## OPEN Publisher Correction: Adaptive AI-based surrogate modelling via transfer learning for DEM simulation of multi-component segregation

Ahmed Hadi, Morteza Moradi, Yusong Pang & Dingena Schott

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-024-78455-7>, published online 06 November 2024

The original version of this Article contained typographical errors in Equations. In Equation 8, where

$$f(x) = \sum_{i=1}^n (\alpha_i - \alpha_i^*) \exp(-\gamma \|x_i - x'\|^2) + b \quad (8)$$

now reads:

$$f(x) = \sum_{i=1}^n (\alpha_i - \alpha_i^*) \exp(-\gamma \|x_i - x'\|^2) + b \quad (8)$$

In Equation 17, where

$$\begin{bmatrix} f(x_1) \\ ? \\ f(x_n) \end{bmatrix} \sim \mathcal{N} \left( \begin{bmatrix} \mu(x_1) \\ ? \\ \mu(x_n) \end{bmatrix}, \begin{bmatrix} k(x_1, x_1) & \cdots & k(x_1, x_n) \\ ? & \ddots & ? \\ k(x_n, x_1) & \cdots & k(x_n, x_n) \end{bmatrix} \right) \quad (17)$$

now reads:

$$\begin{bmatrix} f(x_1) \\ \vdots \\ f(x_n) \end{bmatrix} \sim \mathcal{N} \left( \begin{bmatrix} \mu(x_1) \\ \vdots \\ \mu(x_n) \end{bmatrix}, \begin{bmatrix} k(x_1, x_1) & \cdots & k(x_1, x_n) \\ \vdots & \ddots & \vdots \\ k(x_n, x_1) & \cdots & k(x_n, x_n) \end{bmatrix} \right) \quad (17)$$

In Equation 18, where

$$\boldsymbol{\mu} \triangleq \begin{bmatrix} \mu(x_1) \\ ? \\ \mu(x_n) \end{bmatrix}; \mathcal{K} \triangleq \begin{bmatrix} k(x_1, x_1) & \cdots & k(x_1, x_n) \\ ? & \ddots & ? \\ k(x_n, x_1) & \cdots & k(x_n, x_n) \end{bmatrix}; \|(x) \triangleq \begin{bmatrix} k(x_1, x) \\ ? \\ k(x_n, x) \end{bmatrix} \quad (18)$$

Published online: 04 December 2024

now reads:

$$\boldsymbol{\mu} \triangleq \begin{bmatrix} \mu(x_1) \\ \vdots \\ \mu(x_n) \end{bmatrix}; \boldsymbol{\mathcal{K}} \triangleq \begin{bmatrix} k(x_1, x_1) & \cdots & k(x_1, x_n) \\ \vdots & \ddots & \vdots \\ k(x_n, x_1) & \cdots & k(x_n, x_n) \end{bmatrix}; \mathcal{A}(x) \triangleq \begin{bmatrix} k(x_1, x) \\ \vdots \\ k(x_n, x) \end{bmatrix} \quad (18)$$

In Equation 24, where

$$\begin{bmatrix} \alpha_1 \\ ? \\ \alpha_n \end{bmatrix} \triangleq (\boldsymbol{\mathcal{K}} + \sigma^2 \mathbf{I}_n)^{-1} (\mathcal{Y} - \boldsymbol{\mu}) \quad (24)$$

now reads:

$$\begin{bmatrix} \alpha_1 \\ \vdots \\ \alpha_n \end{bmatrix} \triangleq (\boldsymbol{\mathcal{K}} + \sigma^2 \mathbf{I}_n)^{-1} (\mathcal{Y} - \boldsymbol{\mu}) \quad (24)$$

The original Article has been corrected.
