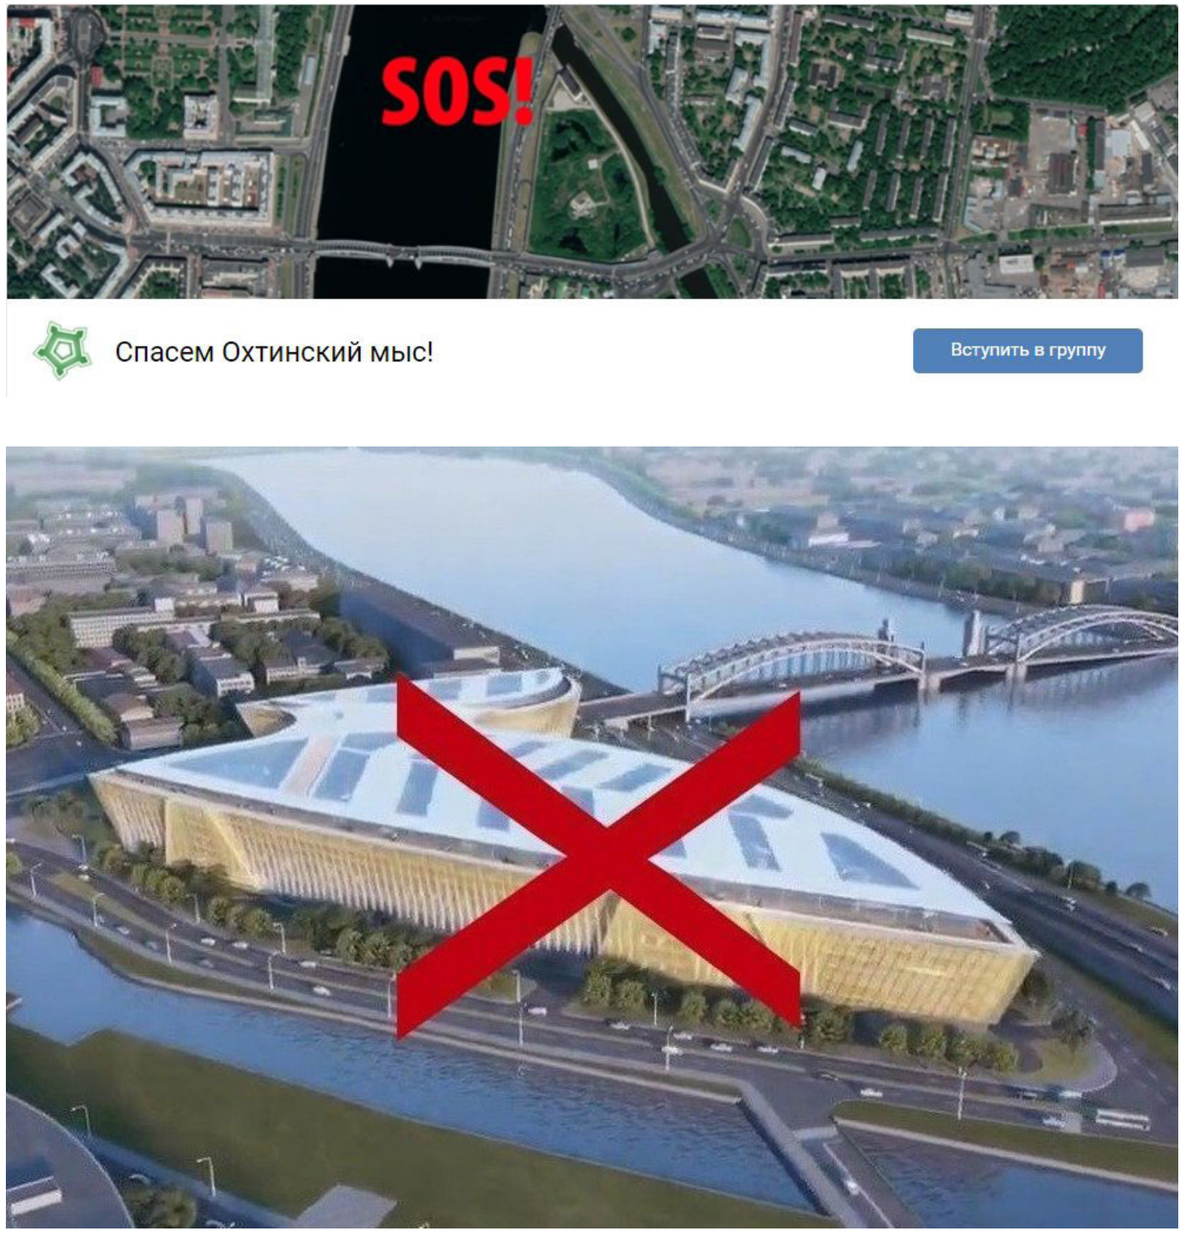
"The difference between architecture in Saint Petersburg and the rest of the world is close to the difference between a personal computer of the 1980s and a modern laptop"

Maria Elkina

Context
Concervaticce opposition



Concervative views of the citisens of Saint Petersburg lead the architecture of the city to decay and causes stagnation of architecture development.

Processes

Architecture production

PEOPLE (actors)	TECHNOLOGY (avaliable)	ENVIRONMENT (spaces)
Architects - project architects - city achitects Engineers Investors Governmental structures Contractors Clients	Archietcture/ engineering software Theoretical knowledge	Architecture offices Building site Architecture univercities Governmental institutions

Architecture of Saint Petersburg is a very enclosed circle of certain architects.

The circle excludes possibilities of large scale foreign influence.

This tendency results into the conservativeness of the cities` architecture without inflow of new ideas and concepts.

Buildig production

PEOPLE (actors)	TECHNOLOGY (avaliable)	ENVIRONMENT (spaces)
Enginees Builders Contractors Investors Clients	Machinery Materials (+ material production) - export - import Crafstmnship	Building site Architecture officies

Some buildings even in good condition are getting demolished by the governmental authorities

This creates a negative view of citizens towards the construction in the historic city center

In the process of building the neighboring houses often get damaged – protection of them is very poor form the building side

Living Culture

PEOPLE (actors)	TECHNOLOGY (avaliable)	ENVIRONMENT (spaces)
Permanent citizens - native - long term integrated Short term citizens - work immigrants - summer workers - immigrants - students Tourists - short term visitors - long term tourism	Rental websites Rental agencies Student housing portals from univesities Instagram/VK/ Telegram Interractive maps fo the city Personal blogs Magazines	Owned houses/ appartments Rented houses/ appartments - long term - short term Student halls Hotels/Hostels Places of leasure Work places

The majority of coming students stay in the city afterwards for work

Often not local students have problems with integration, since they are seen as foreigners

Local people can be very arrogant towards the way we live in the city, spend our leisure time and value our home

Opening up Architectural Academia to the wider public can help the citizens of Saint Petersburg to understand the processes behind architecture making and make the first steps towards overcoming conservative views about applying contemporary architecture in the historic areas of the city
