EAST CENTRAL DISTRICT

Charles Booth's Poverty Map

How does architecture respond to issues of spatial inequality in the built urban environment?

Lefebvre, Henri. 1992. *The Production Of Space*. Malden, Mass.: Blackwell.

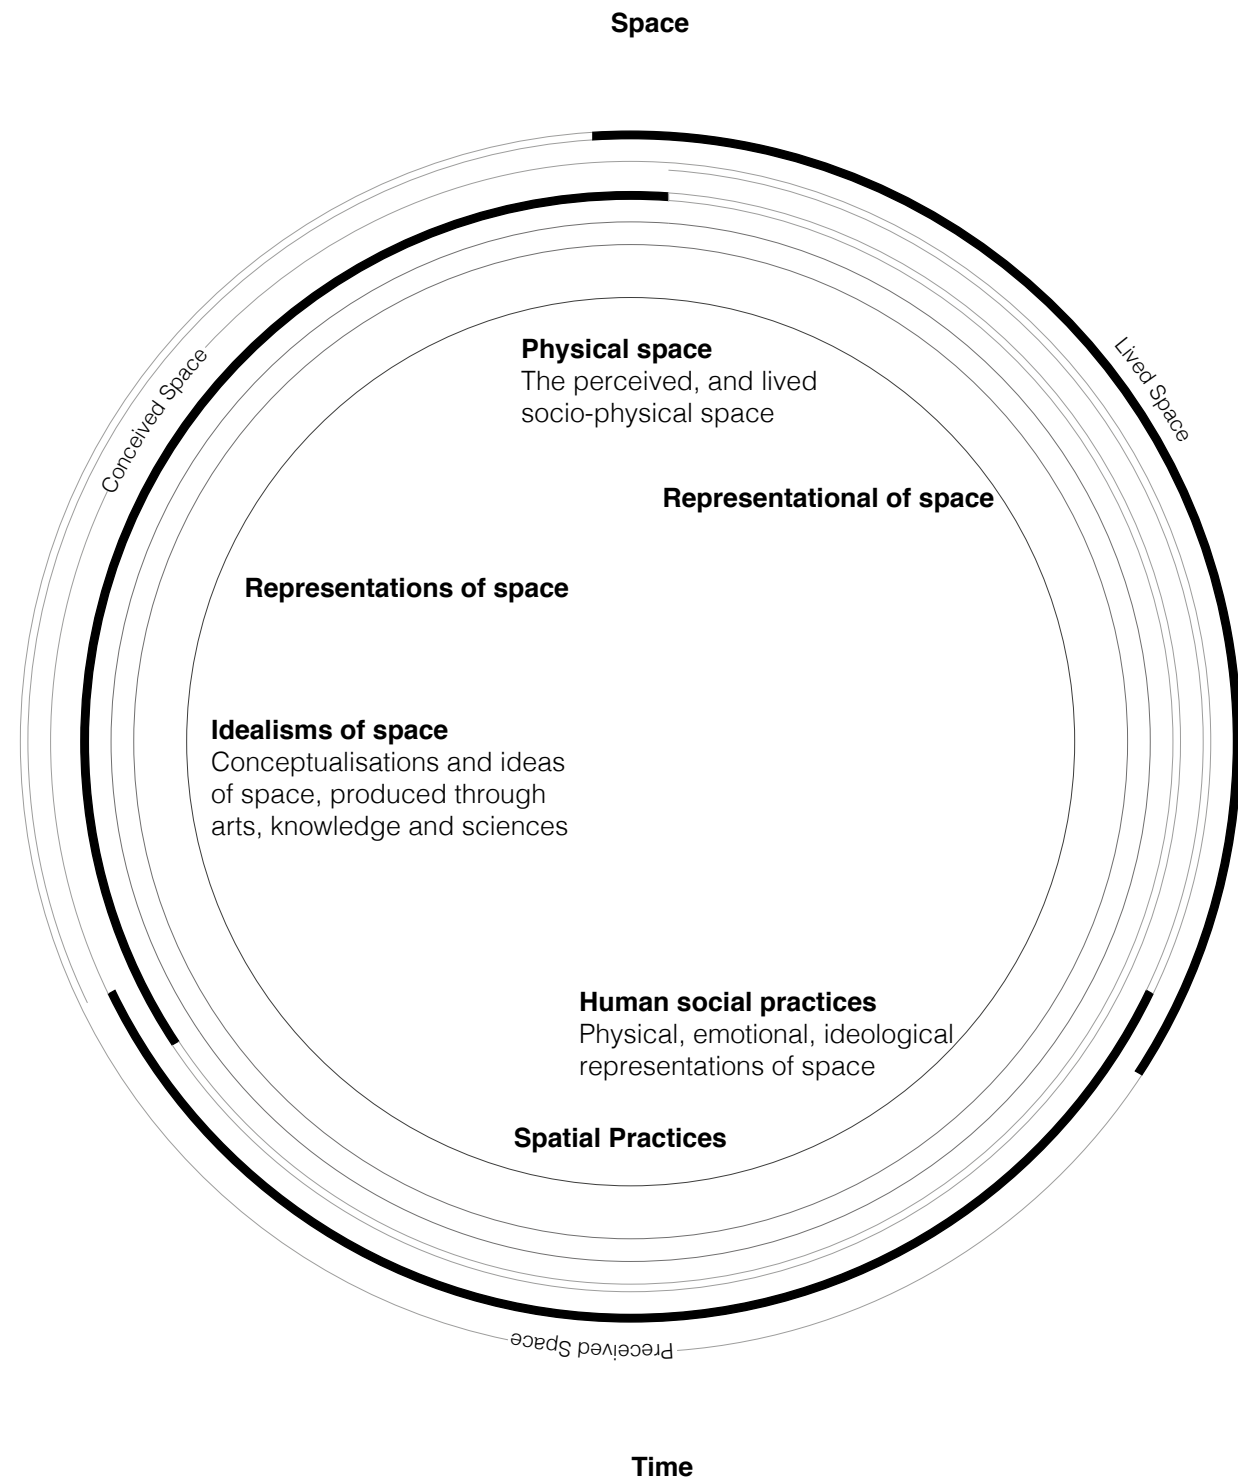

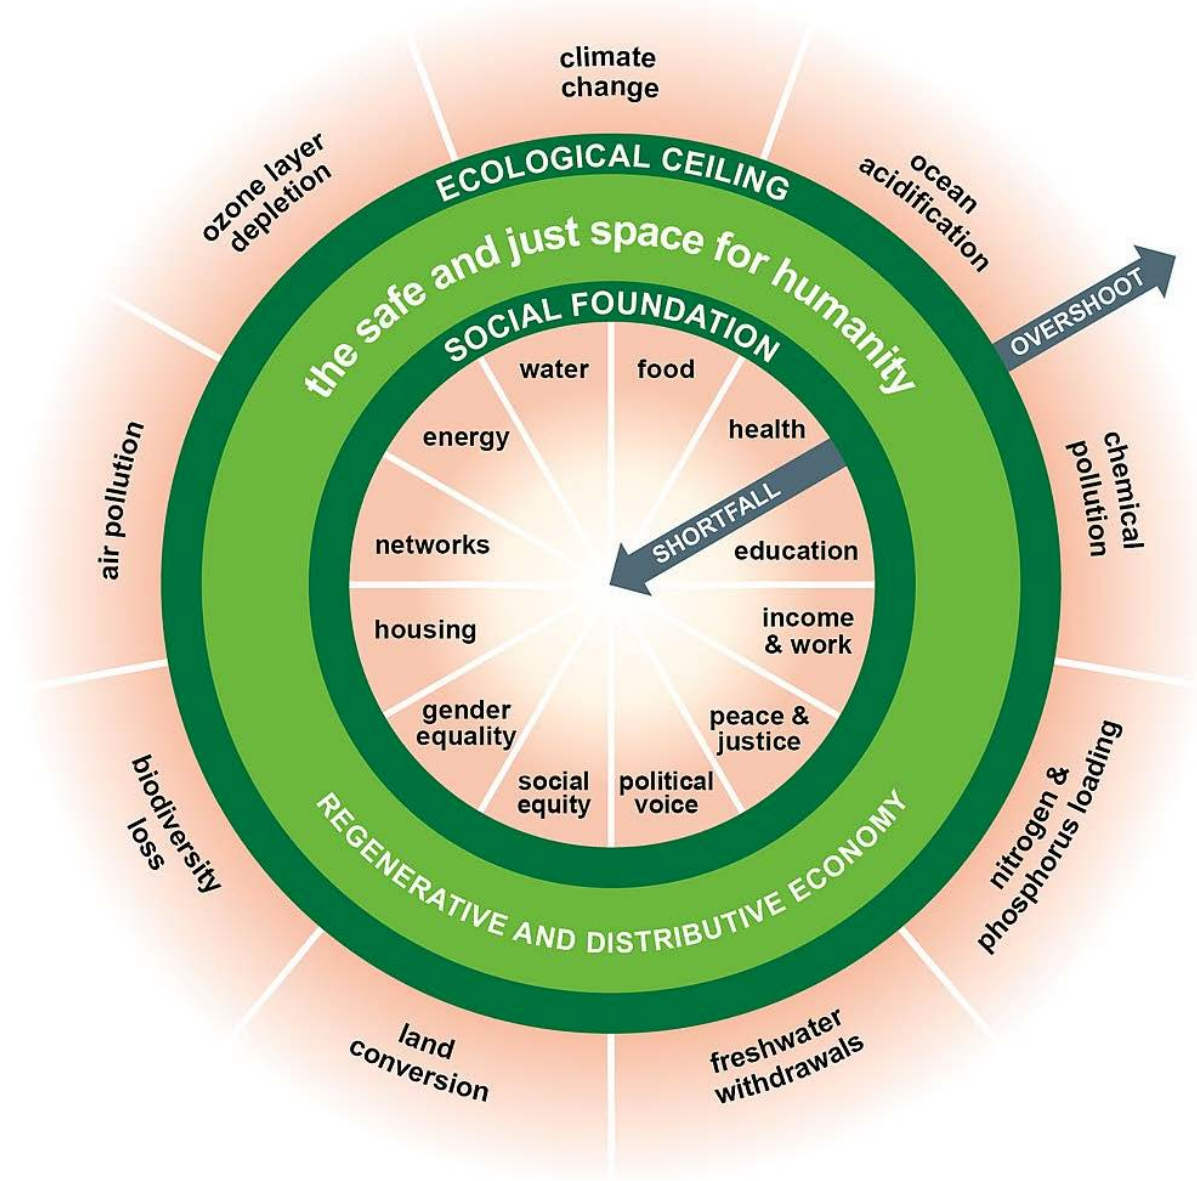

Harvey, David. 2009. *Social Justice And The City*. University of Georgia Press.

Soja, Edward W. 2010. *Seeking Spatial Justice*. Minneapolis: Univ. of Minnesota Press.

Theoretical Literature

Doughnut Economy
Kate Raworth

Oldenburg, Ray. 1999. *The Great Good Place*. Da Capo Press.

“Though a radically different kind of setting for a home, the third place is remarkably similar to a good home in the psychological comfort and support that it extends...**They are the heart of a community's social vitality, the grassroots of democracy**”

5. Timber flooring,
Screed with underfloor heating,
Rigid insulation,
Structural reinforced concrete

Horizontal Detail

Stage 1

Community Land Trust network

1. Community land trust network is established by volunteers in the local community, looking to build an affordable community.
2. Land is acquired

Stage 2

3. Initial Funding is established for payment of services
4. Project team is established with the CLT network and local residents working together with architects, contractors and design team.

Stage 3

5. Construction begins and existing buildings are retained and renovated with funding from National Lottery Heritage Fund and Culture and Community spaces at risk scheme.
6. Railway arches transformed in partnership with network rail into affordable lease stores and cafe's for independent businesses, and those effected by covid
7. Spaces open to local community

Stage 4

7. Further funding established for CLT co-housing scheme, backed by Tower Hamlets local authority and Greater London Authority.
8. Residents and CLT Network move in to socially rented or shared ownership housing marketed at 50% of market value (median house price £550,000).
