## Real Estate at Schiphol Amsterdam Airport

Creating a program to foster the strategic growth of Schiphol based on the knowledge economy

Master Thesis: P5 Presentation 24<sup>th</sup> June 2020

Shrey Yadav Student no. 4912632

07 Strategic Recommendations

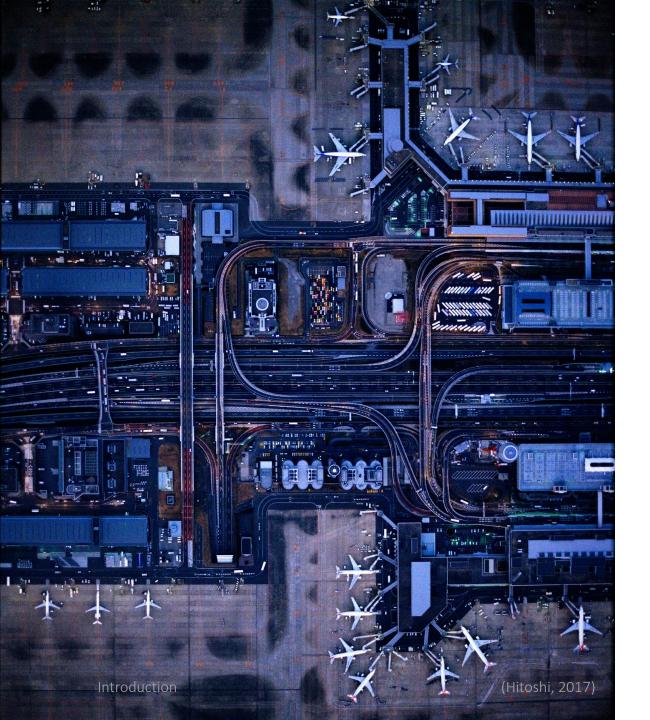

#### Introduction

Airports are now seen as gateways into the city and country, and as key economic generators that highly influence the spatial and real estate developments within their vicinity.

(Güller and Güller, 2003)

As dynamic and complex urban environments with numerous local and international corporations in the area to take advantage of the competitive environment.

(Thierstein and Conventz, 2014)

#### Schiphol Amsterdam Airport

Schiphol Airport - 1989

Schiphol Airport - 2000

This research focuses on commercial office spaces at Schiphol Airport City.

## **Research Aim**

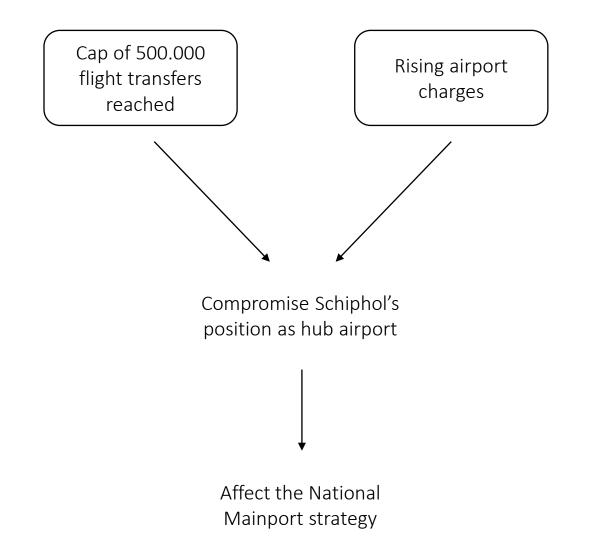

## Produce a strategic plan for a functional program

to utilize the real estate at Schiphol in an optimal manner based on the demands of the corporations

# Schiphol contributes to the Mainport strategy

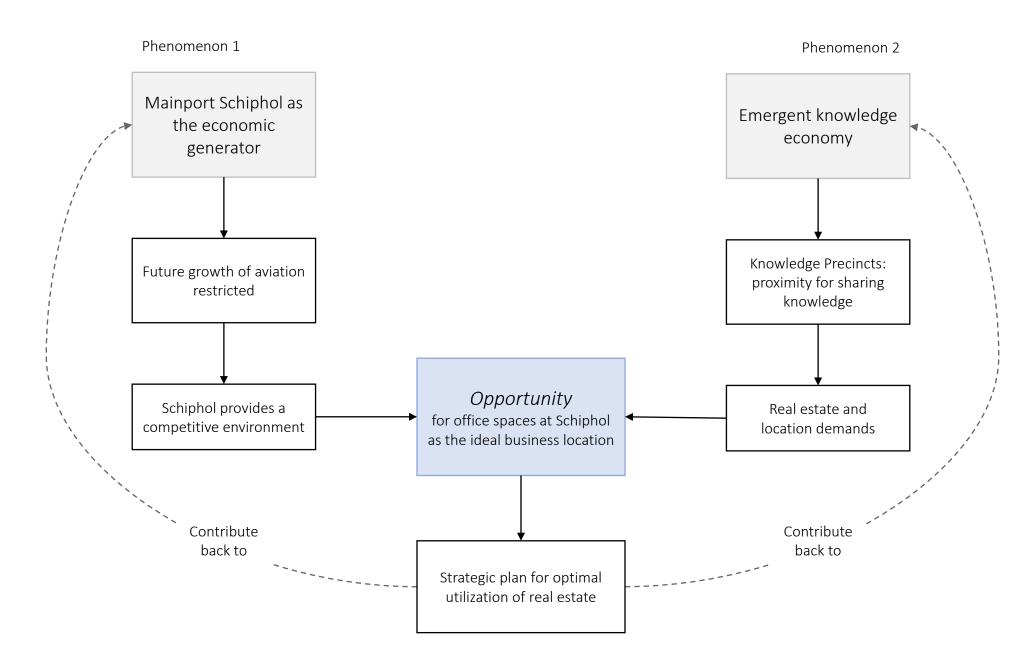

by addressing changes in the knowledge economy

#### **Problem Statement**

Focus on the non-aeronautical businesses and reduce dependence on the core business of aviation.

## **Conceptual Model**

#### **Research Question**

"How can the commercial office real estate at Schiphol Amsterdam Airport help to foster its strategic growth as a Mainport, by facilitating the corporations in the knowledge economy?" How can the commercial office real estate at Schiphol Amsterdam Airport help to foster its strategic growth as a Mainport, by facilitating the corporations in the knowledge economy?

- 1. What is the importance of non-aeronautical businesses for Schiphol as a Mainport?
- 2. How does the knowledge based economy influence the commercial real estate developments around airports?
- 3. How can the commercial real estate at Schiphol facilitate the knowledge corporations?

#### 02 Research Method

#### **03 Literature Review**

01 Schiphol Airport as the Mainport of the Netherlands

#### 01 The Mainport of the Netherlands

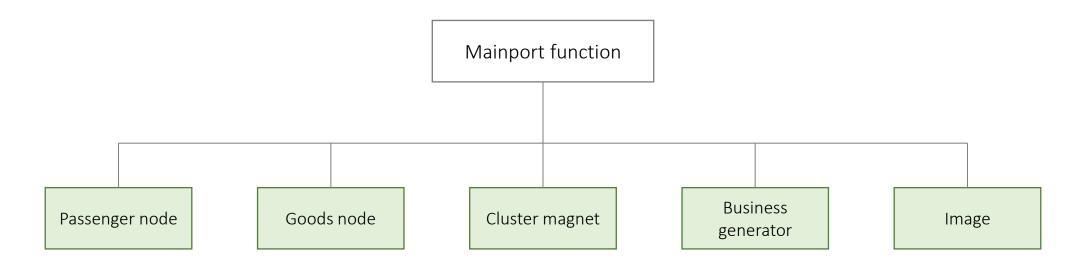

The Port of Rotterdam

The Schiphol Airport

## 01 Schiphol Airport as the Mainport of the Netherlands

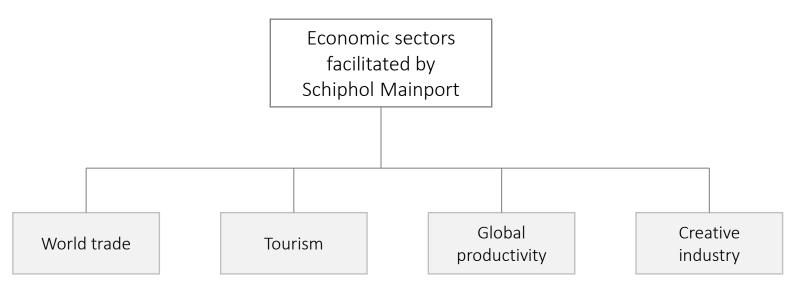

Evolution of the Mainport function into the generator of economic activities

(Priemus, 2001)

## 01 Schiphol Airport as the Mainport of the Netherlands

Evolution of the Mainport function into the generator of economic activities

(Bleumink et al., 2006)

## 01 Schiphol Airport as the Mainport of the Netherlands

Increasing importance of non-aeronautical activities at the airport

- Retail and wholesale
- Industrial park
- Business park
- Research and education
- Distribution centers

(Kasarda, 2000)

Corporations are focused on high knowledge and information flow and locate in knowledge hubs for fast and efficient accessibility

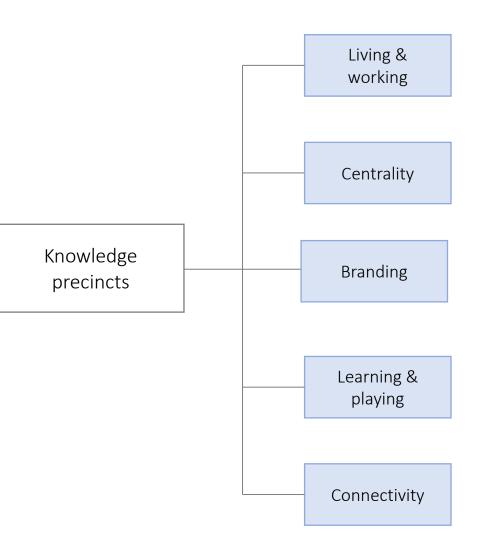

(Powell & Snellman, 2008)

Literature Review | Knowledge precinct

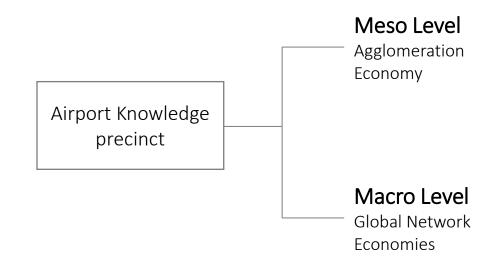

Corporations locate in close proximity in vibrant and well- connected urban locations called knowledge precincts

(Yigitcanlar et al., 2008)

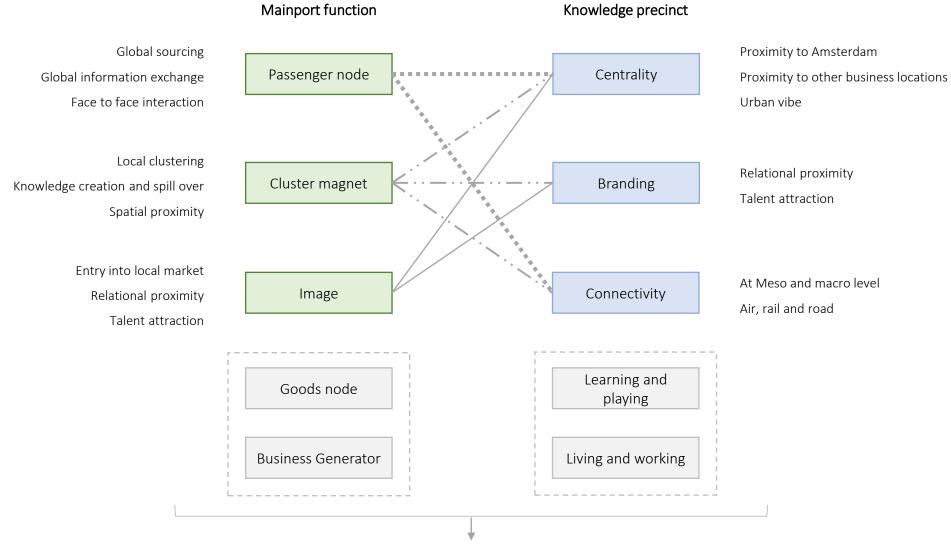

Two external factors that affect generation and sharing of knowledge within an airport setting

(Lüthi et al., 2008)

#### Schiphol in the knowledge economy

External economies of Agglomeration and Global Networks

## 04 Empirical Research

#### **04 Empirical Research**

Real estate occupied by firms has become increasingly important in the knowledge generation and sharing process Lack of scientific knowledge to understand the real estate strategies and demands of knowledge corporations in the airport vicinity

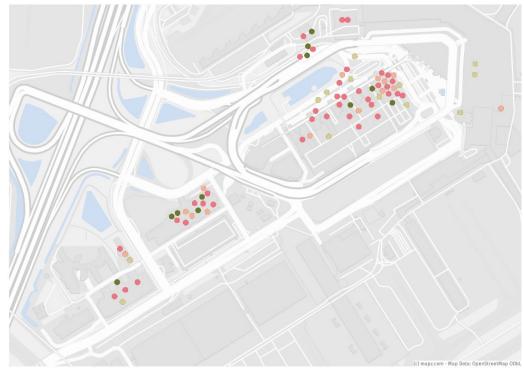

#### Sub-markets at Schiphol

Schiphol CBD

Schiphol East

## Knowledge corporations at Schiphol

Schiphol CBD

- Advanced Producer Services Headquarter
- Advanced Producer Services Branch office

Schiphol East

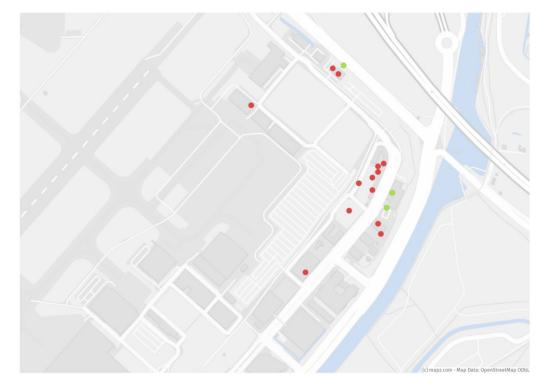

- High Tech Headquarter
- High Tech Branch office

## Knowledge corporations at Schiphol

Schiphol CBD

• International companies

Schiphol East

Dutch companies

#### 3. Expert view

Interview with expert from practice

#### 1. Demand side

Case studies of knowledge corporations Cross case analysis

### 2. Supply side

Interview with office providers at Schiphol

#### 3. Expert view

Interview with expert from practice

### 1. Demand side

Case studies of knowledge corporations Cross case analysis

### 2. Supply side

Interview with office providers at Schiphol

Conclusions and strategic recommendations

1. Demand side: Corporations selected

A. Microsoft Schiphol CBD **B. Samsung** Schiphol CBD C. John Laing Group WTC Schiphol **D. KLM DS** Schiphol East

Empirical research | Demand side

## 2. Supply side: interviews

### A. Schiphol Real Estate

Real Estate Developer

### B. Schiphol Real Estate

Senior manager developer

### C. Co-working provider Chief Financial Officer

### 3. Expert view: interviews

### A. Senior advisor

Real Estate consultancy

### B. Max Hirsh

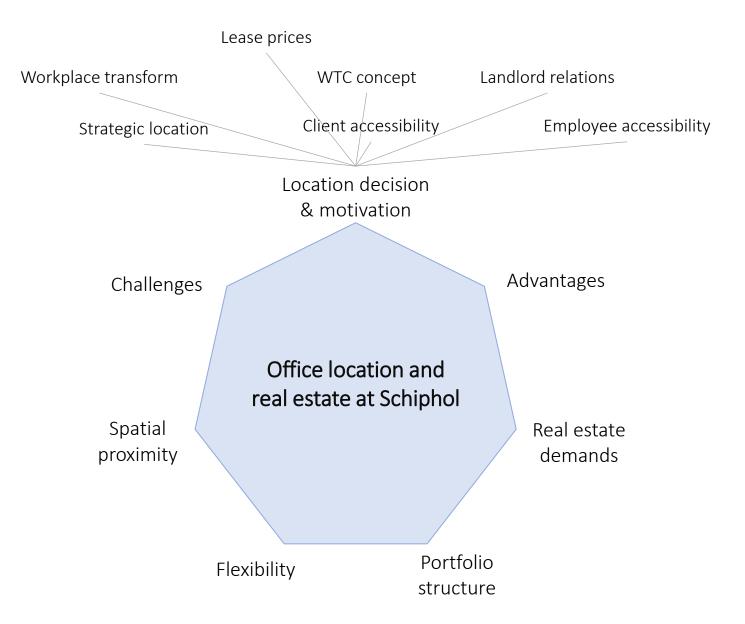

CEO- Airport Urbanism Author- Urban Experts

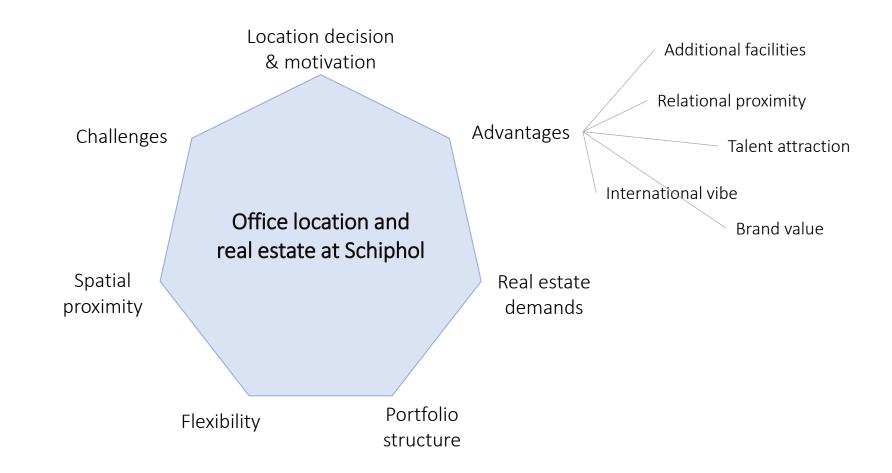

### C. Pieter van der Horst

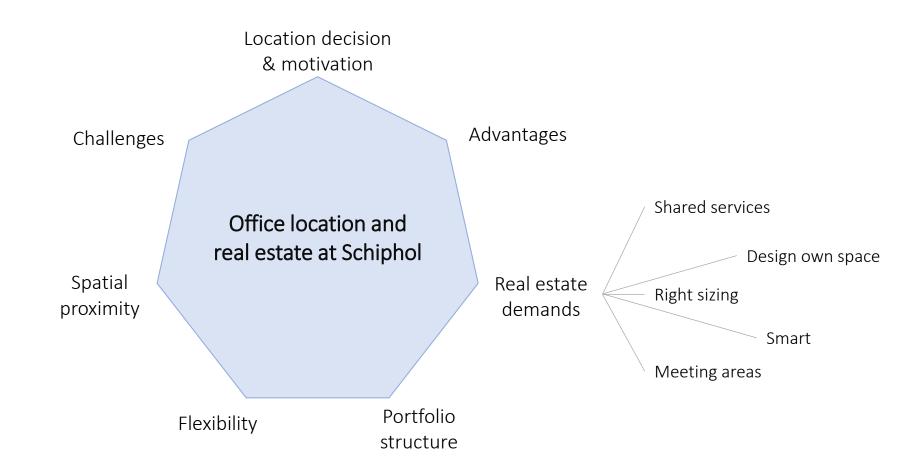

Managing Director- Airea Co-founder- Airport City Academy

## Conclusions

#### Schiphol in the knowledge economy

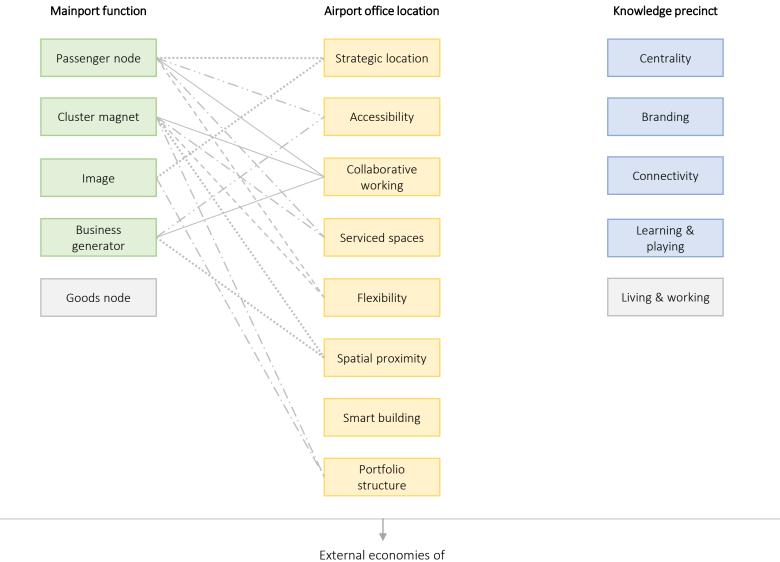

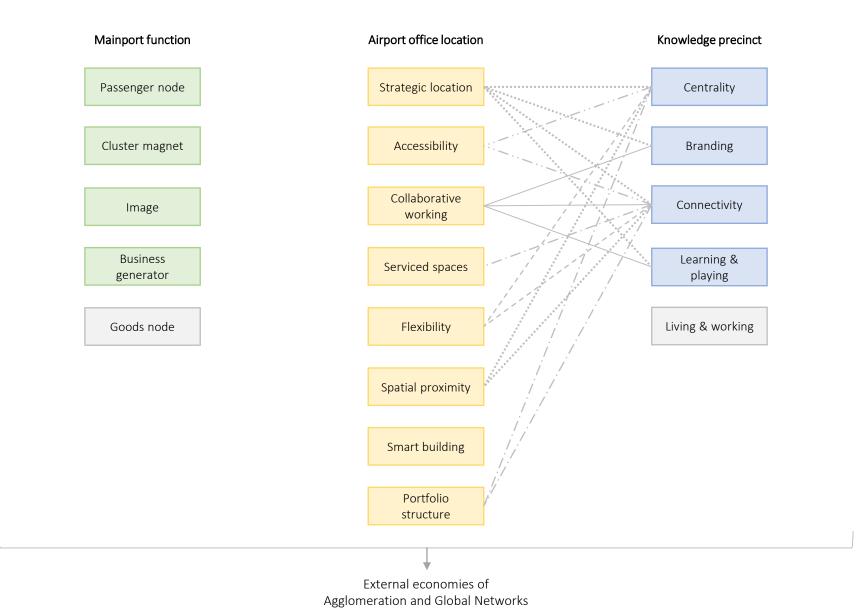

External economies of Agglomeration and Global Networks

#### Schiphol in the knowledge economy

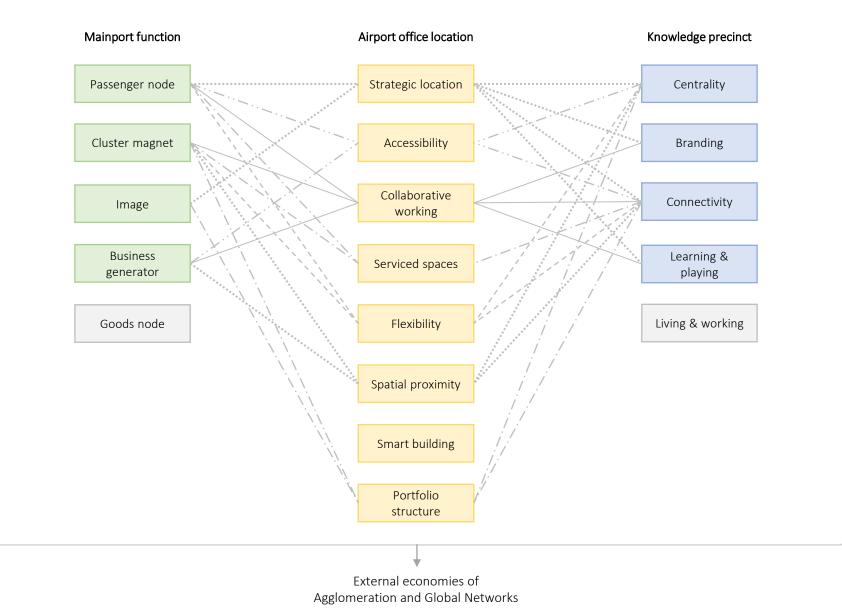

Agglomeration and Global Networks

Conclusions

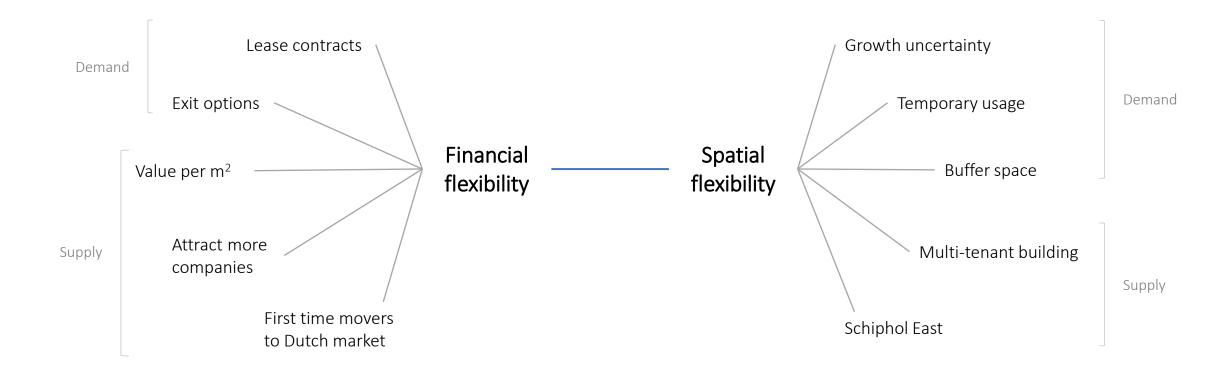

## **07 Strategic Recommendations**

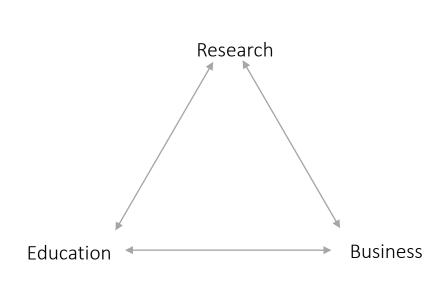

## **07 Strategic Recommendations**

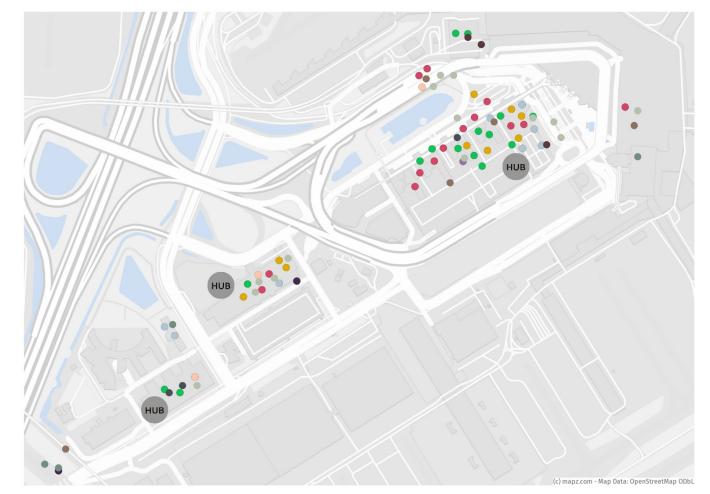

To utilize the real estate in an optimal manner and cater to the real estate demands of the knowledge corporations, based on the empirical research.

## 1. A move towards Flexibility

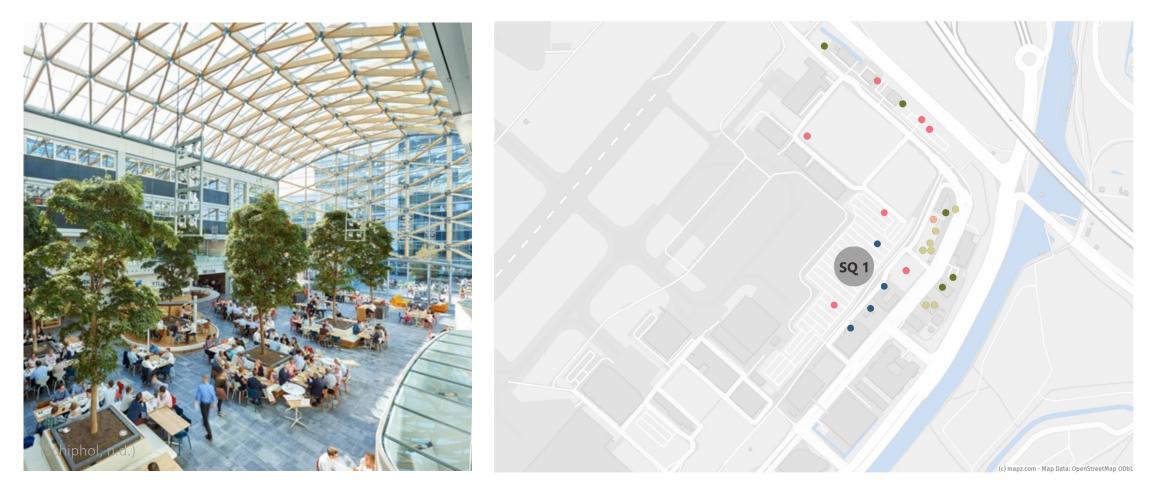

## 2. Create knowledge hubs

Knowledge hubs in Schiphol CBD

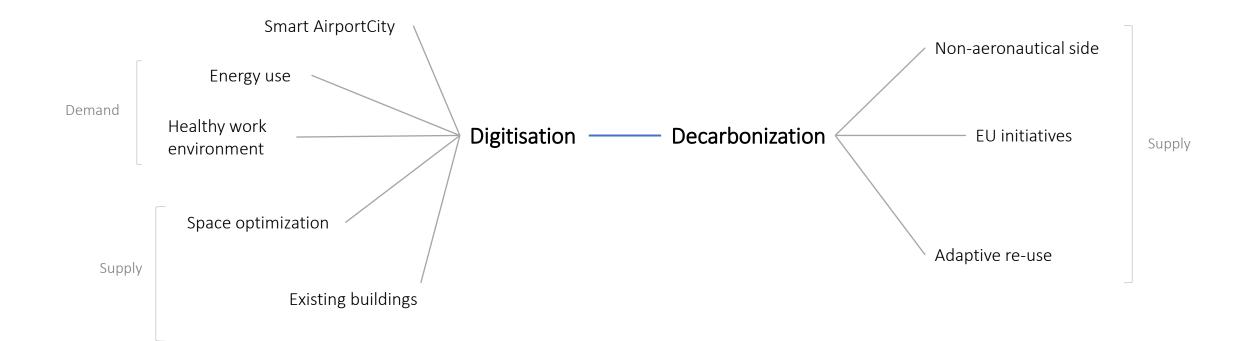

## 3. THE SQUARE 1, Schiphol East

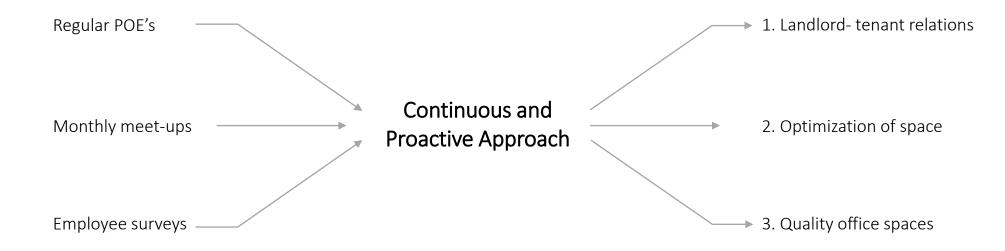

The Base building in Schiphol CBD

THE SQUARE 1, Schiphol East

## 4. 2-D's: Digitization and Decarbonization

### 5. Landlord - tenant interaction

With more research focused around the airports and their influence on the spatial developments, this research brings the three concepts of Mainport Schiphol, Knowledge precincts and the Airport office location together.

# **Final Outcome**

Deeper understanding into the spatial developments around Airports within the emergent knowledge economy

Strategic recommendations for Schiphol to utilize the real estate in an optimal manner

# Dissemination

Schiphol Group: to boost their growth through the real estate

Other **real estate professionals** working particularly with airports and airport cities

**Knowledge corporations** looking to (re)locate in the airport setting

**Researchers** in the field of real estate development, especially focusing on transportation hubs

**Students** in the field of real estate management and architecture

## Case study:

To understand the viewpoint of the demand side, **multiple knowledge-corporations** to be selected as case studies to collect the data.

Case study **selection criteria** for the corporations:

- 1. Located at Schiphol Amsterdam Airport
- 2. Part of the **knowledge economy**, i.e., is a high tech industry or provides advanced producer services
- 3. Occupies an office space offered by the Schiphol Group
- 4. The corporation utilises the **multimodal transportation services** offered by Schiphol extensively, i.e., the company is either a **European headquarter**, or is an **important branch office** of another global corporation.

## In-depth interviews:

Semi-structured interviews with decision makers of the corporations involved in deciding location as Schiphol.

Format suitable to gain a **deeper insight into the topic**, rather than acquire a representative sample

**Questions can be modified** slightly during the process of the interview (semi-structed)

## In-depth interviews:

7 themes identified for the interviews, identified through the knowledge base:

- 1. Nature of the work at the corporation
- 2. Location decision and motivation for Schiphol
- **3.** Accessibility requirements, i.e., dependence on the hub function of Schiphol
- 4. Importance of **face-to-face interaction** and **relational proximity**
- 5. Location of other corporations in the same knowledge precinct, i.e., **spatial proximity**
- 6. Other **push and pull factors** from the Schiphol Airport City
- 7. Long term plans with respect to Schiphol as a business location

| Location decision & motivation |   |  |   |   |
|--------------------------------|---|--|---|---|
| Hub function                   |   |  |   |   |
| Strategic location             |   |  |   |   |
| Multimodality                  |   |  |   |   |
| Accessibility                  |   |  |   |   |
| Real estate aspects            |   |  |   |   |
| Collaborative working          |   |  |   |   |
| Serviced offices               |   |  |   |   |
| Company size                   |   |  |   |   |
| Shared facilities              |   |  |   |   |
| Flexibility                    |   |  |   | 1 |
| Financial                      |   |  |   |   |
| Spatial                        |   |  |   |   |
| Spatial proximity              |   |  |   |   |
| Community vibe                 |   |  |   |   |
| Smart Airport City             |   |  |   | 1 |
| Smart building tools           |   |  |   |   |
| Portfolio structure            |   |  |   | 1 |
| Core/ Peripheral               |   |  |   |   |
| Functional use                 |   |  |   |   |
| Additional aspects             |   |  | 1 | 1 |
| Relational proximity           |   |  |   |   |
| Talent attraction              |   |  |   |   |
|                                | I |  | I | I |

## Strategic Recommendations: Summary

| No. | Strategy                         |
|-----|----------------------------------|
| 1   | Move towards flexibility         |
| 2   | Create knowledge hubs            |
| 3   | The SQUARE 1                     |
| 4   | Digitization and Decarbonization |
| 5   | Landlord-tenant interaction      |
