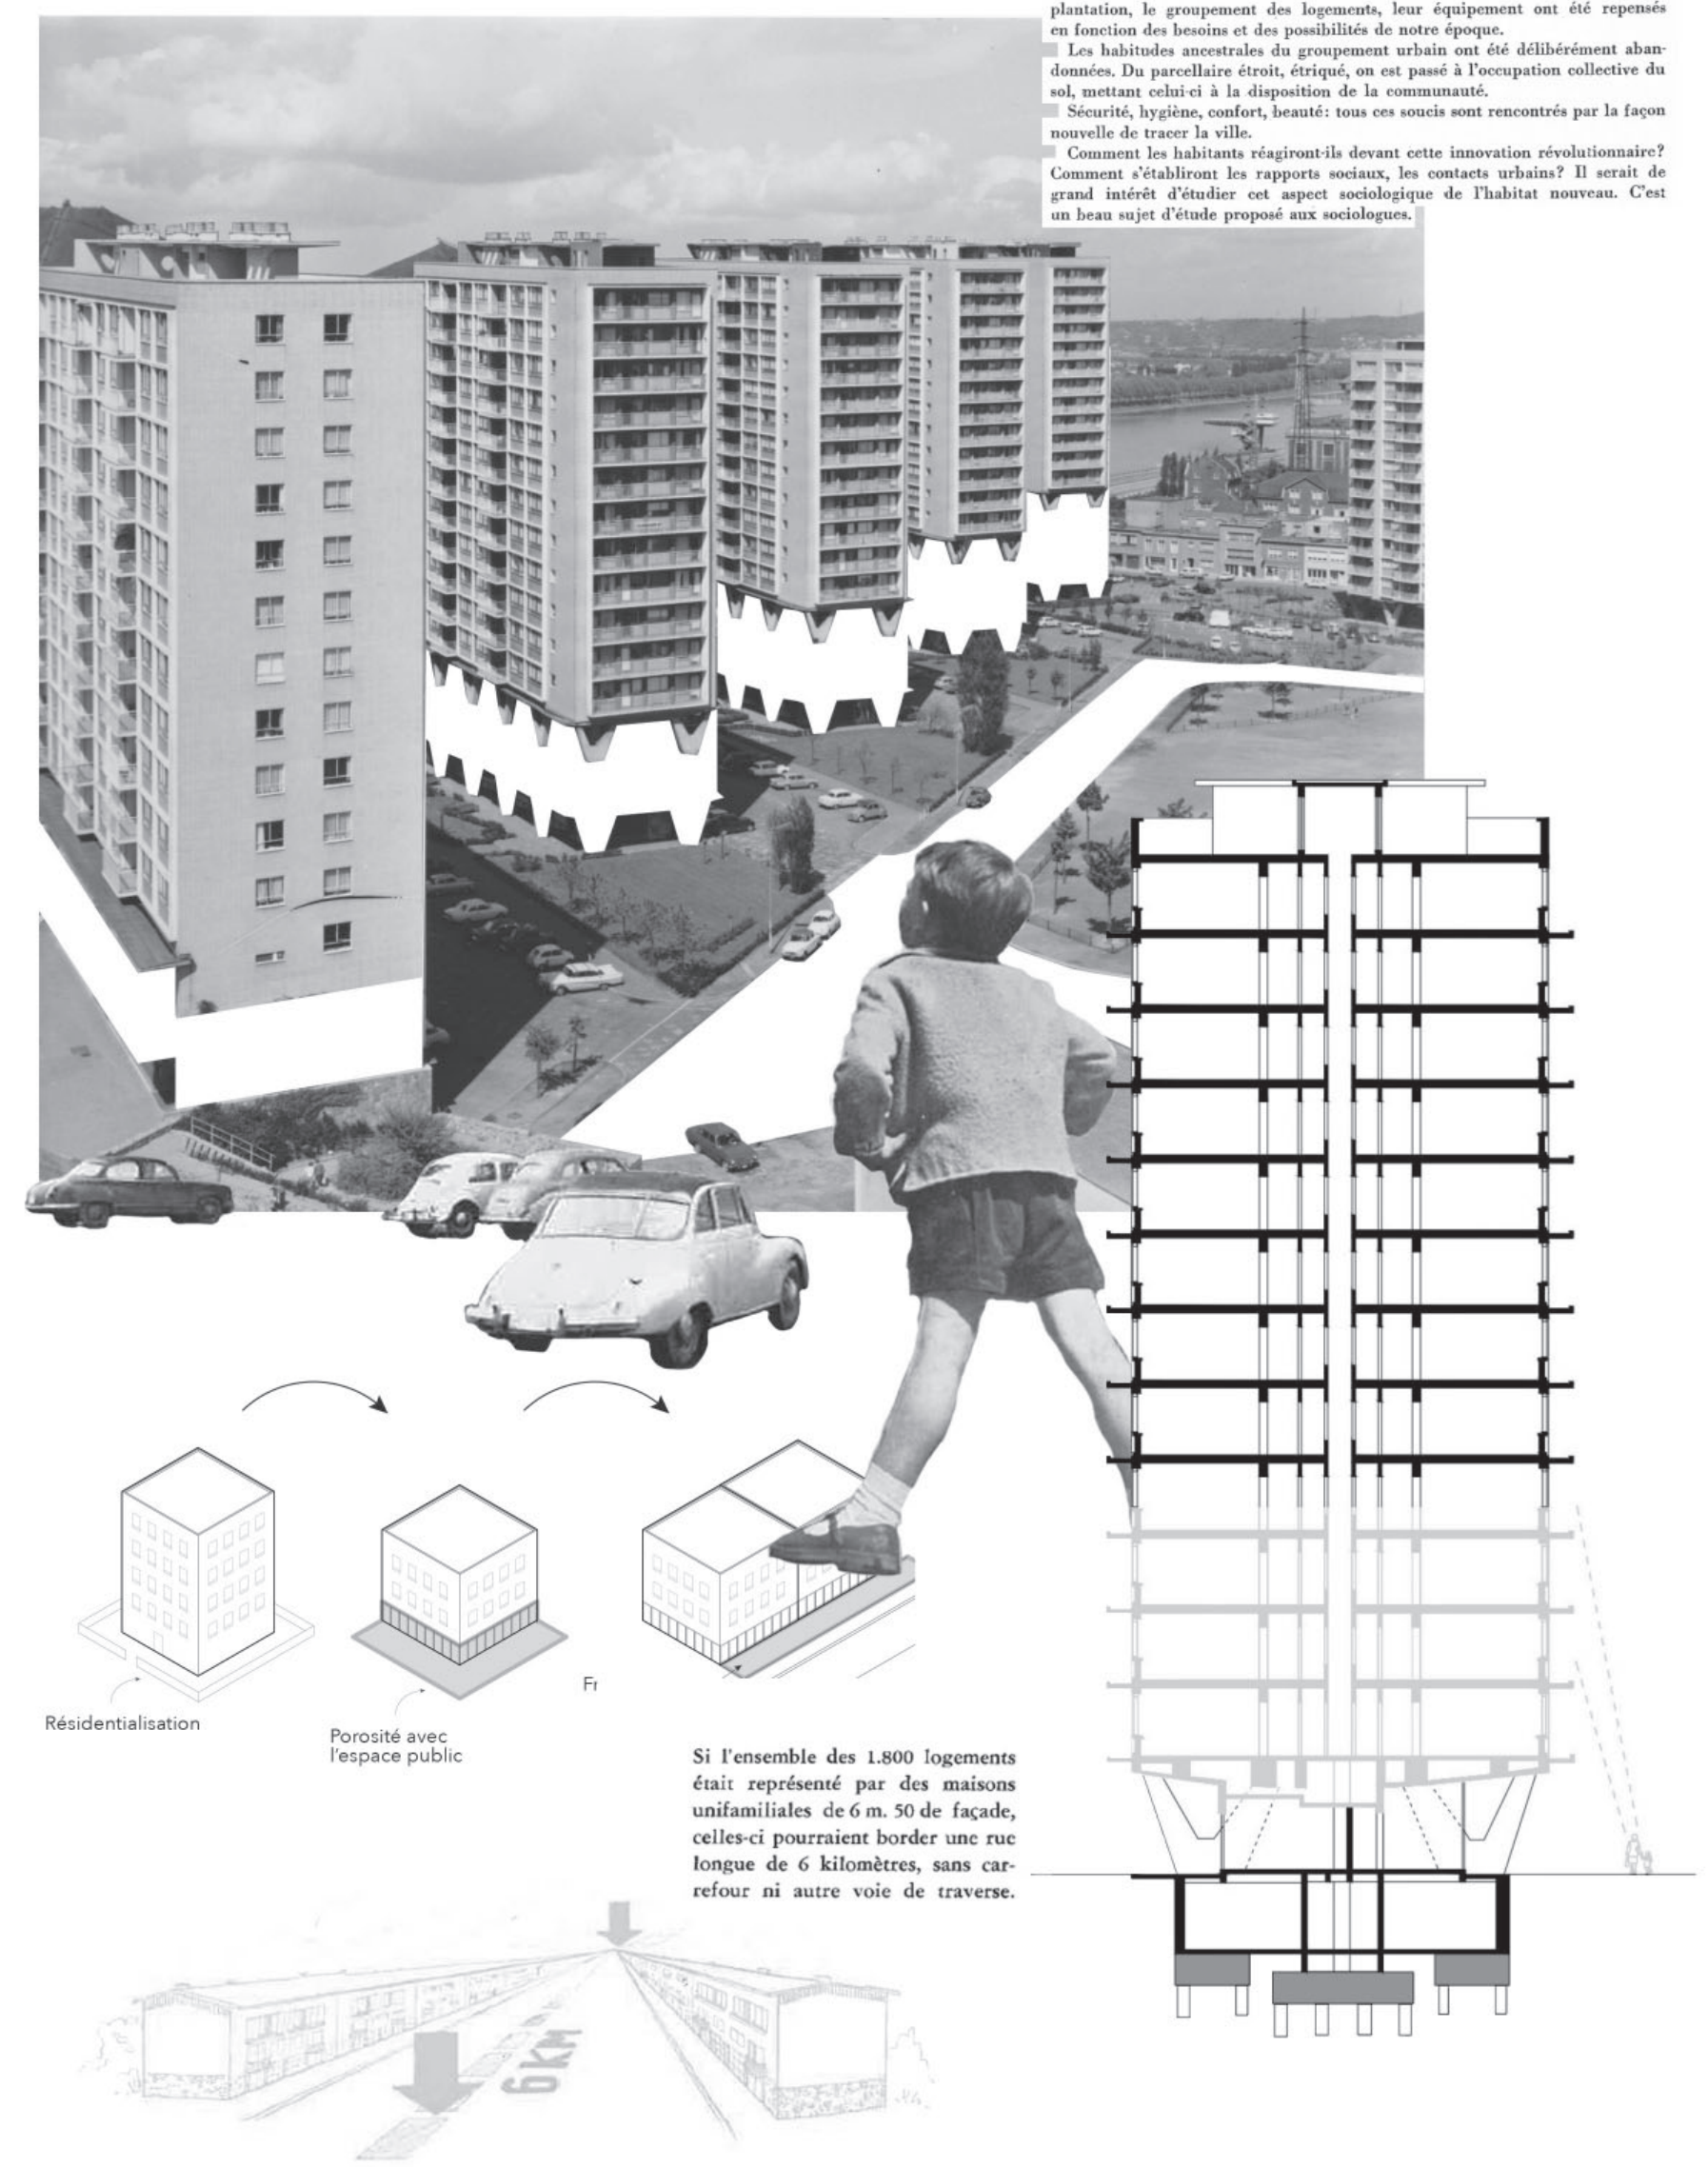

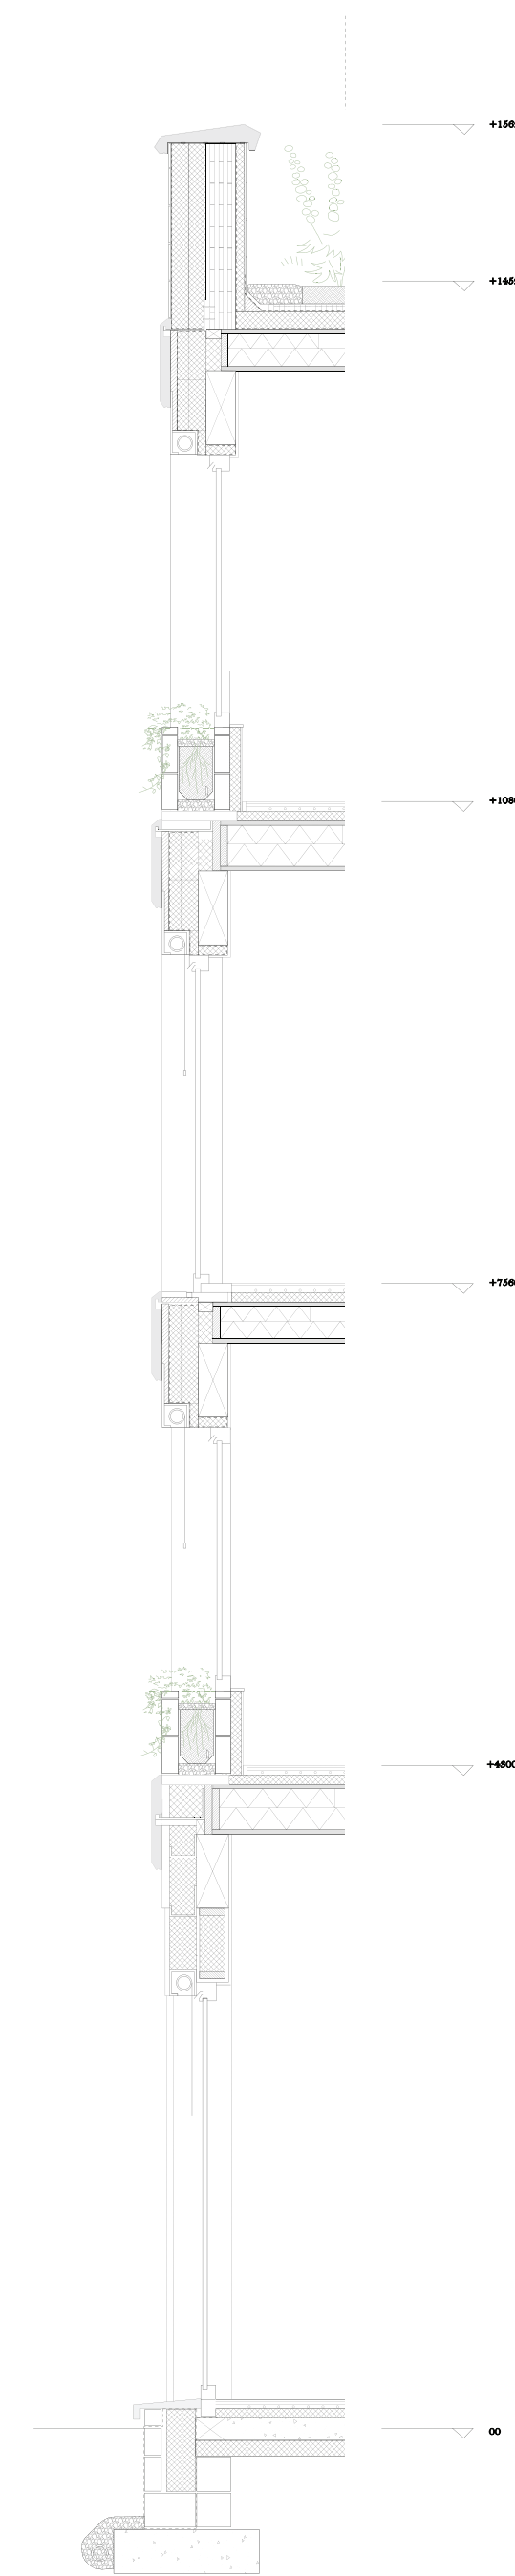

La cité-parc de Droixhe applique les principes de l'urbanisme et de l'architecture modernes. Un nouveau mode de vivre est offert à ses habitants: l'implantation, le groupement des logements, leur équipement ont été repensés en fonction des besoins et des possibilités de notre époque.

Les habitudes ancestrales du groupement urbain ont été délibérément abandonnées. Du parcellaire étroit, étriqué, on est passé à l'occupation collective du sol, mettant celui-ci à la disposition de la communauté.

Sécurité, hygiène, confort, beauté: tous ces soucis sont rencontrés par la façon nouvelle de tracer la ville.

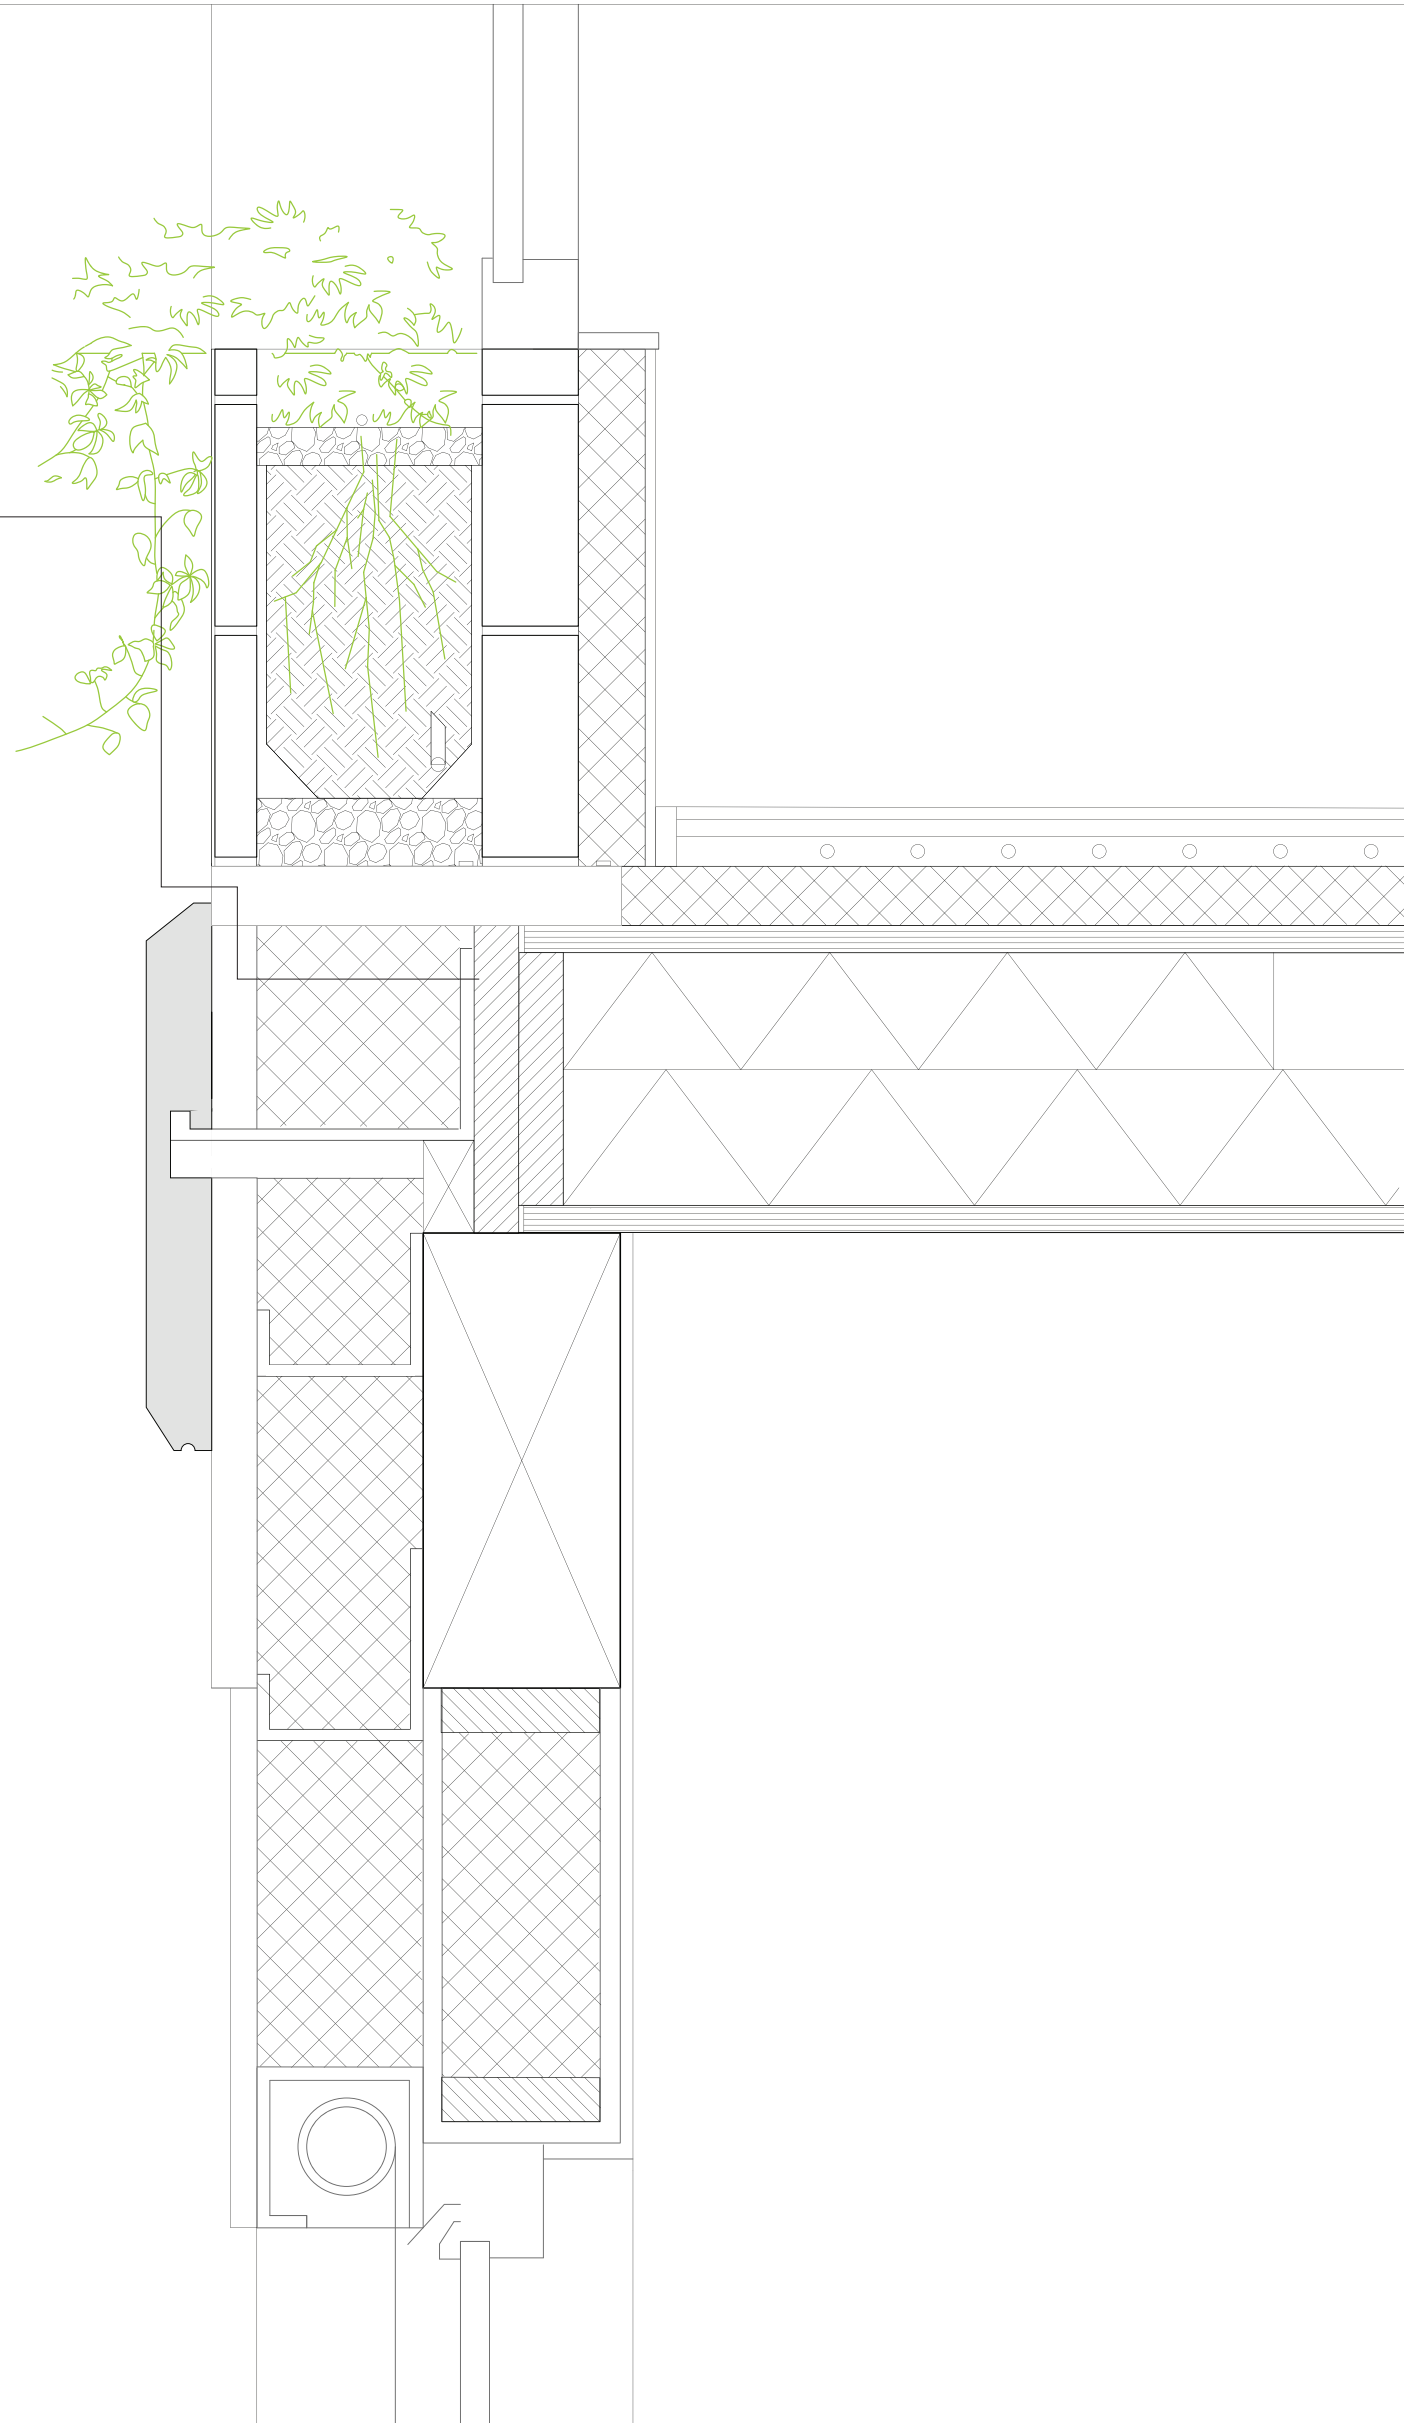

Comment les habitants réagiront-ils devant cette innovation révolutionnaire? Comment s'établiront les rapports sociaux, les contacts urbains? Il serait de grand intérêt d'étudier cet aspect sociologique de l'habitat nouveau. C'est un beau sujet d'étude proposé aux sociologues.
