A. The Recap of Kick-off Meeting

Design for leave-taking

Create a pleasant and self-steering leave-taking experience

Problem & Goal

KLM HR has a vision to empower their employees. Ultimately, their goal is to encourage their employees to become self-steering. This vision applies to not only employees' daily job, but also to the occasionally situations, among which leave-taking is the main scope of this project.

According to the Global Payroll of the Netherlands, there are three types of leave-taking: pay leave, unpaid leave and sickness. Paid leave includes vacation, reduced working hours and maternity; unpaid leave includes strikes and special leaves; sickness includes disability and accident. While the categories are clear in the Dutch laws; in the real situations, not all the cases can be easily classified and processed. In many cases, the situations are complicated, and it could be difficult for the employees, their managers and the employer to define the type of every single leaves with no ambiguity.

What makes the problem even more difficult to tackle is the emotions and the sensitivities of leave-taking employees. When an employee is taking a leave for an emotionally negative reasons, one could be very fragile and sensitive, consequently leads to a poor working performance even when they get back to work. Such situations are hardly improved with any rational management, but can only be approached with empathy and supports. The main challenge is to figure out what kind of role the KLM HR can play in those cases.

Having observed these difficulties, KLM HR wants to know what they can do to support the employees better. Based on the vision of self-steering employees, HR wants to create pleasant and flexible leave-taking experiences. In this project, the first goal is to empathise with employee's leave-taking experiences and to understand the practical restrictions from manager's perspective. And then, to generates some ideas that could solve some of the problems. In the end, to create a design that improves the leave-taking experience aiming at inducing some more self-steering employees.

Assignment & Deliverable

Exploration

Understand the leave-taking experience, needs and wishes of employees.

Understand the experience of supervising leave-taking and the practical restrictions from the managers.

Understand the implementation restrictions and possibilities from HR people.

Creation

Design a concept prototype, including user interfaces and the entire flow. Provide other possibilities and suggestions.

Reflection

Evaluate with employees and the clients. Present the results and provide future recommendations.

Implementation

Involve the people who will possibly implement the concept in the entire process. Provide implementation methods and recommendation.

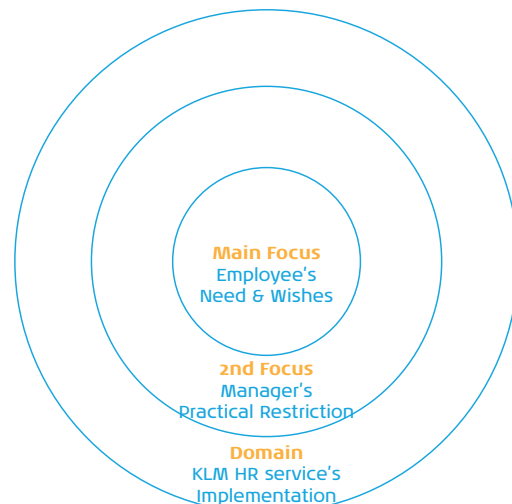

Focus of the research & The research order

The main focus of the project is to understand the experiences and the needs/wishes of the employees.

The second focus is to understand the practical restrictions the managers have.

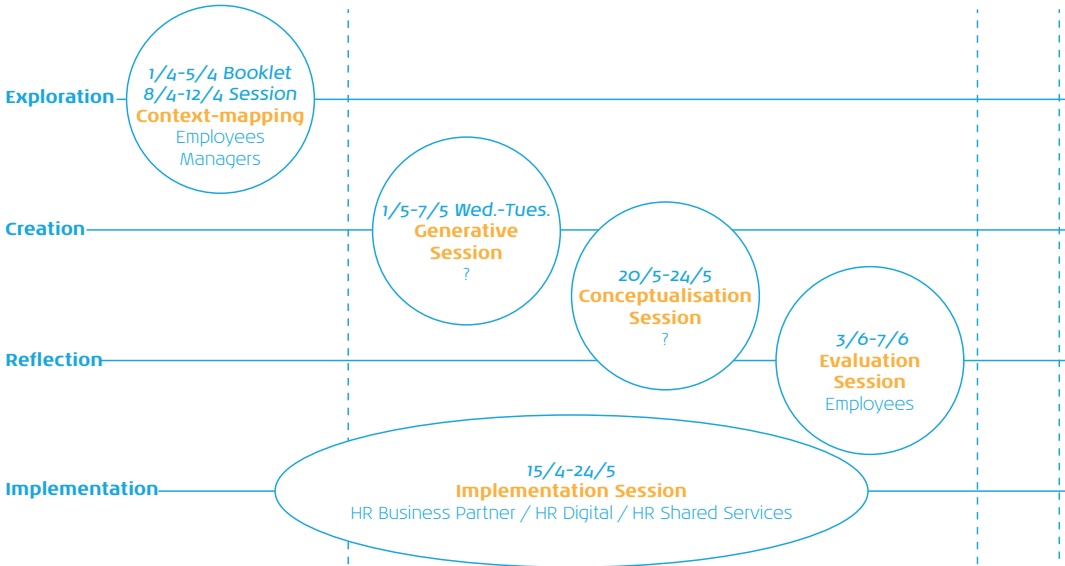

The third focus, which is also the domain of the project, is to understand what is within the scope of KLM HR services, what can be implemented and how to implement the ideas.

The research of the first and second focus will be done simultaneously due to the time limit. The research about the implementation will be done after that and till the end of the project.

Planning

The question mark means the date/participant is not yet decided.

Meetings

The time and date of the midterm meeting should quickly be arranged.

*Fridays are not convenient for most of the people, thus are excluded in the following dates.

Midterm Meeting@KLM
22/4-25/4
Problem Definition

Green Light Meeting@KLM
10/6-13/6
Concept Evaluation

Graduation Presentation@TU Delft
8/7-10/7
Whole Process & Concept Presentation

Context mapping

Keep in mind, it is not about the job title, but about whether you are the one who takes leave or the one who supervises leave-taking.

Employee who takes leave

Goal
The goal is to understand employee's leave-taking experience and their needs and wishes from KLM HR services.

Dates
1/4-5/4 fill in the booklet themselves
Any time in 8/4-12/4 for the interview sessions

Requirement
6 people who are willing to...

1. Share their experience of leave-taking. It is even better if they had difficult leave-taking experience to share.
2. Write and speak English. Not necessarily have to be fluent.
3. Fill in the booklet and participate the 1 hr context mapping interviews.

Manager who supervises leave taking

Goal
The goal is to understand manager's leave-taking supervision experience and their needs and wishes from KLM HR services.

Dates
1/4-5/4 fill in the booklet themselves
Any time in 8/4-12/4 for the interview sessions

Requirement
6 people who are willing to...

1. Share their experience of supervising leave-taking. It is even better if they had difficult supervision experience to share.
2. Write and speak English. Not necessarily have to be fluent.
3. Fill in the booklet and participate the 1 hr context mapping interviews.

B. Consent Form for Context-mapping Research

Introduction to the research project

Thank you for participating in this research project. I am an Industrial Design Engineering student researching the topic of leave-taking in KLM. This project aims at creating a pleasant and self-steering leave-taking experience.

Using "context-mapping" design techniques, my goal is to gain a better understanding of employee's work activities and your experiences of taking leave. With your help, we develop a better HR services for leave-taking management in KLM, together in co-creating sessions.

Your participation to the research consists of the following activities:

- Receiving a personal booklet
- Using the booklet to map out your work activities and your leave-taking experiences
- And finally being invited to a one-hour recorded interview in which you will explain what you fill in the booklet and do a short exercise.

Thanks again for your participation. Feel free to contact me if you have any question.

Ginny Yang

Consent statement

You are being invited to participate in a research study performed by Ginny Yang from TU Delft. The purpose of the research is to understand employee's leave taking experience and the needs and wishes from KLM. The data will be used for creating leave-taking journeys and designing new experiences/services for the employees in KLM.

Your participation in this study is entirely voluntary and you can withdraw at any time. You are free to ask any question.

To the best of our ability your answers in this study will remain confidential. I will minimise any risk by storing all information solely and internally, share data and insights anonymously with only KLM project owner(s), participants and TU Delft supervisors, and adequately secure and store the research after the the completion of the project.

C. Sensitising Booklet for Employees and Managers

**My
leave-taking
experience in
KLM**

KLM

What is leave-taking?

According to the Global Payroll of the Netherlands, there are three types of leave-taking: pay leave, unpaid leave and sickness. Paid leave includes vacation, reduced working hours and maternity; unpaid leave includes strikes and special leaves; sickness includes disability and accident.

Welcome!

Thanks for contributing to this project!

In preparation of the interviews I have developed this booklet for you. Filling out the booklet will help you during the interview. Inside are short daily tasks that will only take you 5 to 10 minutes. The idea is to do the assignments spread out over one work week.

Have fun and good luck with your assignments this week. Remember: you can be as creative as you like!

Hint 1

Don't give the booklet to anyone, just bring it to the interview.

Hint 2

The only purpose of the research is to improve the services of KLM. You will not be judged and no one will be judged because of what you write.

Hint 3

Feel free to write anything. Everything you write will be anonymous and confidential.

For questions or remarks you are welcome to contact me at:
Phone: + 31 6 26734699
Email: ginnyctyang@gmail.com

Who am I?

I'm Ginny Yang from Taiwan, a TU Delft Industrial Design Engineering student who focus on experience and service design. I'm currently doing graduation project about leave-taking experience in KLM. My goal is to create a better leave-taking experience with you and for you!

Who are you?

Your name:
Your date of birth:
Your department:
Your job title:
Your working years in KLM:
Numbers of people in your team:
Marital status:
How many children do you have:

Day 1 What are your work activities?

Step 1

Think about all the activities you do in your work and place them on the pie chart according to how much time do you usually spend.

Hint 1: you can decide your own categories

Hint 2: trust your instinct. It doesn't need to be accurate

e.g.

- Reporting
- Phone call meeting
- Face-to-face meeting
- Face-to-face talk
- Emailing
- Checking
- Planning
- Machine Operation
- Solving staff's problem
- Solving customer's problem

Day 2 Who are the people around you in KLM?

Step 1

Think about the people around you in KLM, and place them on the chart according to how closely they are to you and whether you have personal connection with them.

Hint 1: please include your colleagues, boss, managers, staffs, HR people and whoever you usually work with/talk to.
Hint 2: please write the "job title + name". The name can be a nickname or an abbreviation, as long as you can recognise who you refer to.

Hint 3: personal connection here means you can talk with the person not only about the work but also about your feelings and even your personal life.

- e.g.
- Staff Tim
- Staff S.D.
- Colleague ABCD
- Colleague L.Y.
- Boss XXX
- HR S.

Day 3 How were your leave-taking experiences?

Step 1

Think about what leave-taking experiences you had in KLM. Put them on the chart according to how frequent you had them and how difficult the experiences were.

Day 4 The most difficult leave-taking experience

Step 1

Try to recall the most difficult leave-taking experience. What happen? Show the entire process on the timeline, from the time that the incident happened to the time that you came back to work.

(What happened in the beginning?)

(What happened when you asked to take leave?)

(What happened after you come back to work?)

(What happened when you were taking leave?)

(What happened after you come back to work?)

Step 2 Draw your mood chart.

Day 5 The future leave-taking experience

Step 1

What do you wish to have/not have in the leave-taking process? Try to imagine what KLM HR and your manager can do better in the future.

Hint: be creative and bold!

1. When the incident happen...

I wish...

I wish there's no....

2. When asking for leave..

I wish...

I wish there's no....

3. When you are taking leave...

I wish...

I wish there's no....

4. When you go back to work...

I wish...

I wish there's no....

My leave-taking supervising experience in KLM

My name:

***What is leave-taking?**

According to the Global Payroll of the Netherlands, there are three types of leave-taking: pay leave, unpaid leave and sickness. Paid leave includes vacation, reduced working hours and maternity; unpaid leave includes strikes and special leaves; sickness includes disability and accident.

***What is supervising leave-taking?**

According to the KLM Absence Policy, the manager is responsible for ensuring the employees do not take unnecessary leaves of absence, and is also responsible for a successful progression of the absence and re-integration trajectory.

Welcome!

Thanks for contributing to this project!

In preparation of the interviews I have developed this booklet for you. Filling out the booklet will help you during the interview. Inside are short daily tasks that will only take you 5 to 10 minutes. The idea is to do the assignments spread out over one work week.

Have fun and good luck with your assignments this week. Remember: you can be as creative as you like!

Hint 1

Don't give the booklet to anyone, just bring it to the interview.

Hint 2

The only purpose of the research is to improve the services of KLM. You will not be judged and no one will be judged because of what you write.

Hint 3

Feel free to write anything. Everything you write will be anonymous and confidential.

For questions or remarks you are welcome to contact me at:

<p>Identify your target group Target group</p> <p>Identify the target groups - Who are the main target group of the problems/you are responsible for? - What are their features? - What do they need?</p> <p>Check the target groups - Do the design meet the requirements of the target group?</p>	<ul style="list-style-type: none"> - Managers do not share their way of management frequently. There are lack of opportunity for them to learn from each other and improve their managing skills. - The leave taking procedures and systems are very different across various departments in KLM. These developments and experiences in leave-taking flow are not shared knowledge between different teams. 	<p>Some managers have a close relation with their staff. This kind of 'family relations' makes it difficult for them to be strict to their staff such as making an unwelcome decision.</p>	<p>For managers who want to check the staff's presence status, they can only go through the system one-by-one. This could be impractical for managers with a large team.</p>
<p>There are important or emergent events, such as the graduation ceremony of their children, that employees really want or need to take a leave. These events, however, do not belong to any entitled leave categories. For staff without a roster it is not a problem as they have little restriction in taking a normal employee leave. The problem occurs to staff work in shifts: They cannot take an employee leave if the minimum on-duty personnel has reached on the desired day. In the end, whether they can take the leave depends on their managers to make exceptions for them or not.</p>	<p>The CLA regulations, the rostering system, the leave-taking system and the overview of employees and their skills are all separate in E&M. Such discrete systems and the disconnected information hinder roster planners, managers and employees from doing shift swaps.</p>	<p>Employees in E&M cannot check the rosters of their colleagues of the same function, leading to get another barrier to swap the shift</p>	<p>Shift swapping is not facilitated in some divisions such as in-flight.</p>
<p>The leave-taking request, approval and register systems are now require several manual inputs which could be generated accordingly. For example, employees have to fill in their own email, manager's name and for how long they are taking the leave which should be automatically calculated when they input the start and end time of the leave.</p>	<p>Most of the leave requests have nothing to do with managers. The managers only check the quota for leave and approve accordingly. Such an approval control does not mean anything to the managers while it troubles them and employees in leave taking process.</p>	<p>Some people, especially those in high positions, do not need to report to anyone when they take leave. If they forget to register their leave, which happens frequently, HR will not be able to track their leave days.</p>	<p>The leave-taking system and the agenda systems are not connected. When employees take leave, they have to mark that they are away manually in their agendas, which is not convenient for them, especially when they use multiple work agendas.</p>

 <p>#1 Rostering Unpredictable rostering result ↓ difficult private life planning <i>Problem</i></p>	 <p>#2 Rostering Aging issue ↓ difficult rostering <i>Problem</i></p>	 <p>#3 Shift Swapping Inefficient communication for swapping shift <i>Problem</i></p>	 <p><i>Problem</i></p>

<p style="text-align: center;">Understand</p> <p style="text-align: center;">Existing Problems</p> <hr style="width: 100px; margin: auto;"/> <p>Discover the problems</p> <ul style="list-style-type: none"> - What are the problems existed in your responsible group? <li style="padding-left: 20px;">- What is more severe? - What do you want to solve first? <p>Check the problems</p> <ul style="list-style-type: none"> - What problems/wishes I should consider in the design? <li style="padding-left: 20px;">- What can I solve? <li style="padding-left: 20px;">- What can't I solve? 	<p>After they receive a new rostering, employees frequently swap shifts with their colleagues for a better personal planning. At current stage, they can only communicate through emails and thus pollute their email boxes.</p>	<p>In E&M, the regulation states that one does not need to work in night shift if one becomes 60. But as the average age of employees has reached 57, it has become difficult for them to arrange enough people in night shift, especially in the teaming settings.</p>	<p>The rosters are unforeseeable to work-in-shift staff, it is therefore inconvenient for them to plan their private life in advance. They do not feel they have enough grip on their life.</p>
<p>There is a system that predicts the workload/workforce and thereby determines the quota of leave-taking. This quota and the status is not visible to the employees. They need to rely on their managers to check the leave-availability for them. This is inconvenient for both employees and managers, consequently leaving employees feel unpleasant when they do not get their leave without a clear reason.</p>	<ul style="list-style-type: none"> - The workload is not well predicted enough in E&M. - The workforce is not well predicted enough in Ground Services. - Managers find it difficult to grant their staff leave due to the poor workload or workforce prediction. 	<p>Most employees are anxious about not getting the holiday they want, so they plan it way ahead and use up all the leave days early in the year. The consequence is that they do not have spare leave days for unforeseen or emergent situation. On the other hand, the other employees cannot take a leave when necessary as all the quota of leave-taking are fully claimed.</p>	<p>It is not easy to plan holidays on popular season for everyone. This is particularly a great deal for those who wish to enjoy the summer vacation with their young children.</p>
<p>Not all of the managers can meet their staff regularly. Some managers have to supervise excessive employees and some have different agendas than their staff. It is hard for those managers to know their staff personally or to empathise with their difficult situations. As a consequence, employees do not feel supported by their managers and have no one to talk to about their problems.</p>	<p>Employees with certain jobs are more likely to have certain health issues. For example, there is a greater portion of cabin crews having back pain issue than the other staff. KLM Health Services are trying to solve these problems but the effect so far is limited.</p>	<p>The employees who work in shifts are more likely to be ill when they turn older as it can be seen from the relatively high sick rate in the shift work departments. Some managers suggest these elder employees to switch to regular working hours, but not everyone is willing to change, considering the payment is less.</p>	<p>Every employee has different needs, problems and wishes in different stages of his/her life. This means that a stationary working contract doesn't always match their lifestyles. For the employees who have young offspring tend to be overloaded with taking care of their children. This could be a struggle between working more but less healthy and working less but less disposable income.</p>
<p>It is not easy for managers and for employees to know what resources KLM have for sick employees.</p>	<p>Some teams have higher sick rates, this inevitably reduces the quota of normal leave-taking constantly.</p>	<ul style="list-style-type: none"> - Whenever managers want to arrange KLM leave for their staff, they can only check the leave balance of the staff from mailbox. - The KLM leave balance is presented differently to employees from it does to managers. The unit shown to employees is in 'percent' while the unit shown to managers is in 'day'. - The amounts of leave balance derived from two different units (percent and day) do not meet each other in small digits. 	<p>Various kinds of leaves are scattered in different systems. Managers do not have an overview over absenteeism status of their staff.</p>

User research

User research

Context-mapping

- the experts of their experiences
- Small exercises
- Latent needs

User research

10 managers+employees in

- Inflight Services
- Ground Services (Passenger Services & Planning)
- E&M (Hangar 14)
- Commercial
- Digital, IT & Technology

User research groups & patterns

Non-shift & Small team

e.g. Commercial, IT, HR

- Flexibility of leave taking & holiday planning: **very high**
- Frequency of interaction between employees & managers: **high**
- Sense of teamwork: **high**
- Regulation & System & Workflow requirement: **flexible but principled**

Non-shift & Big team

e.g. Commercial, IT

- Flexibility of leave taking & holiday planning: **very high**
- Frequency of Interaction between employees & managers: **low**
- Sense of teamwork: **very low**
- Regulation & System & Workflow requirement: **clear, accessible, self-serving, self-explanatory**

Shift & Big team

e.g. Inflight, ground services, E&M

- Flexibility of leave taking & holiday planning: **very low**
- Frequency of Interaction between employees & managers: **very low**
- Sense of teamwork: **very low**
- Regulation & System & Workflow requirement: **clear, accessible, self-serving, self-explanatory, predictable, integrated**

Shift & Small team

e.g. E&M, IT

- Flexibility of leave taking & holiday planning: **low**
- Frequency of Interaction between employees & managers: **high**
- Sense of teamwork: **very high**
- Regulation & System & Workflow requirement: **flexible but principled, predictable, integrated, adaptable**

User research problems & wishes

- Rostering** Unpredictable rostering result > difficult private life planning
- Shift-swapping** Inefficient communication for swapping shift
- Holiday planning** Imbalanced holiday planning
- Leave regulations** Untitled leave types
- Leave availability** Poor workload/workforce prediction
- Leave taking** Redundant manual operations
- Agenda** Leave-taking system and agendas are independent
- Health** Choosing between health and salaries
- Sickness** Bad consequences of high sickness
- Leave-taking supervision** Unclear leave balance

Future rostering team
problems & wishes ▶ requirements

- Rostering** Unpredictable rostering result > difficult private life planning
- Shift-swapping** Inefficient communication for swapping shift
- Holiday planning** Imbalanced holiday planning
- Leave regulations** Untitled leave types
- Leave availability** Poor workload/workforce prediction
- Leave taking** Redundant manual operations
- Agenda** Leave-taking system and agendas are independent
- Health** Choosing between health and salaries
- Sickness** Bad consequences of high sickness
- Leave-taking supervision** Unclear leave balance

Needs & KLM Values

Needs in leave-taking

- I am understood & trusted (e.g. making decisions)
- I am appreciated & supported (e.g. difficult situations)
- I am empowered & encouraged (e.g. go further, try)
- I am in control & enable (e.g. work & life)

KLM values KLM Compass

Optimal staff behaviour

- Reach out
- Take ownership
- Be competent
- Go further

Optimal leadership

- Connect
- Set-up for success & result
- Guide
- Challenge & inspire

Needs in leave-taking & KLM values

When/How can we use
the research result?

Hands-on Session

When to use it?

1

When to use it?

Two timings for using the
Leave-taking
Design Toolkit

Timing A

When you want to solve a problem

Timing B

When you are responsible for
designing/developing something
that is related to leave-taking

How to use it?

2 How to use it?

Follow the five steps

1. Sort the cards according to the colours.
2. Choose either timing A or B, follow the steps.
3. Read the action cards and read the cards that are related to the questions on the action cards.
4. Write down the answers and insights on paper.
5. Select the ideas that are more relevant or potential, and create a coherent concept out of it.

How to use it?

Follow the five steps

1. Sort the cards according to the colours.
2. Choose either timing A or B, follow the steps.

How to use it?

A Timing A Let's check your design!

- **The problem I want to solve**
problem-discover the problems
- **The needs behind the problems**
need-discover the problems
- **The main target group**
target group-identify the target group
- **Ideas**
trend-generate ideas
- **The values of the design**
value-check the values
- **The responsible people**
responsibility-understand where responsibility belongs

How to use it?

- **The problem I want to solve**
problem-discover the problems
- **The needs behind the problems**
need-discover the problems
- **The main target group**
target group-identify the target

How to use it?

Understand Existing Problems

- Discover the problems**
 - What are the problems existed in your responsible group?
 - What is more severe?
 - What do you want to solve first?
- Check the problems**
 - What problem could I solve?

How to use it?

Problem #11 #16 #14 #13

How to use it?

- **The problem I want to solve**
problem-discover the problems
- **The needs behind the problems**
need-discover the problems
- **The main target group**
target_group-identify the target

How to use it?

fulfill Basic Needs

- Discover the needs**
 - What are the needs behind the problems?
- Check the needs**
 - Does the design fulfill the basic needs of managers and employees?
 - What does it fulfill?
 - Does it conflict with anything?
 - How to reduce the conflict?

How to use it?

- **The problem I want to solve**
problem-discover the problems
- **The needs behind the problems**
need-discover the problems
- **The main target group**
target group-identify the target group
- **Ideas**

- **The problem I want to solve**
problem-discover the problems
- **The needs behind the problems**
need-discover the problems
- **The main target group**
target group-identify the target group
- **Ideas**
trend-generate ideas
- **The values of the design**

Scenario

You want to report the possible correlation you found to HR Analytics.

Assume that you have checked those examples already

You select the document you want to upload

Employee attendance overview

The dashboard provides a comprehensive view of employee attendance. It includes a calendar for the current month (January 2024) showing individual employee status for each day. A central table summarizes attendance metrics for the month, including total days, absence days, and percentages. A third section shows a detailed calendar view for a specific employee, highlighting their attendance record over time.

Absenteeism and Healthcare support

This dashboard is designed to support employees and manage absenteeism. It includes sections for 'Employee and health management', 'Employee health and safety', and 'Employee health and safety'. The top navigation bar includes 'My profile', 'My calendar', 'My settings', and 'My reports'.

Absenteeism dashboard

The Absenteeism dashboard provides a detailed overview of absenteeism trends. It includes a central section titled 'Absenteeism dashboard' with sub-sections for 'Employee and health management', 'Employee health and safety', and 'Employee health and safety'. The top navigation bar includes 'My profile', 'My calendar', 'My settings', and 'My reports'.
