# Paris and the City Room

# Paris and the City Room

Collective intimacy and the spectacle

A contextless "City Room"

A perspective architectural model of a city room. The model features a curved wall on the right side with multiple arched windows. The floor is made of light-colored tiles, and there are several sets of stairs leading up to different levels. A small figure of a person is seen sweeping the floor near the bottom left. The overall lighting is warm and focused on the model.

## A contextless “City Room”

Intimacy achieved through:

- Compression of space
- Horizontal and vertical connections
- Enclosure

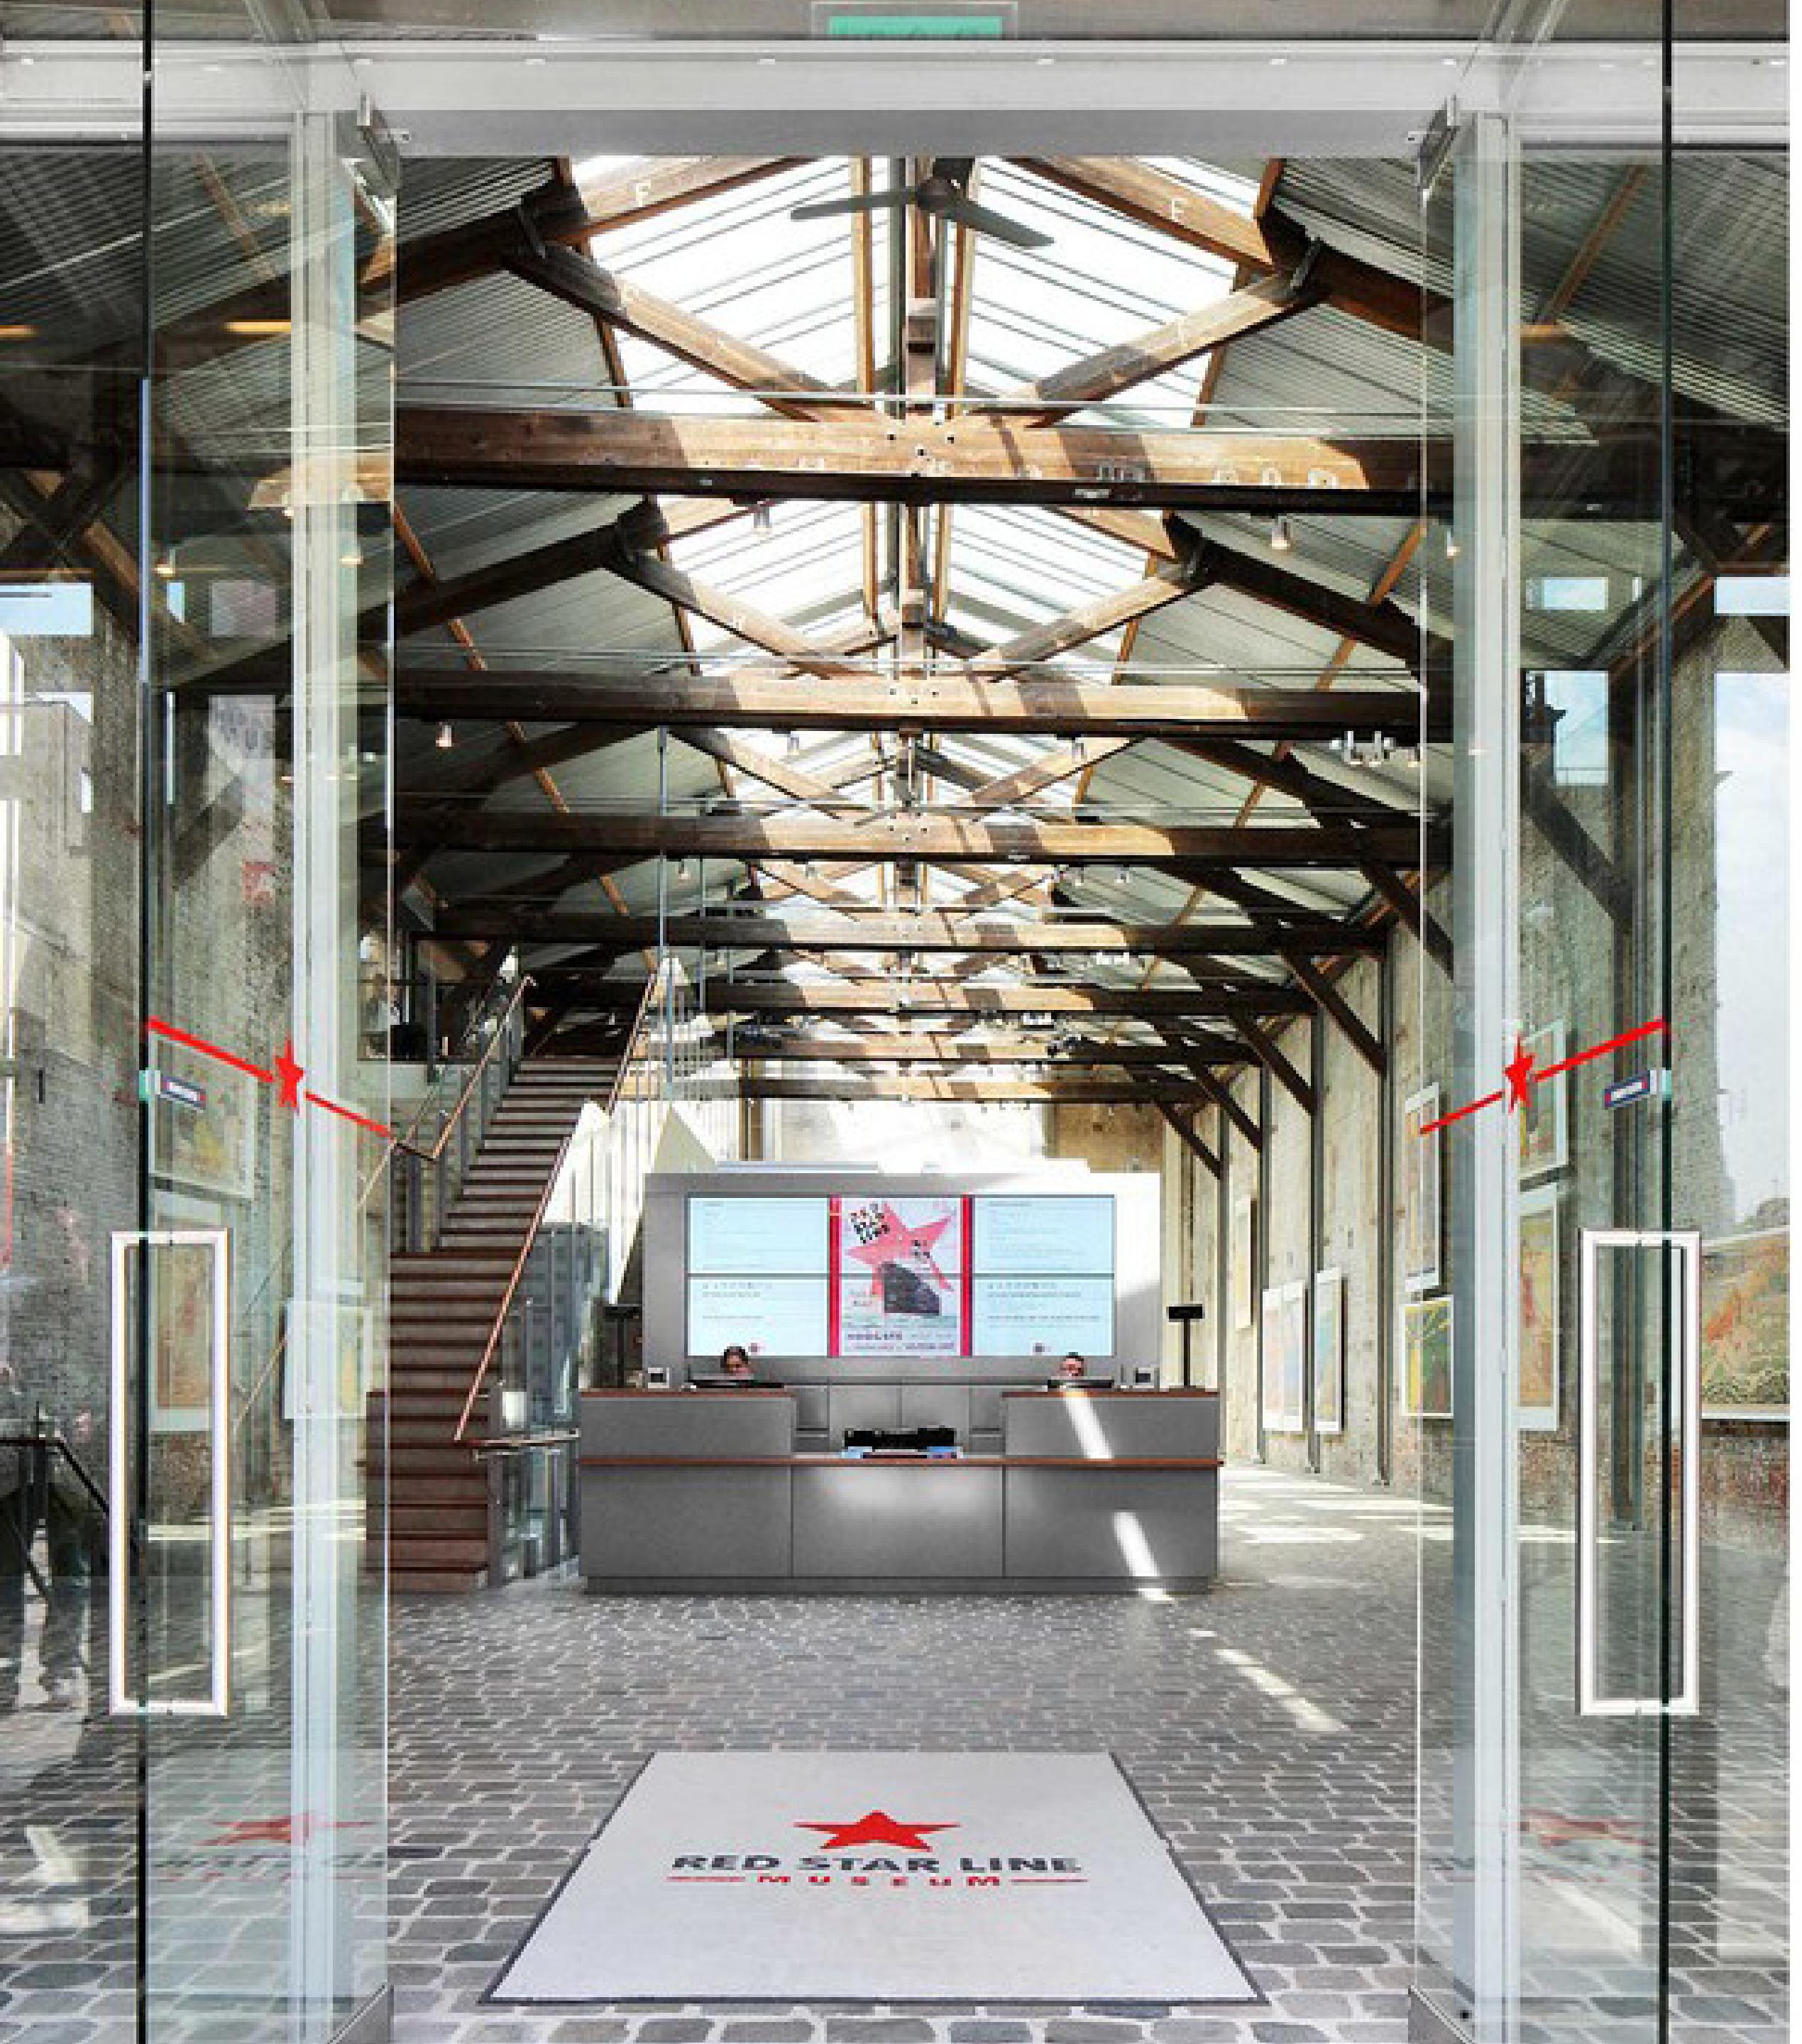

# Antwerp, a harbour city

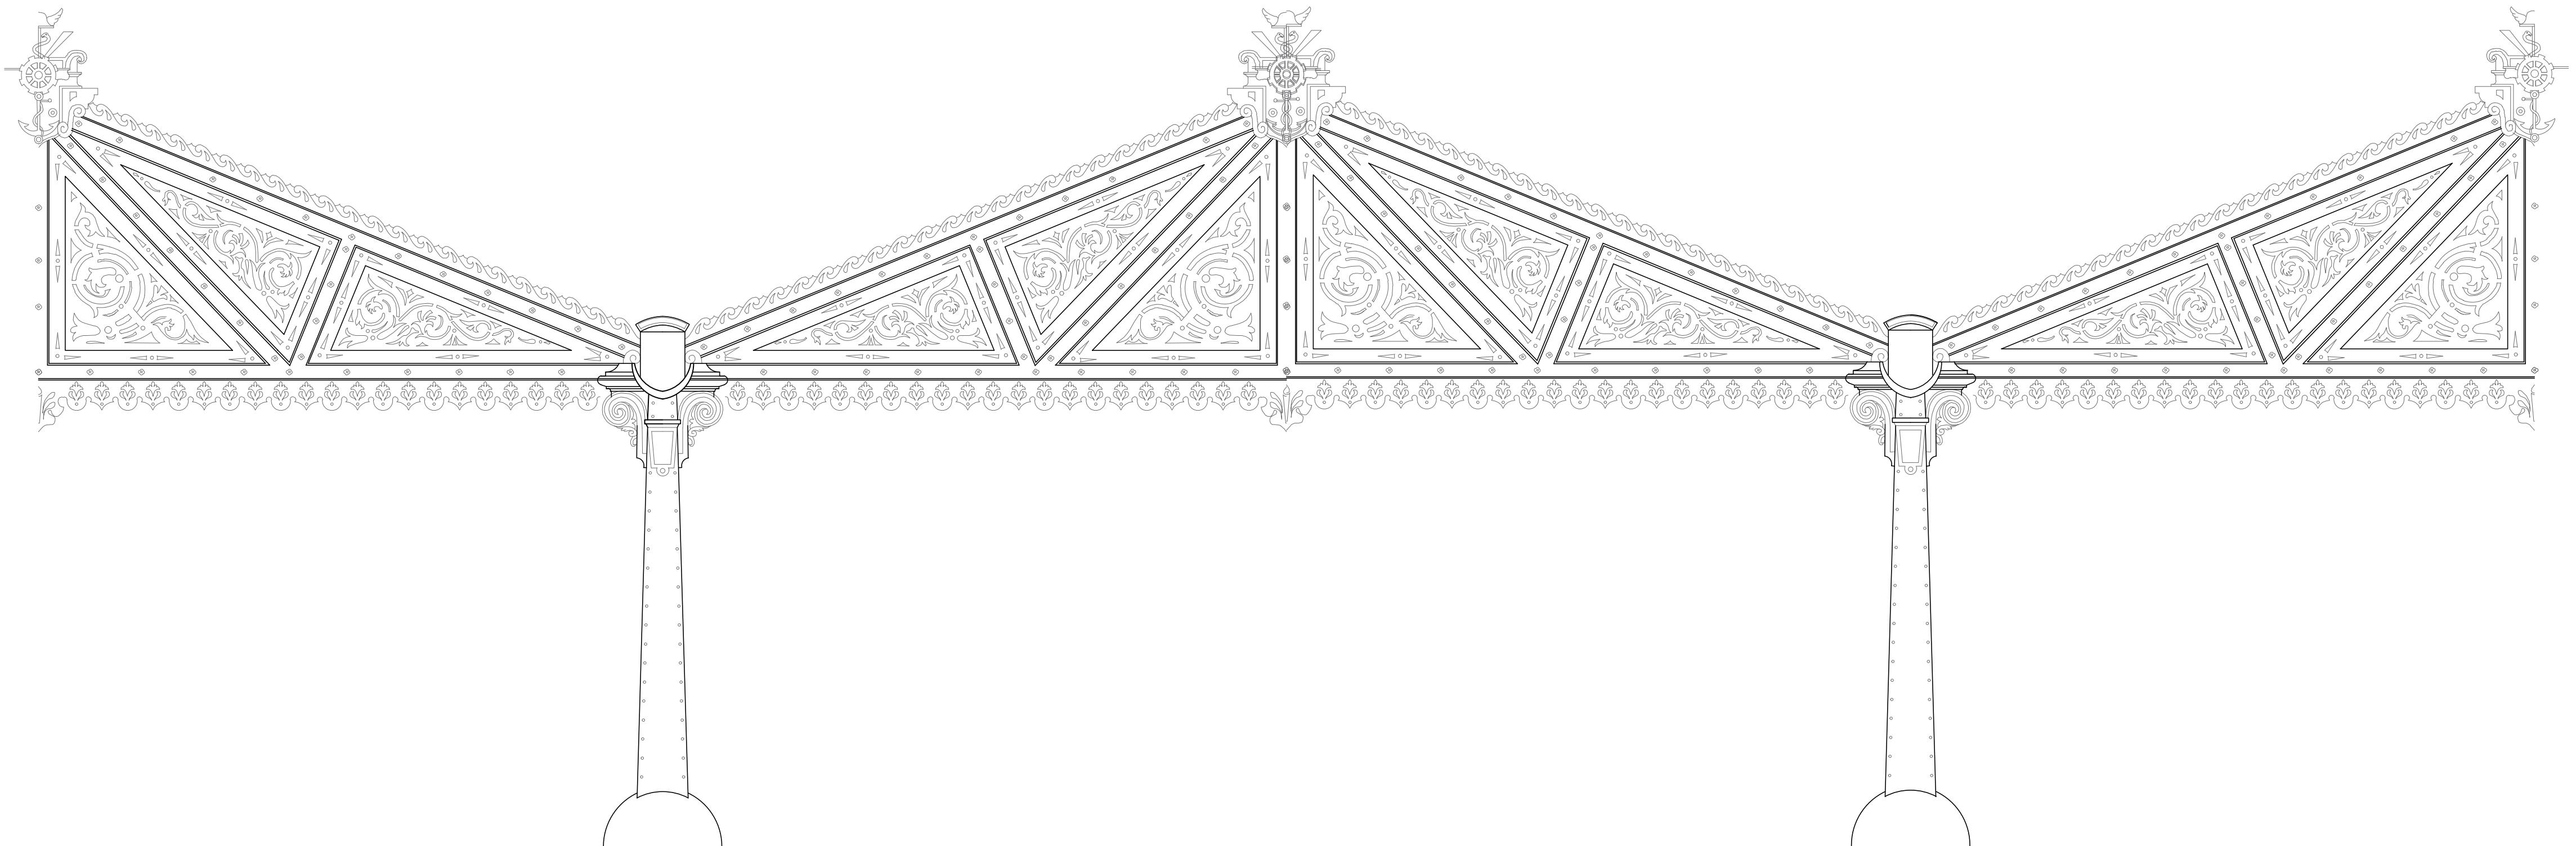

# Fascination

- Heritage in the build environment
- Interest in the history of the place
- Looking for remnants of Antwerp as a harbour city

# Historical: The shedstructure in Antwerp

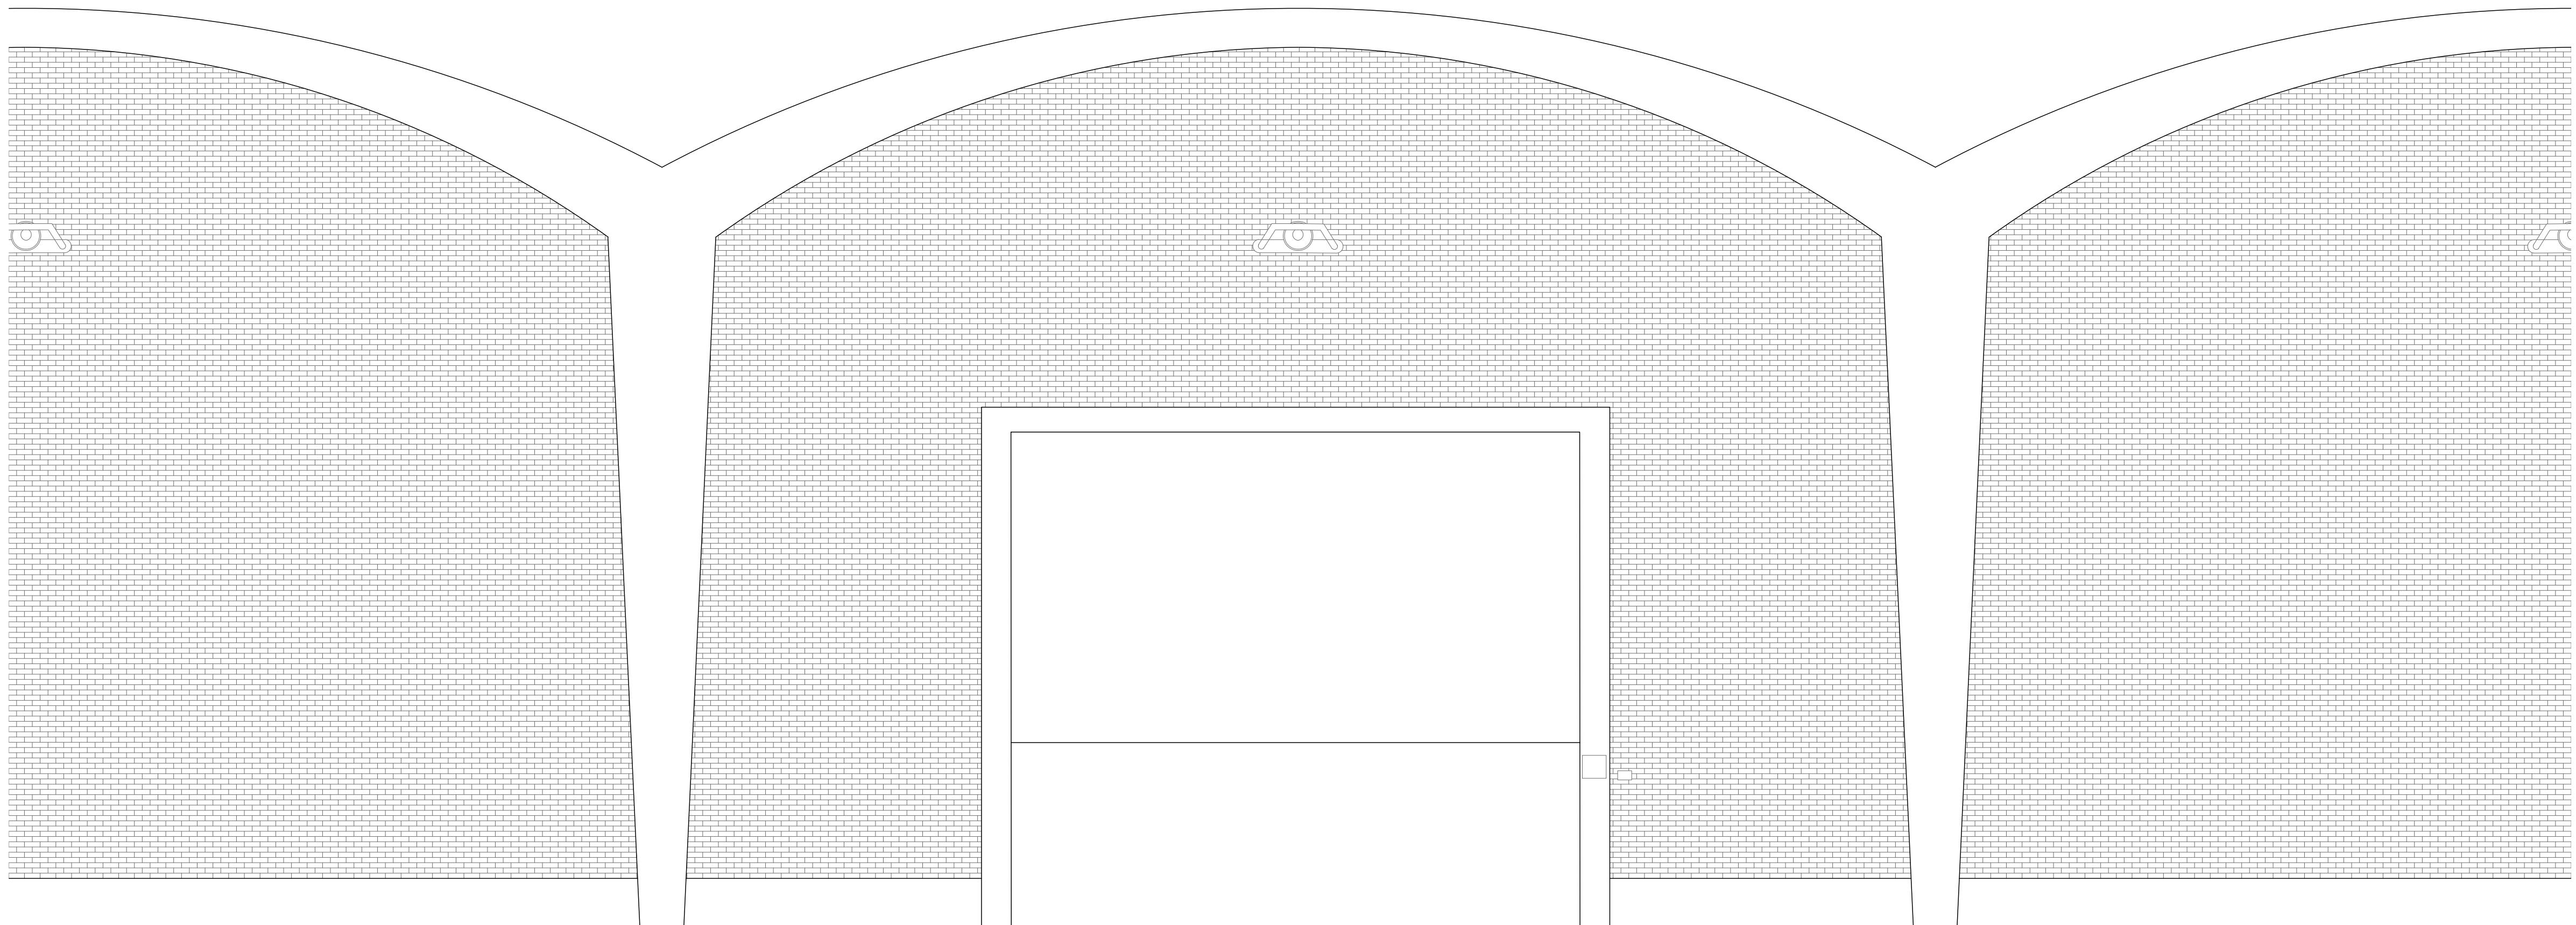

*The quays of the Scheld still remind Antwerp of its origins*

- Sheds along the quay of the Scheld -

# Conclusion

- Collective intimacy by creating bordered spaces
- Reinvigorate a harbour heritage site
- “Koterij” as a guiding theme for further development
  - Opening and redesigning the urban block
  - Create a fully operational theatre space
  - Drawing inspiration from industrial precedents
  - Development of the building as a set of surgeries
  - Create a place that has value for everybody in Antwerp
