

Audi Urban Shared Mobility.

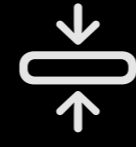

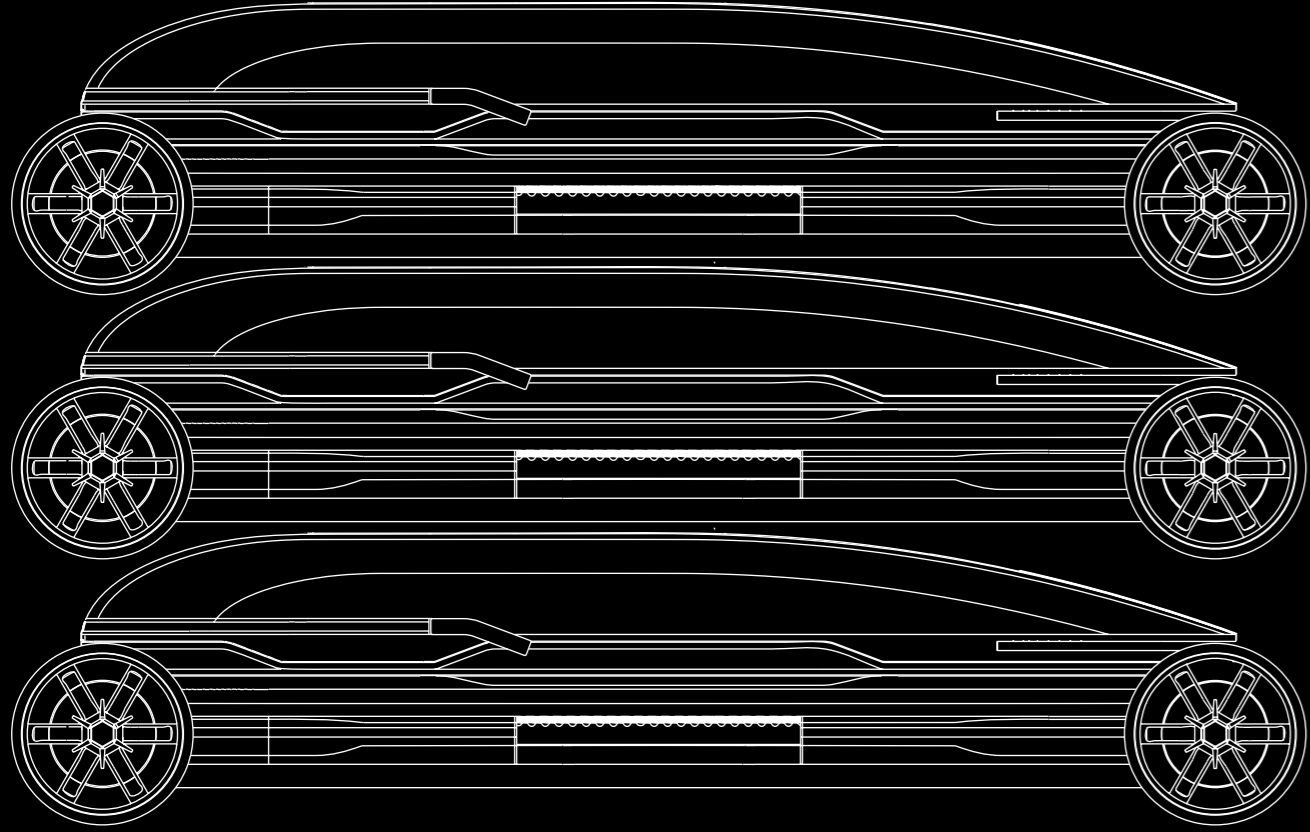

e-tron

The 21st century is increasingly concerned with environmental and sociological problems caused by the inefficient use of resources. As more people move towards cities, a rapid increase in motorization rates and the number of private vehicles will further aggravate our urban challenges.

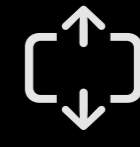

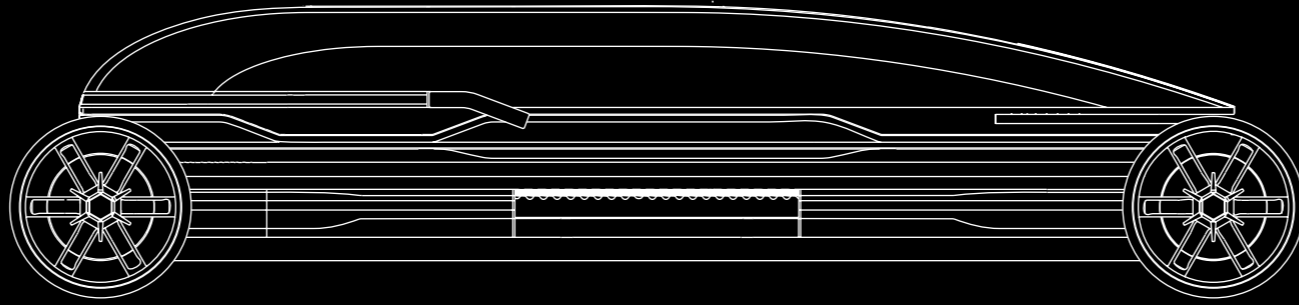

Audi UF35 is a shared mobility platform offering seamless and premium door-to-door transit. It provides an alternative to private car use to improve urban life quality.

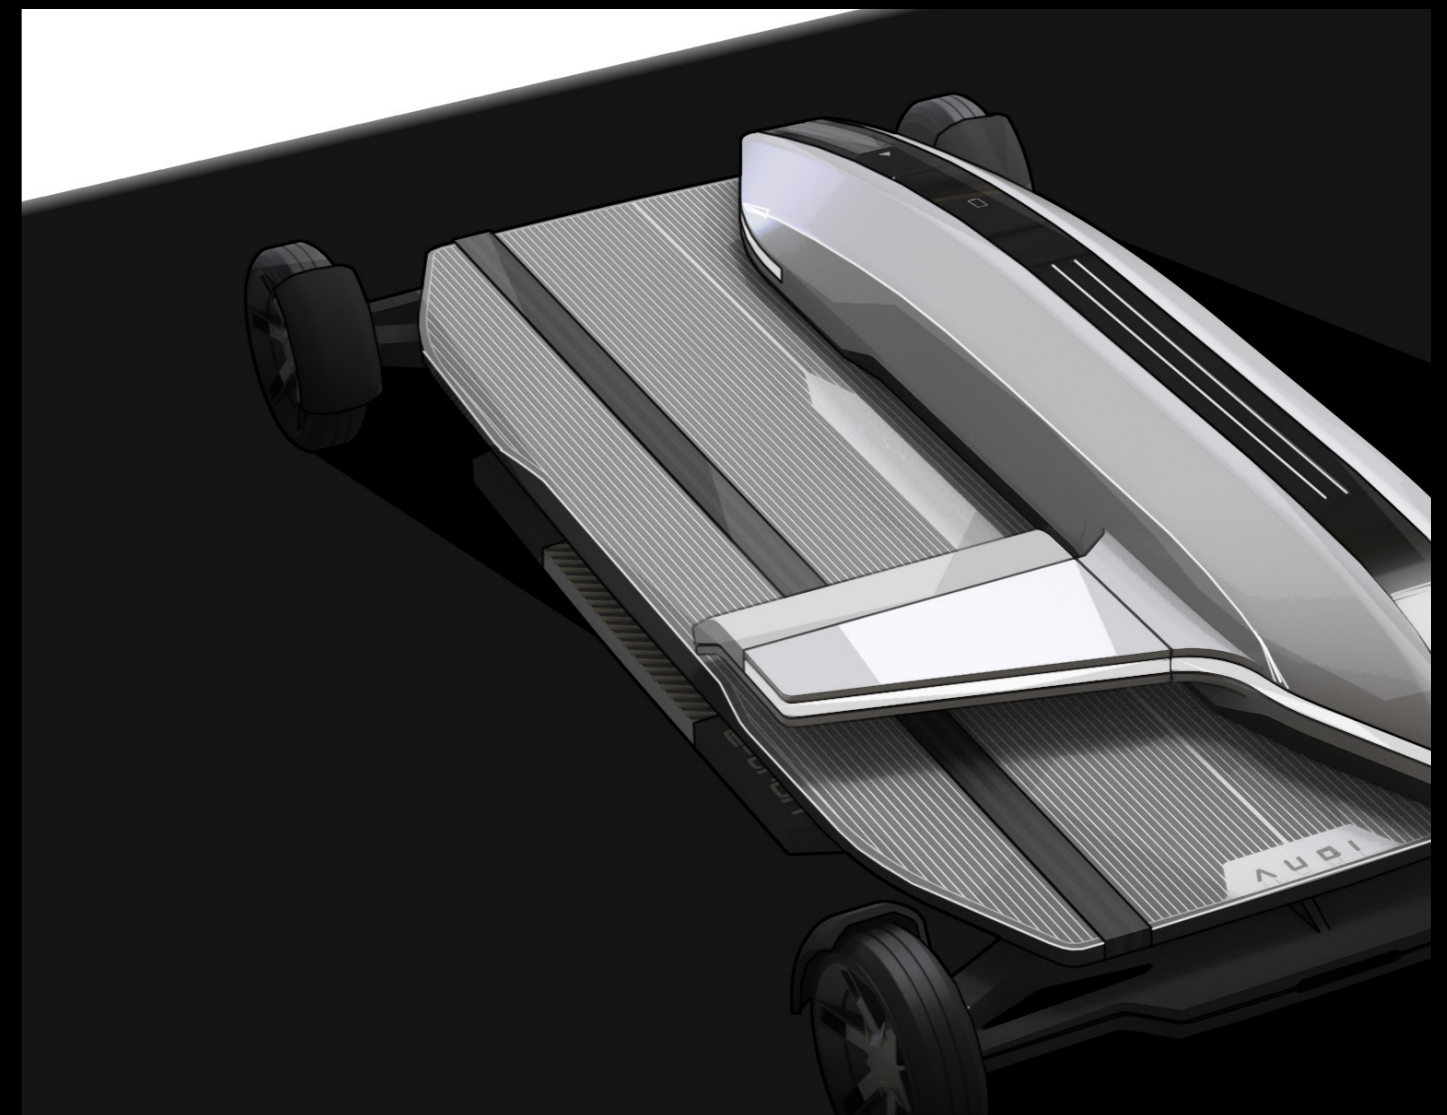

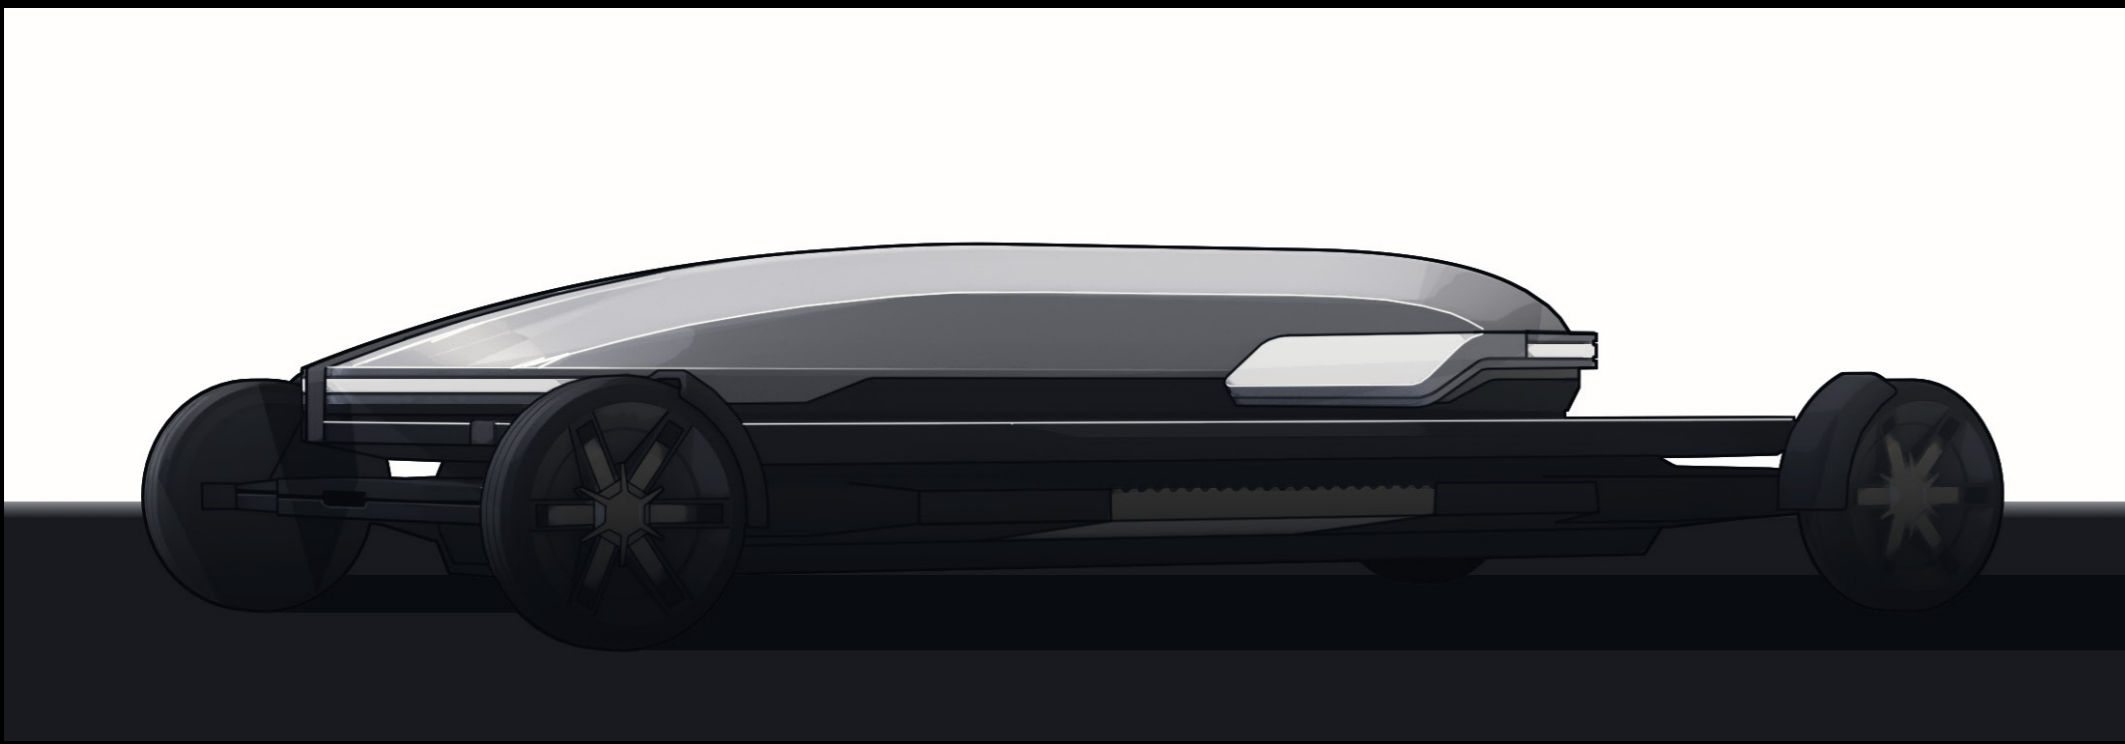

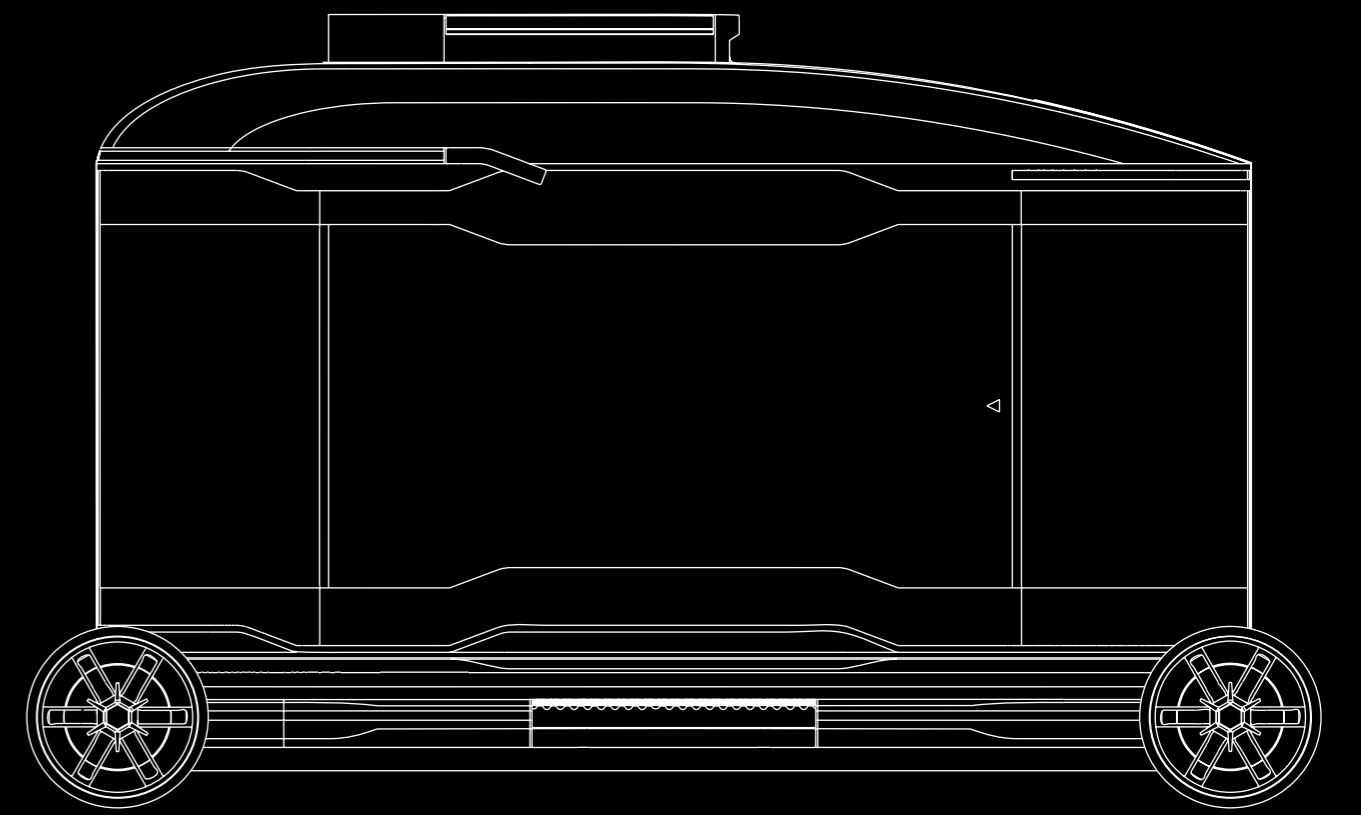

Stacked in Mobile HUB.

Autonomously Deployed.

Expand and Enjoy the Ride!
