

# ACTIEF HOOGVLIET

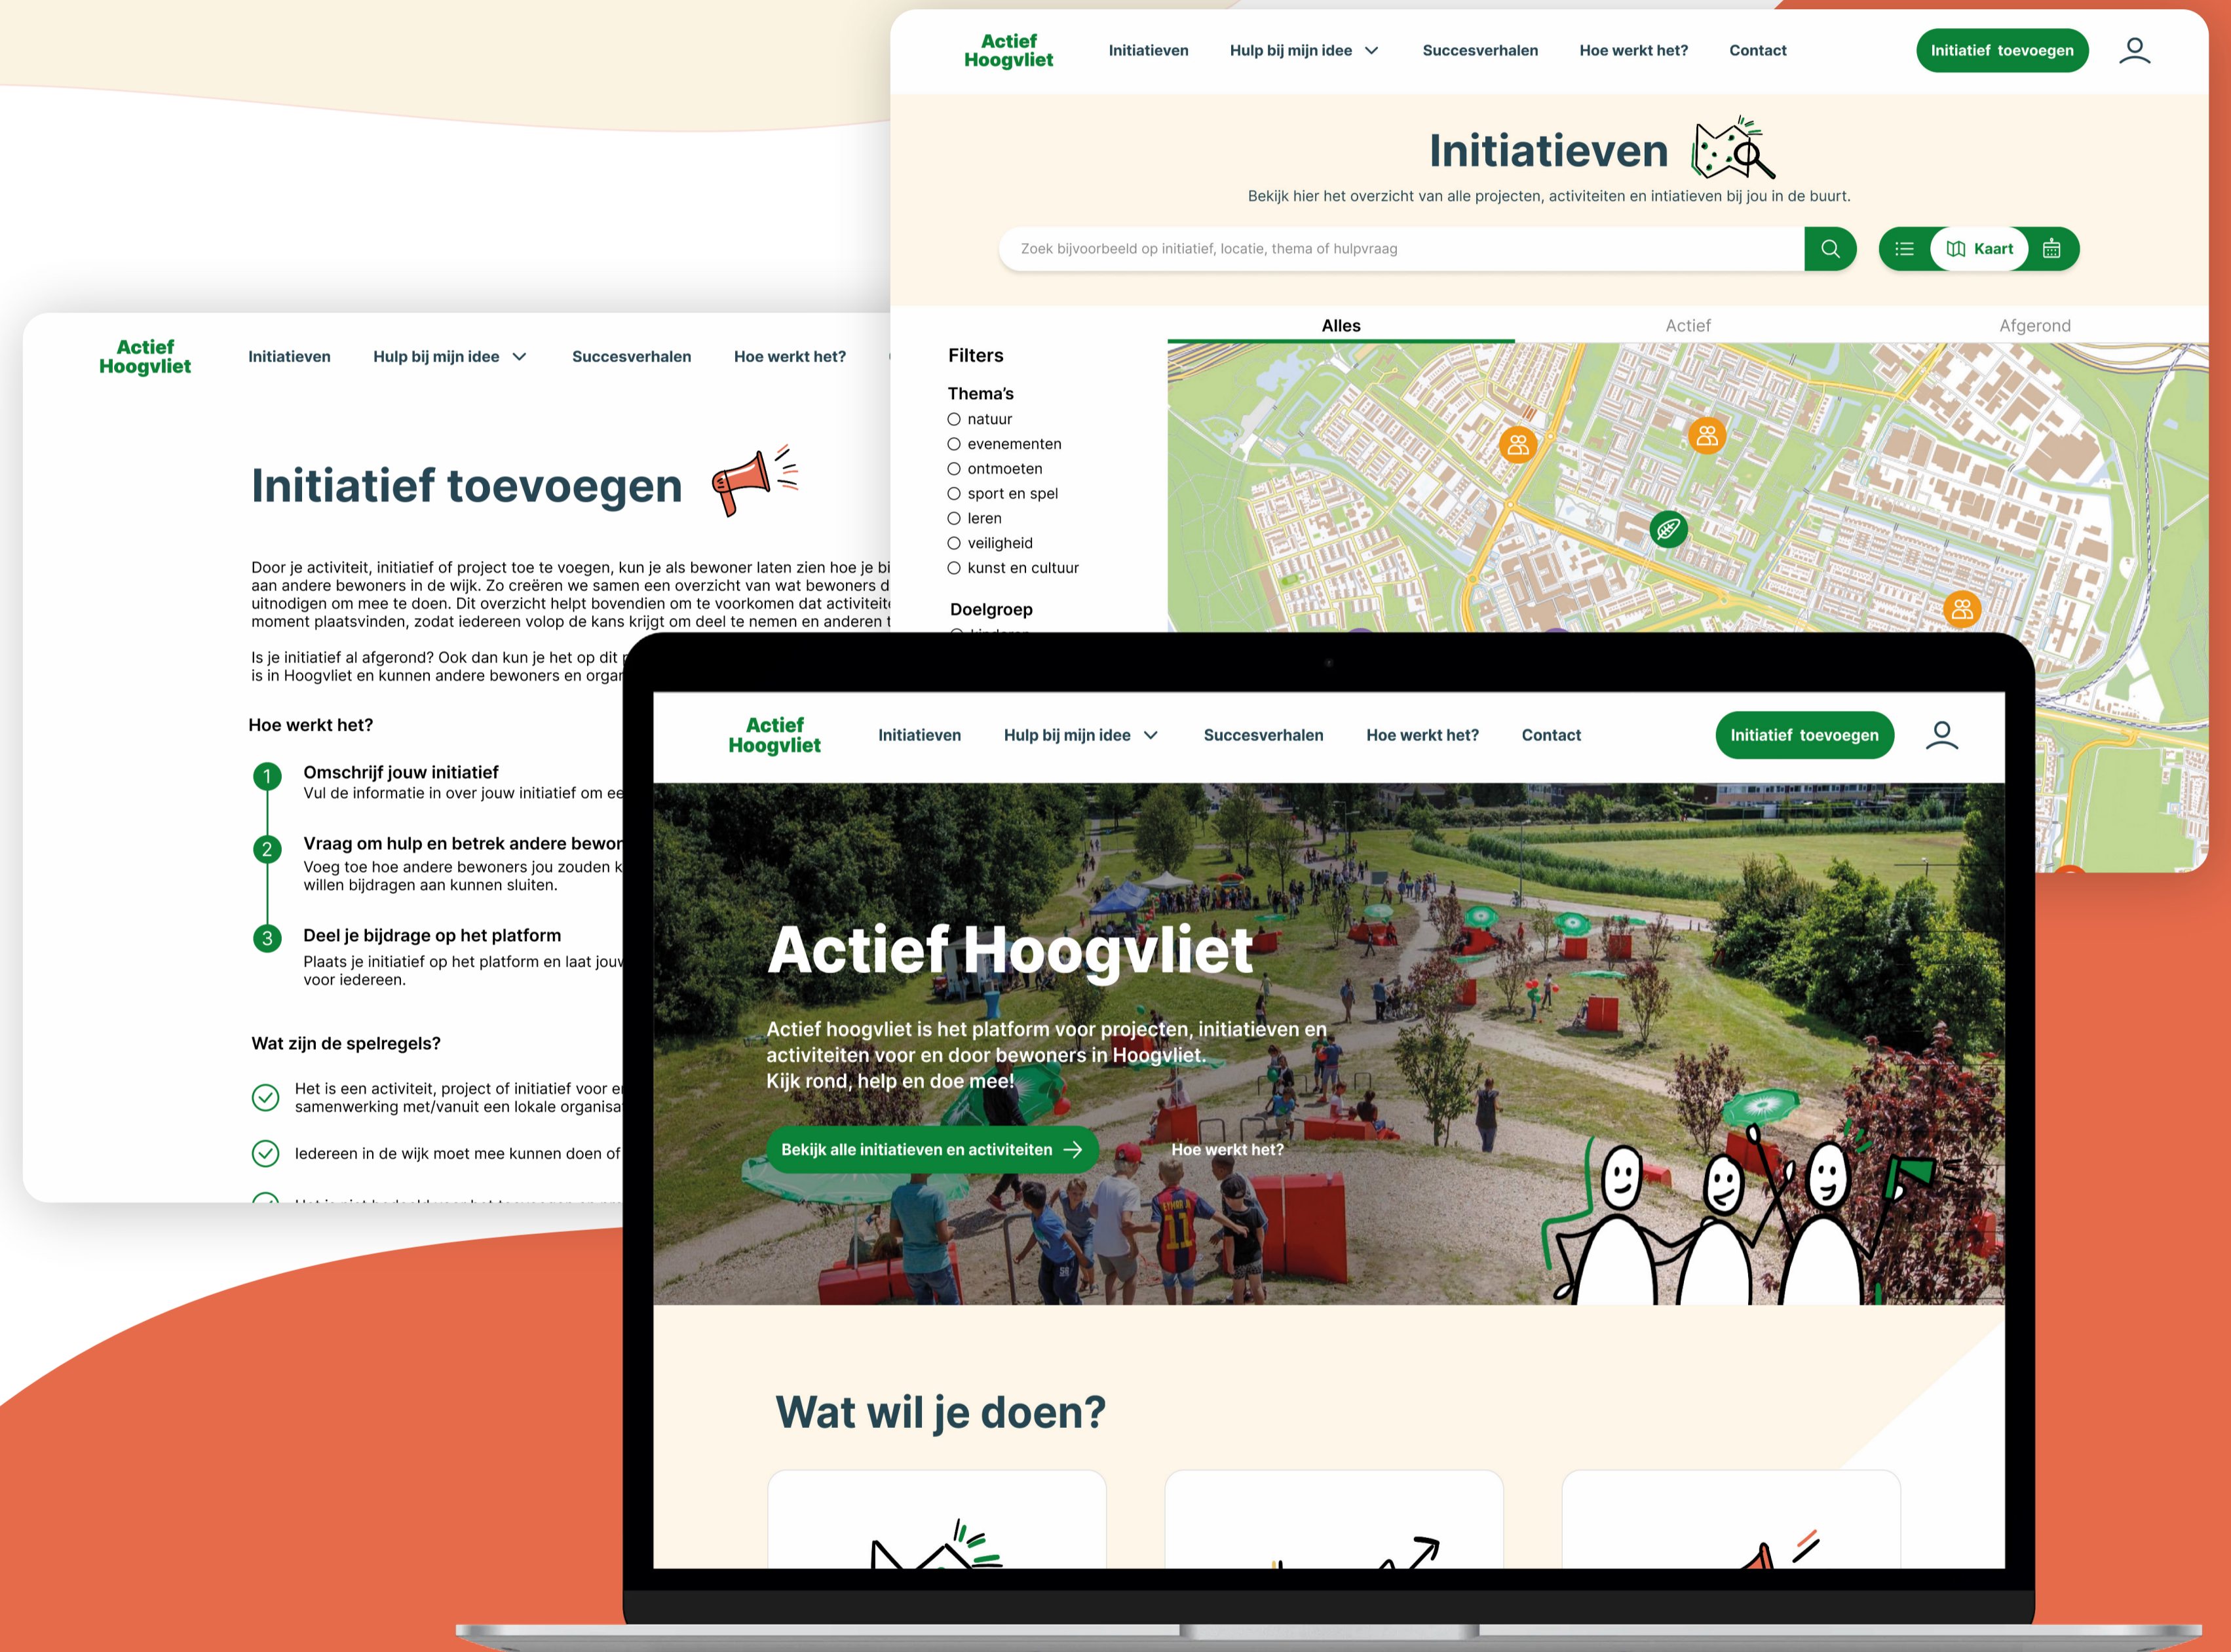

Discover opportunities for active participation in the neighbourhood

This platform is designed to support **interested residents** in exploring opportunities for contributing to Hoogvliet's informal networks, all through one accessible local platform. Residents can learn about existing initiatives in their area and their opportunities to help, get motivated by success stories and explore tools for realising their own ideas.

For **experienced, active residents**, the platform is a space to showcase their established initiatives, get recognition for their contributions and expertise, and include help requests to invite residents beyond existing networks to join and help.
