CrowdGauge.org
CrowdGauge is an open-source framework for creating educational online games. It first asks users to rank a set of priorities, then demonstrates how a series of actions and policies might impact those priorities. The third part of the sequence gives use...

Felt - The best way to work with maps on the internet
Felt lets you create maps collaboratively, using world-class data, and share them in a single click. For team projects or epic adventure with friends.

Participatory Value Evaluation (PVE)
Participatory Value Evaluation (PVE) is a new method for evaluating policy options, and to facilitate the participation of large groups of citizens. The essence of PVE is that citizens are able to give advice about a government choice, in an easy-to-ace...

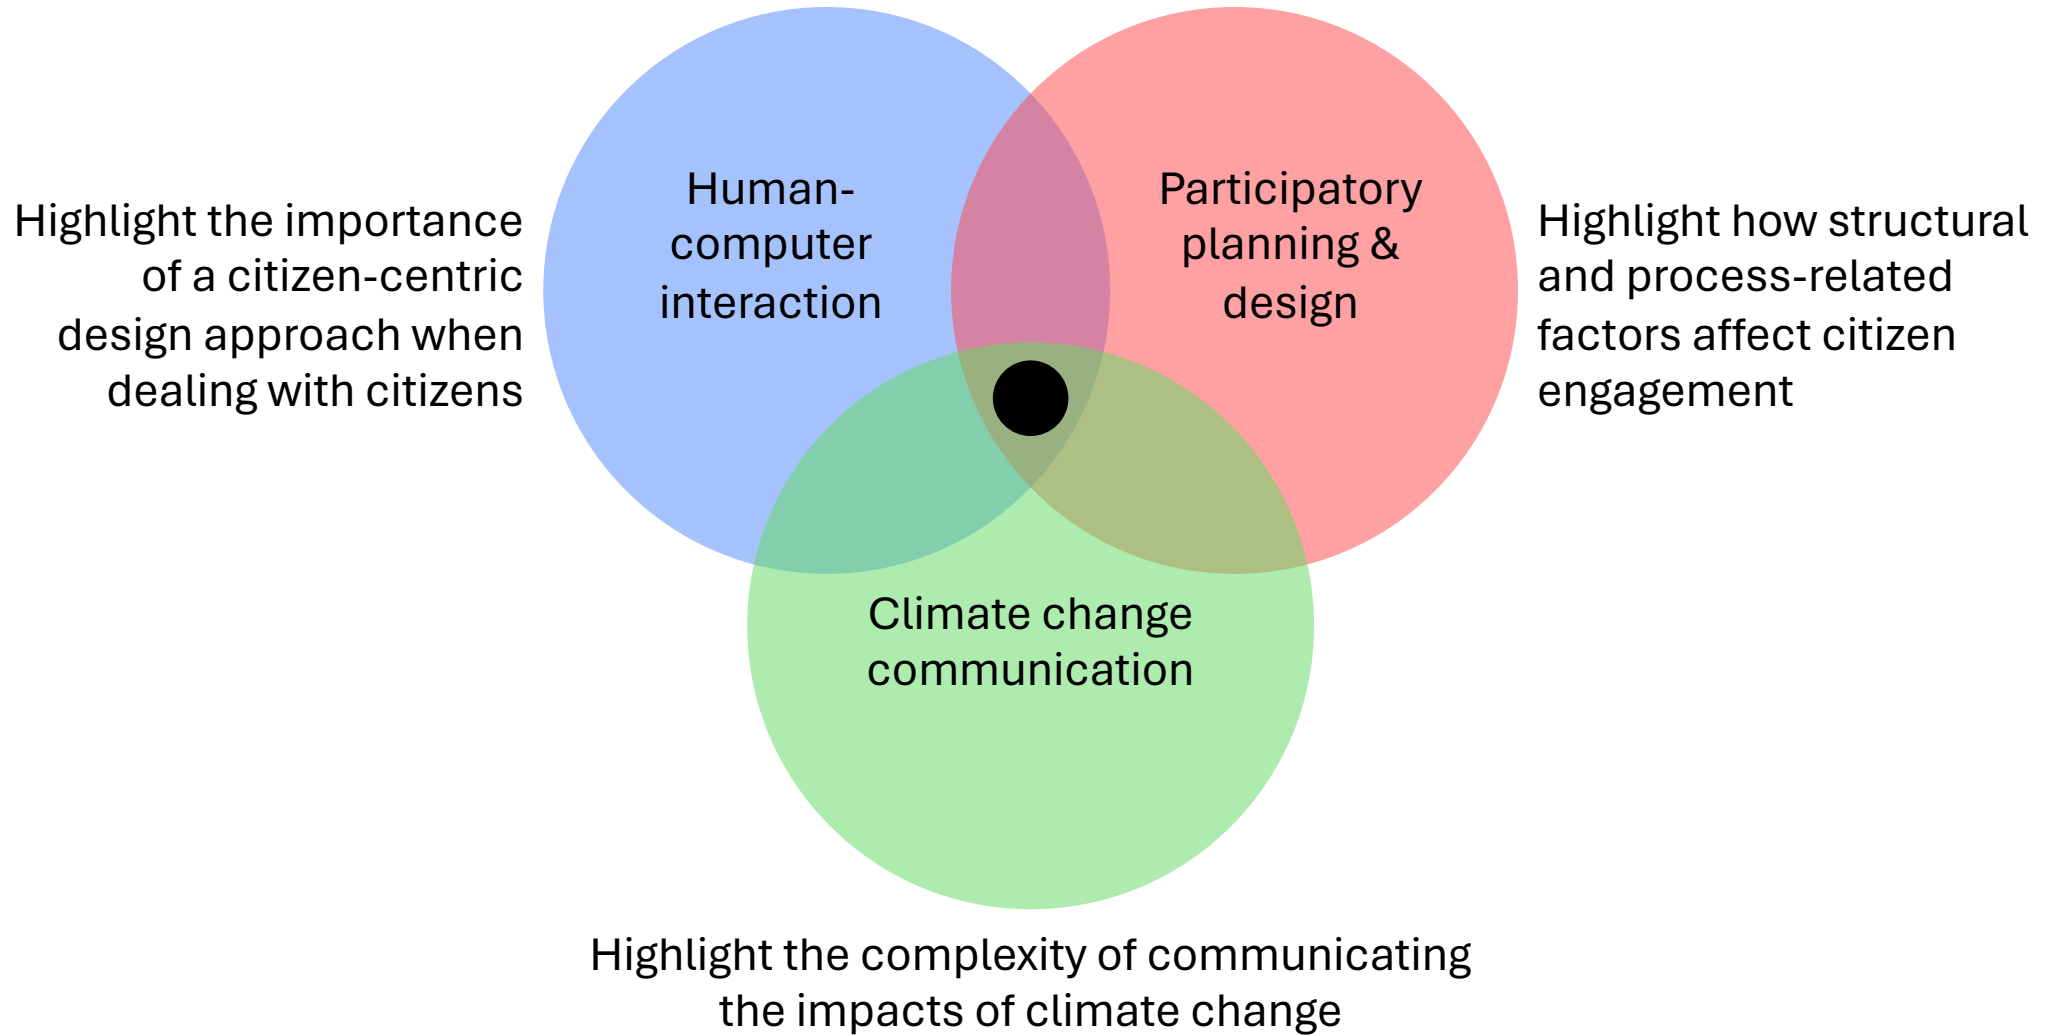

Community Engagement Platform: Online Software | CitizenLab
CitizenLab is an online community engagement platform for local governments. Engage more people, manage input easily and drive better decisions. Discover it now!

Kaartviewer
De KlimaatEffectAtlas geeft een eerste indruk van hoe kwetsbaar verschillende gebieden in Nederland zijn voor wateroverlast, droogte, hitte en overstroming.

Background

GOAL

Design citizen-centric digital platforms that address the complexity of climate change and ensure engagement

Literature review + platform analysis =
design guidelines for climate action

Design guidelines

- **Awareness and framing**
 - Balance between positive and negative framing
 - Personalisation and connection to daily concerns
- **Individual and collective action**
 - Tailored information and tools are necessary
 - Use of metrics/monitoring
 - Connection to existing initiatives
- **Use of scientific data**
 - Visualise data in different ways (maps, scenarios, stories)
 - Complexity vs. oversimplification
- **Navigation and visuals**
 - Self-navigation
 - Creative visuals

Context analysis

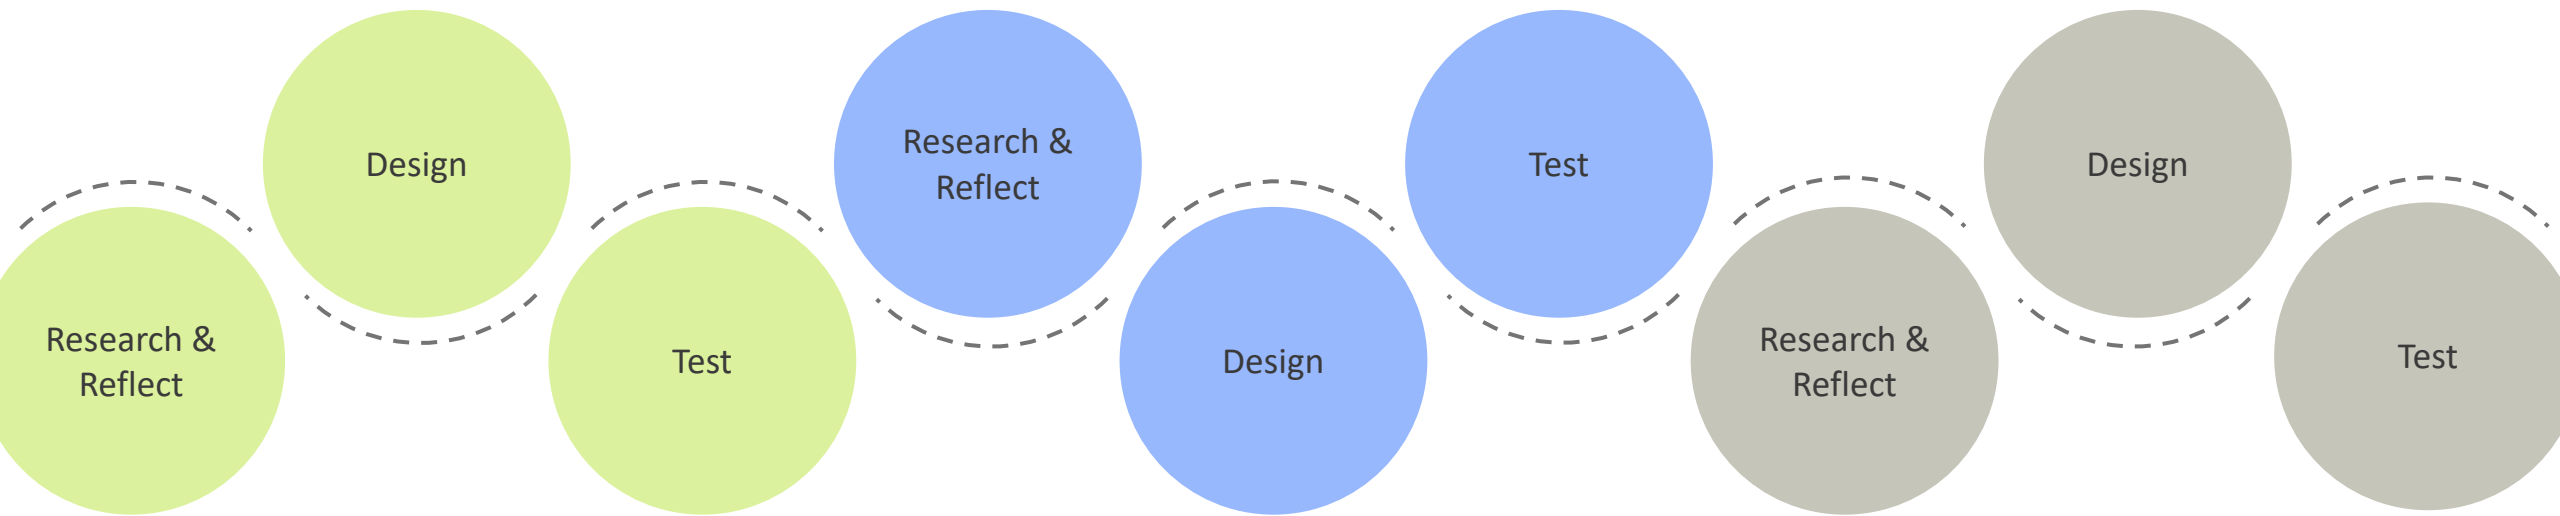

- **CmC platform** → City-level
 - Rotterdam, Amsterdam, Delft

- **BIO-CiVo** → Neighbourhood-level
 - Oud-Mathenesse, Rotterdam

Our design approach: Cycles R-D-T

Our design approach: Cycles R-D-T

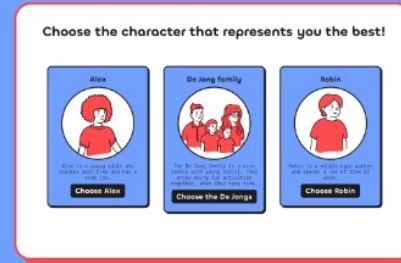

BIO-CiVO
First cycle

CmC platform
Second cycle

Prototype 1: CmC platform

- Climate risk awareness
- Scope of citizen action
- Counter climate anxiety

CITIZENS meet CLIMATE A DIGITAL PLATFORM FOR CLIMATE ACTION

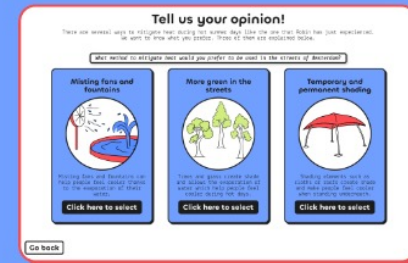

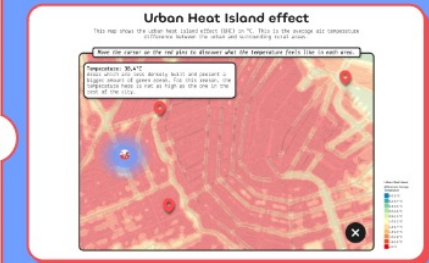

1

PERSONALIZATION

Users navigate through the platform following the journey of a persona that relates the most to them

LOCAL CLIMATE DATA
Through the everyday experiences of the persona, users discover and understand climate change data and local climate risks

2

3

SHARING OPINIONS

Users are invited to share with other users their opinions and perceptions about the city, climate change, and climate adaptation

FUTURE SCENARIOS
Through the life journey of the persona, users explore both dramatic and optimistic future scenarios of the city with respect to climate change

4

5

CALL TO ACTION

Users are informed and connected to a range of local individual and collection initiatives for climate action that are tailored to the users' profile

Personalisation & Storytelling

Choose the character that represents you the best!

Alex

Alex is a young adult who studies part time and has a side job.

Choose Alex

De Jong family

The De Jong family is a nice family with young kid(s). They enjoy doing fun activities together, when they have time.

Choose the De Jongs

Robin

Robin is a middle-aged worker who spends a lot of time at work.

Choose Robin

Climate data at local level

Urban Heat Island effect

This map shows the urban heat island effect (UHI) in °C. This is the average air temperature difference between the urban and surrounding rural areas.

Would you like to make Amsterdam a better place?

Based on your profile, these are climate initiatives and opportunities that you might like!

Learn and discover

If you don't know where to start, you don't have time or you just need inspiration, this section is for you!

See more

Communities

There are a lot of online and offline communities that focus on climate action for improving the area!

See more

Building and DIY

If you like DIY, here you can find different projects with different prices and levels of effort!

Start your own initiative!

I am done exploring

Tailored options for action + Existing initiatives

Future scenarios

Prototype 2: BIO-CiVo platform

- Biodiversity evaluation
- Biodiversity design

BIO-CiVo: Citizen Voices in Biodiversity

A digital platform to support citizens in improving neighbourhood biodiversity

1
Users take a test to find out which animal or plant matches their personality

2
Users navigate through the platform accompany by their personality species

3
Users explore and understand the threats to biodiversity in their neighbourhood

4
Users are invited to explore design options and build their own biodiversity scenario

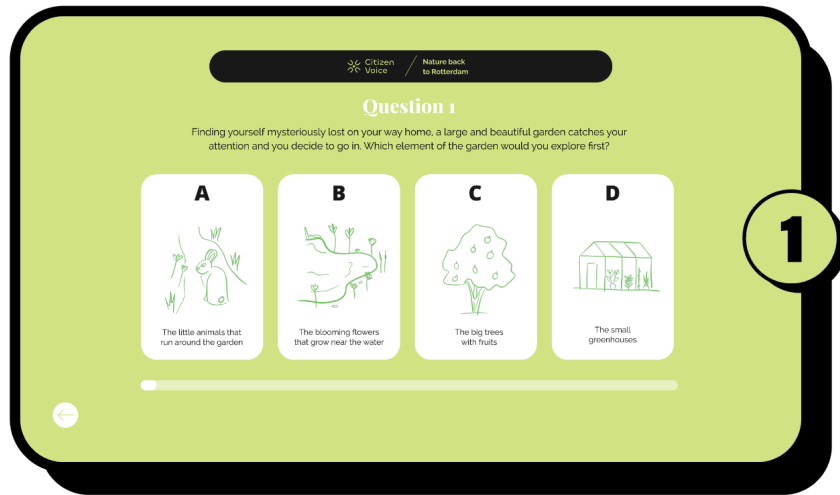

5
Users are invited to contribute more by exploring existing local initiatives for biodiversity, by assessing other biodiversity scenarios, or by creating their own scenario

6
Users create their own biodiversity scenario which is then open to other users to explore

Personalisation & Storytelling

Biodiversity data at local level

Creative visuals (layers) and metrics (thermometer)

Providing tools to facilitate citizen action

Testing: Workshops

BIO-CiVO

Paper prototype

CmC platform

Paper & Digital prototype

Test results

- ✓ Storytelling & personalisation
- ✓ Future scenarios
- ✓ Sharing opinions
- ✓ Layers approach
- ✓ Thermometer

Open questions

- 🔍 Platform purpose: Who owns and maintains the platform?
- 🔍 Physical vs. digital: Going out of the digital environment!

Conclusion & Outlook

- **Contributions**

- Defined guidelines for citizen engagement in climate action
- Implemented and tested these guidelines in two prototypes with overall positive user feedback
- Identified design elements that foster citizen engagement through digital tools

- **Limitations & Future Work**

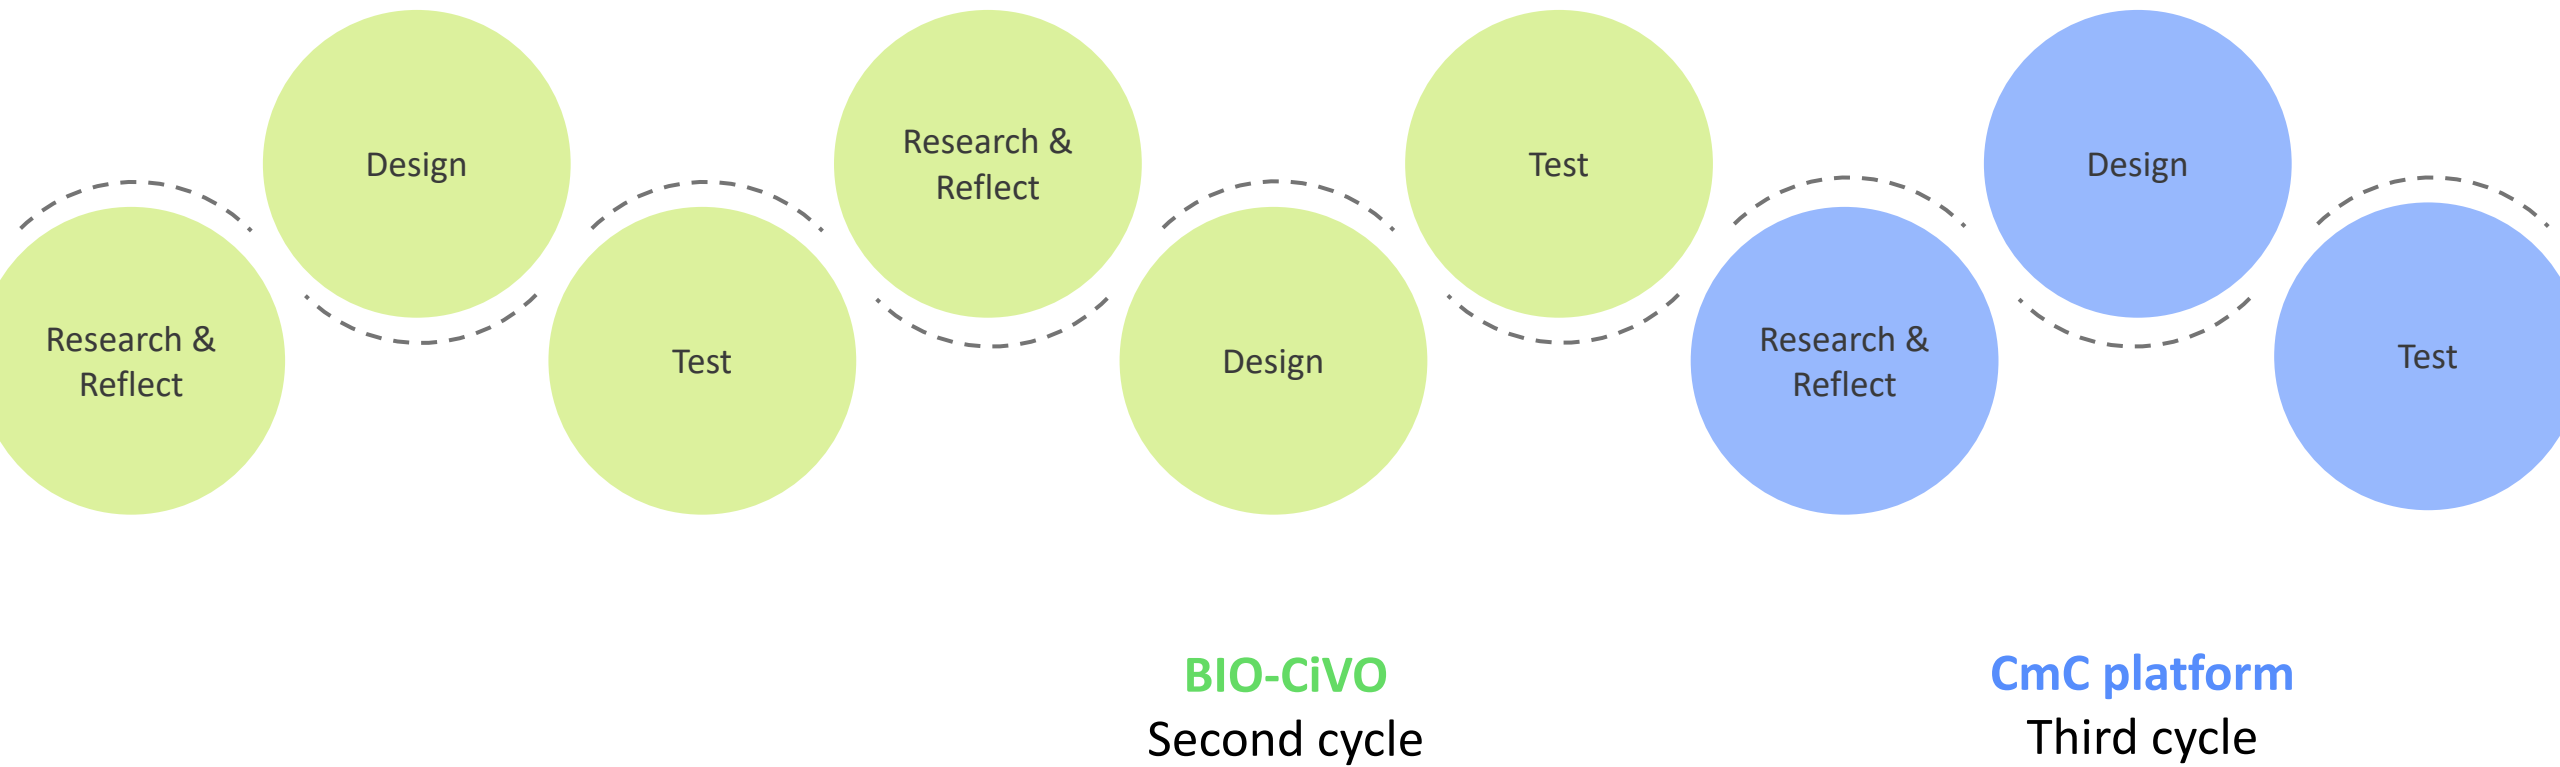

- Address open questions
- Participants were mainly students and academics (a few civic actors)
- Broaden the range of participants
- Community festival in May

I'm not a human sensor! Engaging residents in biodiversity scenario evaluation and design

 AMS - Shanghai  Workshop  Available Seats : 25

🕒 Apr 25, 2024 15:30 - 17:00 (Europe/Amsterdam) 

You have the opportunity to contribute to our research!
